SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2010-2014 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Basin town, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
HOUSEHOLDS BY TYPE				
Total households	449	+/-64	449	(X)
Family households (families)	269	+/-59	59.9%	+/-10.7
With own children under 18 years	108	+/-40	24.1%	+/-7.5
Married-couple family	232	+/-50	51.7%	+/-10.0
With own children under 18 years	82	+/-35	18.3%	+/-7.1
Male householder, no wife present, family	18	+/-20	4.0%	+/-4.3
With own children under 18 years	18	+/-20	4.0%	+/-4.3
Female householder, no husband present, family	19	+/-21	4.2%	+/-4.6
With own children under 18 years	8	+/-12	1.8%	+/-2.7
Nonfamily households	180	+/-55	40.1%	+/-10.7
Householder living alone	157	+/-56	35.0%	+/-11.3
65 years and over	95	+/-38	21.2%	+/-7.9
Households with one or more people under 18 years	110	+/-40	24.5%	+/-7.5
Households with one or more people 65 years and over	173	+/-44	38.5%	+/-9.0
Average household size	2.53	+/-0.37	(X)	(X)
Average family size	3.41	+/-0.38	(X)	(X)
RELATIONSHIP				
Population in households	1,137	+/-209	1,137	(X)
Householder	449	+/-64	39.5%	+/-5.7
Spouse	248	+/-53	21.8%	+/-3.7
Child	344	+/-120	30.3%	+/-6.3
Other relatives	55	+/-45	4.8%	+/-3.6
Nonrelatives	41	+/-34	3.6%	+/-2.8
Unmarried partner	33	+/-31	2.9%	+/-2.6
MARITAL STATUS				
Males 15 years and over	509	+/-118	509	(X)
Never married	119	+/-68	23.4%	+/-10.1
Now married, except separated	269	+/-52	52.8%	+/-12.6
Separated	8	+/-14	1.6%	+/-2.6

Subject	Basin town, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Widowed	19	+/-25	3.7%	+/-4.8
Divorced	94	+/-49	18.5%	+/-7.5
Females 15 years and over	516	+/-83	516	(X)
Never married	94	+/-49	18.2%	+/-8.0
Now married, except separated	227	+/-58	44.0%	+/-9.6
Separated	22	+/-23	4.3%	+/-4.3
Widowed	96	+/-30	18.6%	+/-6.1
Divorced	77	+/-43	14.9%	+/-7.8
FERTILITY				
Number of women 15 to 50 years old who had a birth in the past 12 months	22	+/-25	22	(X)
Unmarried women (widowed, divorced, and never married)	15	+/-22	68.2%	+/-54.3
Per 1,000 unmarried women	160	+/-229	(X)	(X)
Per 1,000 women 15 to 50 years old	102	+/-109	(X)	(X)
Per 1,000 women 15 to 19 years old	0	+/-607	(X)	(X)
Per 1,000 women 20 to 34 years old	247	+/-247	(X)	(X)
Per 1,000 women 35 to 50 years old	0	+/-247	(X)	(X)
GRANDPARENTS				
Number of grandparents living with own grandchildren under 18 years	10	+/-16	10	(X)
Responsible for grandchildren	10	+/-16	100.0%	+/-90.1
Years responsible for grandchildren				
Less than 1 year	0	+/-11	0.0%	+/-90.1
1 or 2 years	0	+/-11	0.0%	+/-90.1
3 or 4 years	10	+/-16	100.0%	+/-90.1
5 or more years	0	+/-11	0.0%	+/-90.1
Number of grandparents responsible for own grandchildren under 18 years	10	+/-16	10	(X)
Who are female	0	+/-11	0.0%	+/-90.1
Who are married	0	+/-11	0.0%	+/-90.1
SCHOOL ENROLLMENT				
Population 3 years and over enrolled in school	275	+/-121	275	(X)
Nursery school, preschool	9	+/-14	3.3%	+/-4.2
Kindergarten	31	+/-25	11.3%	+/-7.6
Elementary school (grades 1-8)	137	+/-67	49.8%	+/-20.8

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes

when using multi-year data containing data from 2013.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2010-2014 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2010-2014 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Workers include members of the Armed Forces and civilians who were at work last week.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2010-2014 tables, industry data in the multiyear files (2010-2014) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at <http://www.census.gov/people/io/methodology/>.

