SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2006-2010 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns. For 2006 to 2009, the Population Estimates Program provides intercensal estimates of the population for the nation, states, and counties.

Subject	Basin town, Wyoming			
	Estimate	Estimate Margin of Error	Percent	Percent Margin of Error
HOUSEHOLDS BY TYPE				
Total households	502	+/-80	502	(X)
Family households (families)	271	+/-69	54.0%	+/-10.0
With own children under 18 years	121	+/-51	24.1%	+/-9.0
Married-couple family	204	+/-55	40.6%	+/-9.8
With own children under 18 years	83	+/-44	16.5%	+/-8.4
Male householder, no wife present, family	16	+/-14	3.2%	+/-2.8
With own children under 18 years	6	+/-9	1.2%	+/-1.8
Female householder, no husband present, family	51	+/-36	10.2%	+/-6.6
With own children under 18 years	32	+/-32	6.4%	+/-6.2
Nonfamily households	231	+/-59	46.0%	+/-10.0
Householder living alone	202	+/-53	40.2%	+/-9.6
65 years and over	92	+/-34	18.3%	+/-6.3
Households with one or more people under 18 years	144	+/-56	28.7%	+/-9.4
Households with one or more people 65 years and over	186	+/-44	37.1%	+/-7.6
Average household size	2.04	+/-0.29	(X)	(X)
Average family size	2.77	+/-0.47	(X)	(X)
RELATIONSHIP				
Population in households	1,026	+/-194	1,026	(X)
Householder	502	+/-80	48.9%	+/-6.5
Spouse	201	+/-52	19.6%	+/-4.2
Child	246	+/-111	24.0%	+/-7.7
Other relatives	32	+/-24	3.1%	+/-2.2
Nonrelatives	45	+/-44	4.4%	+/-4.1
Unmarried partner	22	+/-20	2.1%	+/-1.8
MARITAL STATUS				
Males 15 years and over	398	+/-90	398	(X)
Never married	99	+/-53	24.9%	+/-9.9
Now married, except separated	217	+/-55	54.5%	+/-11.3
Separated	8	+/-13	2.0%	+/-3.1
Widowed	31	+/-22	7.8%	+/-5.4
Divorced	43	+/-27	10.8%	+/-6.5
Females 15 years and over	465	+/-82	465	(X)

Subject	Basin town, Wyoming			
	Estimate	Estimate Margin of Error	Percent	Percent Margin of Error
Never married	48	+/-31	10.3%	+/-5.6
Now married, except separated	209	+/-53	44.9%	+/-11.0
Separated	9	+/-13	1.9%	+/-2.9
Widowed	87	+/-30	18.7%	+/-5.5
Divorced	112	+/-50	24.1%	+/-9.2
FERTILITY				
Number of women 15 to 50 years old who had a birth in the past 12 months	26	+/-25	26	(X)
Unmarried women (widowed, divorced, and never married)	2	+/-4	7.7%	+/-19.5
Per 1,000 unmarried women	24	+/-62	(X)	(X)
Per 1,000 women 15 to 50 years old	130	+/-124	(X)	(X)
Per 1,000 women 15 to 19 years old	0	+/-571	(X)	(X)
Per 1,000 women 20 to 34 years old	320	+/-274	(X)	(X)
Per 1,000 women 35 to 50 years old	81	+/-132	(X)	(X)
GRANDPARENTS				
Number of grandparents living with own grandchildren under 18 years	29	+/-24	29	(X)
Responsible for grandchildren	24	+/-23	82.8%	+/-35.2
Years responsible for grandchildren				
Less than 1 year	16	+/-19	55.2%	+/-46.0
1 or 2 years	8	+/-12	27.6%	+/-38.0

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2006-2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2006-2010 American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

People in families	(X)	(X)	2.0%	+/-2.4
Unrelated individuals 15 years and over	(X)	(X)	20.8%	+/-11.8

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2007. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

Occupation codes are 4-digit codes and are based on the Standard Occupational Classification (SOC) 2010. The 2010 Census occupation codes were updated in accordance with the 2010 revision of the SOC. To allow for the creation of 2006-2010 and 2008-2010 tables, occupation data in the multiyear files (2006-2010 and 2008-2010) were recoded to 2010 Census occupation codes. We recommend using caution when comparing data coded using 2010 Census occupation codes with data coded using previous Census occupation codes. For more information on the Census occupation code changes, please visit our website at <http://www.census.gov/hhes/www/oiindex/>.

