SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2010-2012 American Community Survey 3-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Gillette city, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
HOUSEHOLDS BY TYPE				
Total households	11,358	+/-476	11,358	(X)
Family households (families)	7,535	+/-481	66.3%	+/-4.4
With own children under 18 years	3,904	+/-376	34.4%	+/-3.3
Married-couple family	5,652	+/-472	49.8%	+/-4.3
With own children under 18 years	2,603	+/-391	22.9%	+/-3.5
Male householder, no wife present, family	677	+/-275	6.0%	+/-2.4
With own children under 18 years	444	+/-216	3.9%	+/-1.9
Female householder, no husband present, family	1,206	+/-323	10.6%	+/-2.8
With own children under 18 years	857	+/-272	7.5%	+/-2.4
Nonfamily households	3,823	+/-581	33.7%	+/-4.4
Householder living alone	2,760	+/-493	24.3%	+/-3.9
65 years and over	652	+/-204	5.7%	+/-1.8
Households with one or more people under 18 years	4,131	+/-380	36.4%	+/-3.3
Households with one or more people 65 years and over	1,301	+/-212	11.5%	+/-1.9
Average household size	2.65	+/-0.11	(X)	(X)
Average family size	3.21	+/-0.15	(X)	(X)
RELATIONSHIP				
Population in households	30,100	+/-161	30,100	(X)
Householder	11,358	+/-476	37.7%	+/-1.6
Spouse	5,629	+/-442	18.7%	+/-1.5
Child	9,739	+/-739	32.4%	+/-2.4
Other relatives	1,279	+/-532	4.2%	+/-1.8
Nonrelatives	2,095	+/-467	7.0%	+/-1.5
Unmarried partner	935	+/-266	3.1%	+/-0.9
MARITAL STATUS				
Males 15 years and over	11,890	+/-370	11,890	(X)
Never married	3,992	+/-508	33.6%	+/-3.8
Now married, except separated	6,185	+/-479	52.0%	+/-4.2
Separated	272	+/-179	2.3%	+/-1.5
Widowed	211	+/-158	1.8%	+/-1.3

Subject	Gillette city, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Divorced	1,230	+/-351	10.3%	+/-3.0
Females 15 years and over	11,168	+/-368	11,168	(X)
Never married	2,895	+/-499	25.9%	+/-4.2
Now married, except separated	5,691	+/-446	51.0%	+/-4.5
Separated	362	+/-207	3.2%	+/-1.8
Widowed	562	+/-215	5.0%	+/-1.9
Divorced	1,658	+/-374	14.8%	+/-3.2
FERTILITY				
Number of women 15 to 50 years old who had a birth in the past 12 months	441	+/-210	441	(X)
Unmarried women (widowed, divorced, and never married)	149	+/-125	33.8%	+/-23.0
Per 1,000 unmarried women	39	+/-34	(X)	(X)
Per 1,000 women 15 to 50 years old	55	+/-26	(X)	(X)
Per 1,000 women 15 to 19 years old	31	+/-34	(X)	(X)
Per 1,000 women 20 to 34 years old	100	+/-52	(X)	(X)
Per 1,000 women 35 to 50 years old	10	+/-10	(X)	(X)
GRANDPARENTS				
Number of grandparents living with own grandchildren under 18 years	N	N	N	N
Responsible for grandchildren	N	N	N	N
Years responsible for grandchildren				
Less than 1 year	N	N	N	N
1 or 2 years	N	N	N	N
3 or 4 years	N	N	N	N
5 or more years	N	N	N	N
Number of grandparents responsible for own grandchildren under 18 years	N	N	N	N
Who are female	N	N	N	N
Who are married	N	N	N	N
SCHOOL ENROLLMENT				
Population 3 years and over enrolled in school	7,471	+/-605	7,471	(X)
Nursery school, preschool	403	+/-202	5.4%	+/-2.6
Kindergarten	543	+/-200	7.3%	+/-2.7
Elementary school (grades 1-8)	3,378	+/-435	45.2%	+/-5.1
High school (grades 9-12)	1,937	+/-313	25.9%	+/-4.2
College or graduate school	1,210	+/-382	16.2%	+/-4.6
EDUCATIONAL ATTAINMENT				
Population 25 years and over	18,648	+/-512	18,648	(X)
Less than 9th grade	605	+/-320	3.2%	+/-1.7
9th to 12th grade, no diploma	817	+/-285	4.4%	+/-1.5
High school graduate (includes equivalency)	6,859	+/-811	36.8%	+/-4.2
Some college, no degree	5,272	+/-671	28.3%	+/-3.5
Associate's degree	1,668	+/-418	8.9%	+/-2.2
Bachelor's degree	2,535	+/-505	13.6%	+/-2.7
Graduate or professional degree	892	+/-266	4.8%	+/-1.4
Percent high school graduate or higher	(X)	(X)	92.4%	+/-2.1
Percent bachelor's degree or higher	(X)	(X)	18.4%	+/-3.0
VETERAN STATUS				
Civilian population 18 years and over	21,745	+/-469	21,745	(X)
Civilian veterans	1,699	+/-334	7.8%	+/-1.5