Logical coverage edits applying a rules-based assignment of Medicaid, Medicare and military health coverage were added as of 2009 -- please see http://www.census.gov/hhes/www/hlthins/publications/coverage_edits_final.pdf for more details. The corresponding 2008 data table in American FactFinder does not incorporate these edits and is therefore not comparable to this table in 2009, 2010, 2011, or 2012. Select geographies of 2008 data comparable to the 2009, 2010, 2011, and 2012 tables are accessible at <http://www.census.gov/hhes/www/hlthins/data/acs/2008/re-run.html>.

The health insurance coverage category names were modified in 2010. See ACS Health Insurance Definitions for a list of the insurance type definitions.

While the 2010-2014 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2010-2014 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

DP04

SELECTED HOUSING CHARACTERISTICS

2010-2014 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

GROSS RENT				
Occupied units paying rent	126	+/-44	126	(X)
Less than \$200	0	+/-11	0.0%	+/-21.0
\$200 to \$299	0	+/-11	0.0%	+/-21.0
\$300 to \$499	32	+/-30	25.4%	+/-21.1
\$500 to \$749	45	+/-31	35.7%	+/-19.8
\$750 to \$999	33	+/-25	26.2%	+/-20.3
\$1,000 to \$1,499	16	+/-17	12.7%	+/-13.1
\$1,500 or more	0	+/-11	0.0%	+/-21.0
Median (dollars)	636	+/-178	(X)	(X)
No rent paid	11	+/-10	(X)	(X)
GROSS RENT AS A PERCENTAGE OF HOUSEHOLD INCOME (GRAPI)				
Occupied units paying rent (excluding units where GRAPI cannot be computed)	126	+/-44	126	(X)
Less than 15.0 percent	37	+/-27	29.4%	+/-18.4
15.0 to 19.9 percent	22	+/-19	17.5%	+/-13.4
20.0 to 24.9 percent	8	+/-13	6.3%	+/-10.4
25.0 to 29.9 percent	0	+/-11	0.0%	+/-21.0
30.0 to 34.9 percent	8	+/-13	6.3%	+/-9.9
35.0 percent or more	51	+/-33	40.5%	+/-21.7
Not computed	11	+/-10	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Households not paying cash rent are excluded from the calculation of median gross rent.

Telephone service data are not available for certain geographic areas due to problems with data collection. See Errata Note #93 for details.

While the 2010-2014 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2010-2014 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval

or upper interval of an open-ended distribution.

3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

White	1,219	+/-210	98.1%	+/-1.9
Black or African American	42	+/-53	3.4%	+/-4.2
American Indian and Alaska Native	17	+/-24	1.4%	+/-2.0
Asian	12	+/-20	1.0%	+/-1.6
Native Hawaiian and Other Pacific Islander	0	+/-11	0.0%	+/-2.4
Some other race	15	+/-21	1.2%	+/-1.6
HISPANIC OR LATINO AND RACE				
Total population	1,243	+/-214	1,243	(X)
Hispanic or Latino (of any race)	30	+/-23	2.4%	+/-1.8
Mexican	28	+/-23	2.3%	+/-1.8
Puerto Rican	0	+/-11	0.0%	+/-2.4
Cuban	0	+/-11	0.0%	+/-2.4
Other Hispanic or Latino	2	+/-5	0.2%	+/-0.4
Not Hispanic or Latino	1,213	+/-210	97.6%	+/-1.8
White alone	1,142	+/-204	91.9%	+/-4.6
Black or African American alone	3	+/-5	0.2%	+/-0.4
American Indian and Alaska Native alone	4	+/-8	0.3%	+/-0.6
Asian alone	12	+/-20	1.0%	+/-1.6
Native Hawaiian and Other Pacific Islander alone	0	+/-11	0.0%	+/-2.4
Some other race alone	0	+/-11	0.0%	+/-2.4
Two or more races	52	+/-55	4.2%	+/-4.3
Two races including Some other race	0	+/-11	0.0%	+/-2.4
Two races excluding Some other race, and Three or more races	52	+/-55	4.2%	+/-4.3

Subject	Basin town, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Total housing units	543	+/-66	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2010-2014 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