While the 2006-2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2006-2010 American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

2006-2010 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns. For 2006 to 2009, the Population Estimates Program provides intercensal estimates of the population for the nation, states, and counties.

\$1,500 or more	0	+/-119	0.0%	+/-20.8
Median (dollars)	496	+/-81	(X)	(X)
No rent paid	2	+/-4	(X)	(X)

Subject	Basin town, Wyoming			
	Estimate	Estimate Margin of Error	Percent	Percent Margin of Error
GROSS RENT AS A PERCENTAGE OF HOUSEHOLD INCOME (GRAPI)				
Occupied units paying rent (excluding units where GRAPI cannot be computed)	138	+/-42	138	(X)
Less than 15.0 percent	47	+/-35	34.1%	+/-22.8
15.0 to 19.9 percent	16	+/-15	11.6%	+/-10.0
20.0 to 24.9 percent	8	+/-13	5.8%	+/-9.4
25.0 to 29.9 percent	30	+/-28	21.7%	+/-19.6
30.0 to 34.9 percent	11	+/-12	8.0%	+/-8.3
35.0 percent or more	26	+/-20	18.8%	+/-13.3
Not computed	2	+/-4	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household income are valid values.

The 2009 and 2010 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

While the 2006-2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2006-2010 American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An 'l' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

DP05

ACS DEMOGRAPHIC AND HOUSING ESTIMATES

2006-2010 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns. For 2006 to 2009, the Population Estimates Program provides intercensal estimates of the population for the nation, states, and counties.

White and American Indian and Alaska Native	10	+/-12	0.9%	+/-1.1
White and Asian	0	+/-119	0.0%	+/-3.0
Black or African American and American Indian and Alaska Native	0	+/-119	0.0%	+/-3.0
Race alone or in combination with one or more other races				
Total population	1,060	+/-199	1,060	(X)
White	1,040	+/-197	98.1%	+/-1.2
Black or African American	14	+/-16	1.3%	+/-1.5
American Indian and Alaska Native	19	+/-16	1.8%	+/-1.5
Asian	0	+/-119	0.0%	+/-3.0
Native Hawaiian and Other Pacific Islander	0	+/-119	0.0%	+/-3.0
Some other race	9	+/-13	0.8%	+/-1.2
HISPANIC OR LATINO AND RACE				
Total population	1,060	+/-199	1,060	(X)
Hispanic or Latino (of any race)	54	+/-53	5.1%	+/-4.9
Mexican	48	+/-52	4.5%	+/-4.9
Puerto Rican	2	+/-3	0.2%	+/-0.3
Cuban	0	+/-119	0.0%	+/-3.0
Other Hispanic or Latino	4	+/-7	0.4%	+/-0.6
Not Hispanic or Latino	1,006	+/-193	94.9%	+/-4.9
White alone	975	+/-189	92.0%	+/-5.2
Black or African American alone	2	+/-4	0.2%	+/-0.3
American Indian and Alaska Native alone	7	+/-7	0.7%	+/-0.7
Asian alone	0	+/-119	0.0%	+/-3.0
Native Hawaiian and Other Pacific Islander alone	0	+/-119	0.0%	+/-3.0
Some other race alone	0	+/-119	0.0%	+/-3.0
Two or more races	22	+/-19	2.1%	+/-1.7
Two races including Some other race	0	+/-119	0.0%	+/-3.0
Two races excluding Some other race, and Three or more races	22	+/-19	2.1%	+/-1.7
Total housing units	553	+/-78	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data).

The effect of nonsampling error is not represented in these tables.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological differences in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see http://www.census.gov/acs/www/methodology/questionnaire_changes/. For more information about changes in the estimates see <http://www.census.gov/population/www/socdemo/hispanic/reports.html>.

While the 2006-2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