Subject	Gillette city, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
DISABILITY STATUS OF THE CIVILIAN NONINSTITUTIONALIZED POPULATION				
Total Civilian Noninstitutionalized Population	30,225	+/-140	30,225	(X)
With a disability	2,289	+/-464	7.6%	+/-1.5
Under 18 years	8,804	+/-469	8,804	(X)
With a disability	212	+/-137	2.4%	+/-1.6
18 to 64 years	19,723	+/-461	19,723	(X)
With a disability	1,316	+/-364	6.7%	+/-1.8
65 years and over	1,698	+/-242	1,698	(X)
With a disability	761	+/-248	44.8%	+/-13.3
RESIDENCE 1 YEAR AGO				
Population 1 year and over	30,066	+/-201	30,066	(X)
Same house	22,500	+/-1,170	74.8%	+/-4.0
Different house in the U.S.	7,416	+/-1,163	24.7%	+/-3.8
Same county	4,559	+/-1,151	15.2%	+/-3.8
Different county	2,857	+/-903	9.5%	+/-3.0
Same state	693	+/-402	2.3%	+/-1.3
Different state	2,164	+/-801	7.2%	+/-2.7
Abroad	150	+/-133	0.5%	+/-0.4
PLACE OF BIRTH				
Total population	30,562	+/-19	30,562	(X)
Native	29,058	+/-632	95.1%	+/-2.1
Born in United States	28,911	+/-681	94.6%	+/-2.2
State of residence	11,997	+/-898	39.3%	+/-2.9
Different state	16,914	+/-958	55.3%	+/-3.1
Born in Puerto Rico, U.S. Island areas, or born abroad to American parent(s)	147	+/-166	0.5%	+/-0.5
Foreign born	1,504	+/-631	4.9%	+/-2.1

Welsh	57	+/-66	0.2%	+/-0.2
West Indian (excluding Hispanic origin groups)	0	+/-110	0.0%	+/-0.2

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2010-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the

principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2010-2012 American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2007. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

While the 2010-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2010-2012 American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

\$1,000 to \$1,499	N	N	N	N
\$1,500 or more	N	N	N	N
Median (dollars)	888	+/-84	(X)	(X)
No rent paid	N	N	N	N
GROSS RENT AS A PERCENTAGE OF HOUSEHOLD INCOME (GRAPI)				
Occupied units paying rent (excluding units where GRAPI cannot be computed)	3,479	+/-494	3,479	(X)
Less than 15.0 percent	628	+/-277	18.1%	+/-7.8
15.0 to 19.9 percent	581	+/-308	16.7%	+/-7.9
20.0 to 24.9 percent	436	+/-199	12.5%	+/-5.7
25.0 to 29.9 percent	429	+/-222	12.3%	+/-6.1
30.0 to 34.9 percent	109	+/-89	3.1%	+/-2.6
35.0 percent or more	1,296	+/-332	37.3%	+/-8.4
Not computed	77	+/-66	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household income are valid values.

The 2009, 2010, 2011, and 2012 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

Median calculations for base table sourcing VAL, MHC, SMOC, and TAX should exclude zero values.

Telephone service data are not available for certain geographic areas due to problems with data collection. See Errata Note #93 for details.

While the 2010-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Subject	Gillette city, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Total housing units	12,721	+/-392	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2010-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
