SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2011-2013 American Community Survey 3-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Gillette city, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
HOUSEHOLDS BY TYPE				
Total households	11,324	+/-505	11,324	(X)
Family households (families)	7,550	+/-517	66.7%	+/-4.3
With own children under 18 years	4,278	+/-446	37.8%	+/-3.8
Married-couple family	5,571	+/-572	49.2%	+/-4.8
With own children under 18 years	2,830	+/-424	25.0%	+/-3.6
Male householder, no wife present, family	699	+/-333	6.2%	+/-3.0
With own children under 18 years	457	+/-264	4.0%	+/-2.3
Female householder, no husband present, family	1,280	+/-381	11.3%	+/-3.4
With own children under 18 years	991	+/-307	8.8%	+/-2.7
Nonfamily households	3,774	+/-562	33.3%	+/-4.3
Householder living alone	2,767	+/-490	24.4%	+/-3.9
65 years and over	763	+/-217	6.7%	+/-1.9
Households with one or more people under 18 years	4,451	+/-465	39.3%	+/-3.9
Households with one or more people 65 years and over	1,473	+/-257	13.0%	+/-2.1
Average household size	2.72	+/-0.12	(X)	(X)
Average family size	3.25	+/-0.16	(X)	(X)
RELATIONSHIP				
Population in households	30,825	+/-144	30,825	(X)
Householder	11,324	+/-505	36.7%	+/-1.6
Spouse	5,601	+/-570	18.2%	+/-1.8
Child	10,175	+/-629	33.0%	+/-2.1
Other relatives	1,189	+/-509	3.9%	+/-1.6
Nonrelatives	2,536	+/-502	8.2%	+/-1.6
Unmarried partner	898	+/-291	2.9%	+/-0.9
MARITAL STATUS				
Males 15 years and over	12,052	+/-388	12,052	(X)
Never married	3,984	+/-551	33.1%	+/-4.3
Now married, except separated	6,157	+/-636	51.1%	+/-5.1
Separated	466	+/-222	3.9%	+/-1.9

Subject	Gillette city, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Widowed	342	+/-222	2.8%	+/-1.8
Divorced	1,103	+/-334	9.2%	+/-2.8
Females 15 years and over	11,139	+/-367	11,139	(X)
Never married	2,825	+/-527	25.4%	+/-4.5
Now married, except separated	5,456	+/-588	49.0%	+/-5.6
Separated	270	+/-180	2.4%	+/-1.6
Widowed	740	+/-259	6.6%	+/-2.3
Divorced	1,848	+/-481	16.6%	+/-4.2
FERTILITY				
Number of women 15 to 50 years old who had a birth in the past 12 months	375	+/-184	375	(X)
Unmarried women (widowed, divorced, and never married)	132	+/-119	35.2%	+/-29.4
Per 1,000 unmarried women	36	+/-32	(X)	(X)
Per 1,000 women 15 to 50 years old	49	+/-23	(X)	(X)
Per 1,000 women 15 to 19 years old	20	+/-27	(X)	(X)
Per 1,000 women 20 to 34 years old	99	+/-46	(X)	(X)
Per 1,000 women 35 to 50 years old	0	+/-16	(X)	(X)
GRANDPARENTS				
Number of grandparents living with own grandchildren under 18 years	N	N	N	N
Responsible for grandchildren	N	N	N	N
Years responsible for grandchildren				
Less than 1 year	N	N	N	N
1 or 2 years	N	N	N	N
3 or 4 years	N	N	N	N
5 or more years	N	N	N	N
Number of grandparents responsible for own grandchildren under 18 years	N	N	N	N
Who are female	N	N	N	N
Who are married	N	N	N	N
SCHOOL ENROLLMENT				
Population 3 years and over enrolled in school	8,111	+/-696	8,111	(X)
Nursery school, preschool	410	+/-190	5.1%	+/-2.3
Kindergarten	408	+/-180	5.0%	+/-2.3
Elementary school (grades 1-8)	3,955	+/-483	48.8%	+/-5.6
High school (grades 9-12)	1,936	+/-318	23.9%	+/-3.3
College or graduate school	1,402	+/-397	17.3%	+/-4.1
EDUCATIONAL ATTAINMENT				
Population 25 years and over	18,719	+/-559	18,719	(X)
Less than 9th grade	605	+/-251	3.2%	+/-1.3
9th to 12th grade, no diploma	1,139	+/-347	6.1%	+/-1.9
High school graduate (includes equivalency)	7,254	+/-775	38.8%	+/-4.0
Some college, no degree	4,948	+/-664	26.4%	+/-3.4
Associate's degree	1,912	+/-481	10.2%	+/-2.6
Bachelor's degree	2,169	+/-421	11.6%	+/-2.2
Graduate or professional degree	692	+/-226	3.7%	+/-1.2
Percent high school graduate or higher	(X)	(X)	90.7%	+/-2.2
Percent bachelor's degree or higher	(X)	(X)	15.3%	+/-2.7
VETERAN STATUS				
Civilian population 18 years and over	21,849	+/-495	21,849	(X)
Civilian veterans	1,907	+/-458	8.7%	+/-2.1

