

DP02

SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2008-2012 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Basin town, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
HOUSEHOLDS BY TYPE				
Total households	447	+/-68	447	(X)
Family households (families)	244	+/-52	54.6%	+/-8.7
With own children under 18 years	117	+/-39	26.2%	+/-7.8
Married-couple family	219	+/-52	49.0%	+/-9.6
With own children under 18 years	111	+/-39	24.8%	+/-7.8
Male householder, no wife present, family	6	+/-10	1.3%	+/-2.3
With own children under 18 years	6	+/-10	1.3%	+/-2.3
Female householder, no husband present, family	19	+/-18	4.3%	+/-3.8
With own children under 18 years	0	+/-12	0.0%	+/-7.0
Nonfamily households	203	+/-51	45.4%	+/-8.7
Householder living alone	187	+/-49	41.8%	+/-8.6
65 years and over	93	+/-32	20.8%	+/-6.8
Households with one or more people under 18 years	120	+/-40	26.8%	+/-8.1
Households with one or more people 65 years and over	172	+/-42	38.5%	+/-8.8
Average household size	2.23	+/-0.26	(X)	(X)
Average family size	3.16	+/-0.40	(X)	(X)
RELATIONSHIP				
Population in households	998	+/-183	998	(X)
Householder	447	+/-68	44.8%	+/-5.2
Spouse	226	+/-54	22.6%	+/-3.2
Child	277	+/-94	27.8%	+/-5.8
Other relatives	24	+/-24	2.4%	+/-2.4
Nonrelatives	24	+/-20	2.4%	+/-1.9
Unmarried partner	17	+/-17	1.7%	+/-1.7
MARITAL STATUS				
Males 15 years and over	399	+/-86	399	(X)
Never married	60	+/-38	15.0%	+/-8.3
Now married, except separated	246	+/-56	61.7%	+/-11.9
Separated	19	+/-22	4.8%	+/-5.2
Widowed	34	+/-22	8.5%	+/-4.7

Subject	Basin town, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Divorced	40	+/-28	10.0%	+/-6.1
Females 15 years and over	472	+/-86	472	(X)
Never married	53	+/-38	11.2%	+/-6.9
Now married, except separated	235	+/-54	49.8%	+/-10.0
Separated	19	+/-22	4.0%	+/-4.8
Widowed	112	+/-39	23.7%	+/-7.4
Divorced	53	+/-26	11.2%	+/-5.0
FERTILITY				
Number of women 15 to 50 years old who had a birth in the past 12 months	30	+/-25	30	(X)
Unmarried women (widowed, divorced, and never married)	0	+/-12	0.0%	+/-54.1
Per 1,000 unmarried women	0	+/-393	(X)	(X)
Per 1,000 women 15 to 50 years old	142	+/-116	(X)	(X)
Per 1,000 women 15 to 19 years old	0	+/-571	(X)	(X)
Per 1,000 women 20 to 34 years old	309	+/-271	(X)	(X)
Per 1,000 women 35 to 50 years old	77	+/-122	(X)	(X)
GRANDPARENTS				
Number of grandparents living with own grandchildren under 18 years	10	+/-13	10	(X)
Responsible for grandchildren	3	+/-5	30.0%	+/-52.5
Years responsible for grandchildren				
Less than 1 year	3	+/-5	30.0%	+/-52.5
1 or 2 years	0	+/-12	0.0%	+/-93.8
3 or 4 years	0	+/-12	0.0%	+/-93.8
5 or more years	0	+/-12	0.0%	+/-93.8
Number of grandparents responsible for own grandchildren under 18 years	3	+/-5	3	(X)
Who are female	3	+/-5	100.0%	+/-100.0
Who are married	0	+/-12	0.0%	+/-100.0
SCHOOL ENROLLMENT				
Population 3 years and over enrolled in school	212	+/-87	212	(X)
Nursery school, preschool	0	+/-12	0.0%	+/-14.2
Kindergarten	16	+/-16	7.5%	+/-7.2
Elementary school (grades 1-8)	149	+/-65	70.3%	+/-15.8
High school (grades 9-12)	29	+/-34	13.7%	+/-14.0
College or graduate school	18	+/-19	8.5%	+/-8.5
EDUCATIONAL ATTAINMENT				
Population 25 years and over	794	+/-119	794	(X)
Less than 9th grade	38	+/-25	4.8%	+/-3.0
9th to 12th grade, no diploma	56	+/-29	7.1%	+/-3.6
High school graduate (includes equivalency)	275	+/-64	34.6%	+/-6.4
Some college, no degree	238	+/-62	30.0%	+/-6.1
Associate's degree	55	+/-32	6.9%	+/-3.7
Bachelor's degree	61	+/-31	7.7%	+/-3.8
Graduate or professional degree	71	+/-31	8.9%	+/-3.6
Percent high school graduate or higher	(X)	(X)	88.2%	+/-4.6
Percent bachelor's degree or higher	(X)	(X)	16.6%	+/-5.6
VETERAN STATUS				
Civilian population 18 years and over	835	+/-124	835	(X)
Civilian veterans	130	+/-45	15.6%	+/-4.8