Subject	Gillette city, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
DISABILITY STATUS OF THE CIVILIAN NONINSTITUTIONALIZED POPULATION				
Total Civilian Noninstitutionalized Population	30,902	+/-157	30,902	(X)
With a disability	2,327	+/-542	7.5%	+/-1.8
Under 18 years	9,279	+/-480	9,279	(X)
With a disability	251	+/-124	2.7%	+/-1.3
18 to 64 years	19,872	+/-491	19,872	(X)
With a disability	1,374	+/-407	6.9%	+/-2.0
65 years and over	1,751	+/-278	1,751	(X)
With a disability	702	+/-251	40.1%	+/-12.7
RESIDENCE 1 YEAR AGO				
Population 1 year and over	30,660	+/-203	30,660	(X)
Same house	23,770	+/-1,175	77.5%	+/-4.0
Different house in the U.S.	6,830	+/-1,240	22.3%	+/-4.0
Same county	3,939	+/-943	12.8%	+/-3.1
Different county	2,891	+/-799	9.4%	+/-2.6
Same state	956	+/-504	3.1%	+/-1.6
Different state	1,935	+/-626	6.3%	+/-2.0
Abroad	60	+/-78	0.2%	+/-0.3
PLACE OF BIRTH				
Total population	31,225	+/-24	31,225	(X)
Native	29,778	+/-518	95.4%	+/-1.7
Born in United States	29,713	+/-516	95.2%	+/-1.6
State of residence	13,044	+/-1,202	41.8%	+/-3.8
Different state	16,669	+/-1,090	53.4%	+/-3.5
Born in Puerto Rico, U.S. Island areas, or born abroad to American parent(s)	65	+/-93	0.2%	+/-0.3
Foreign born	1,447	+/-516	4.6%	+/-1.7

With a broadband Internet subscription	(X)	(X)	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes

when using multi-year data containing data from 2013.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2011-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2011-2013 3-Year American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2009-2013 and 2011-2013 tables, industry data in the multiyear files (2009-2013 and 2011-2013) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at <http://www.census.gov/people/io/methodology/>.

While the 2011-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2011-2013 3-Year American Community Survey

Explanation of Symbols:

1. An *** entry in the margin of error column indicates that either no sample observations or too few sample observations were

available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

8. An '(X)' means that the estimate is not applicable or not available.

25.0 to 29.9 percent	64	+/-81	2.6%	+/-3.3
30.0 to 34.9 percent	79	+/-87	3.3%	+/-3.5
35.0 percent or more	53	+/-48	2.2%	+/-2.0
Not computed	0	+/-110	(X)	(X)
GROSS RENT				
Occupied units paying rent	N	N	N	N
Less than \$200	N	N	N	N
\$200 to \$299	N	N	N	N
\$300 to \$499	N	N	N	N
\$500 to \$749	N	N	N	N
\$750 to \$999	N	N	N	N
\$1,000 to \$1,499	N	N	N	N
\$1,500 or more	N	N	N	N
Median (dollars)	885	+/-51	(X)	(X)
No rent paid	N	N	N	N
GROSS RENT AS A PERCENTAGE OF HOUSEHOLD INCOME (GRAPI)				
Occupied units paying rent (excluding units where GRAPI cannot be computed)	3,325	+/-487	3,325	(X)
Less than 15.0 percent	720	+/-197	21.7%	+/-5.9
15.0 to 19.9 percent	473	+/-245	14.2%	+/-6.6
20.0 to 24.9 percent	346	+/-197	10.4%	+/-5.7
25.0 to 29.9 percent	462	+/-215	13.9%	+/-6.0
30.0 to 34.9 percent	81	+/-73	2.4%	+/-2.2
35.0 percent or more	1,243	+/-347	37.4%	+/-9.1
Not computed	130	+/-131	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household Income are valid values.

The 2009, 2010, 2011, 2012, and 2013 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

Median calculations for base table sourcing VAL, MHC, SMOC, and TAX should exclude zero values.

Telephone service data are not available for certain geographic areas due to problems with data collection. See Errata Note #93 for details.

While the 2011-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2011-2013 3-Year American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Subject	Gillette city, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Total housing units	12,733	+/-387	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2011-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