Subject	Basin town, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
DISABILITY STATUS OF THE CIVILIAN NONINSTITUTIONALIZED POPULATION				
Total Civilian Noninstitutionalized Population	998	+/-183	998	(X)
With a disability	225	+/-57	22.5%	+/-5.7
Under 18 years	259	+/-95	259	(X)
With a disability	13	+/-17	5.0%	+/-6.4
18 to 64 years	502	+/-115	502	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the

principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2008-2012 American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

DP03 | SELECTED ECONOMIC CHARACTERISTICS

2008-2012 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Unrelated individuals 15 years and over	(X)	(X)	22.5%	+/-10.9

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2007. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2008-2012 American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

35.0 percent or more	30	+/-21	19.5%	+/-12.7
Not computed	12	+/-14	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household income are valid values.

The 2007, 2008, 2009, 2010, 2011, and 2012 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

Median calculations for base table sourcing VAL, MHC, SMOC, and TAX should exclude zero values.

Telephone service data are not available for certain geographic areas due to problems with data collection. See Errata Note #93 for details.

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2008-2012 American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Asian	12	+/-16	1.1%	+/-1.5
Native Hawaiian and Other Pacific Islander	0	+/-12	0.0%	+/-2.9
Some other race	8	+/-15	0.7%	+/-1.4
HISPANIC OR LATINO AND RACE				
Total population	1,094	+/-185	1,094	(X)
Hispanic or Latino (of any race)	62	+/-55	5.7%	+/-4.7
Mexican	59	+/-55	5.4%	+/-4.8
Puerto Rican	0	+/-12	0.0%	+/-2.9
Cuban	0	+/-12	0.0%	+/-2.9
Other Hispanic or Latino	3	+/-6	0.3%	+/-0.5
Not Hispanic or Latino	1,032	+/-173	94.3%	+/-4.7
White alone	998	+/-171	91.2%	+/-4.7
Black or African American alone	1	+/-3	0.1%	+/-0.2
American Indian and Alaska Native alone	5	+/-6	0.5%	+/-0.6
Asian alone	12	+/-16	1.1%	+/-1.5
Native Hawaiian and Other Pacific Islander alone	0	+/-12	0.0%	+/-2.9
Some other race alone	0	+/-12	0.0%	+/-2.9
Two or more races	16	+/-18	1.5%	+/-1.7
Two races including Some other race	0	+/-12	0.0%	+/-2.9
Two races excluding Some other race, and Three or more races	16	+/-18	1.5%	+/-1.7

Subject	Basin town, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Total housing units	530	+/-64	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological differences in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see http://www.census.gov/acs/www/methodology/questionnaire_changes/. For more information about changes in the estimates see <http://www.census.gov/population/hispanic/files/acs08researchnote.pdf>.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '- ' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+ ' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
