SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2008-2012 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Casper city, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
<b>HOUSEHOLDS BY TYPE</b>				
Total households	22,807	+/-399	22,807	(X)
Family households (families)	14,834	+/-499	65.0%	+/-2.0
With own children under 18 years	6,760	+/-381	29.6%	+/-1.6
Married-couple family	11,231	+/-480	49.2%	+/-2.1
With own children under 18 years	4,639	+/-371	20.3%	+/-1.6
Male householder, no wife present, family	1,018	+/-226	4.5%	+/-1.0
With own children under 18 years	520	+/-158	2.3%	+/-0.7
Female householder, no husband present, family	2,585	+/-305	11.3%	+/-1.3
With own children under 18 years	1,601	+/-229	7.0%	+/-1.0
Nonfamily households	7,973	+/-477	35.0%	+/-2.0
Householder living alone	6,618	+/-518	29.0%	+/-2.2
65 years and over	2,263	+/-245	9.9%	+/-1.1
Households with one or more people under 18 years	7,381	+/-377	32.4%	+/-1.6
Households with one or more people 65 years and over	5,072	+/-219	22.2%	+/-0.9
Average household size	2.39	+/-0.04	(X)	(X)
Average family size	2.93	+/-0.08	(X)	(X)
<b>RELATIONSHIP</b>				
Population in households	54,502	+/-282	54,502	(X)
Householder	22,807	+/-399	41.8%	+/-0.7
Spouse	11,164	+/-491	20.5%	+/-0.9
Child	15,086	+/-507	27.7%	+/-0.9

West Indian (excluding Hispanic origin groups)	0	+/-28	0.0%	+/-0.1

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the

principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2007. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2008-2012 American Community Survey

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household income are valid values.

The 2007, 2008, 2009, 2010, 2011, and 2012 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

Median calculations for base table sourcing VAL, MHC, SMOC, and TAX should exclude zero values.

Telephone service data are not available for certain geographic areas due to problems with data collection. See Errata Note #93 for details.

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Male	20,984	+/-253	49.2%	+/-0.5
Female	21,633	+/-243	50.8%	+/-0.5
65 years and over	7,378	+/-255	7,378	(X)
Male	3,111	+/-171	42.2%	+/-1.7
Female	4,267	+/-188	57.8%	+/-1.7
<b>RACE</b>				
Total population	55,729	+/-36	55,729	(X)

Subject	Casper city, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
One race	53,898	+/-382	96.7%	+/-0.7
Two or more races	1,831	+/-375	3.3%	+/-0.7
One race	53,898	+/-382	96.7%	+/-0.7
White	51,694	+/-430	92.8%	+/-0.8
Black or African American	478	+/-151	0.9%	+/-0.3
American Indian and Alaska Native	575	+/-288	1.0%	+/-0.5
Cherokee tribal grouping	9	+/-14	0.0%	+/-0.1
Chippewa tribal grouping	48	+/-68	0.1%	+/-0.1
Navajo tribal grouping	21	+/-22	0.0%	+/-0.1
Sioux tribal grouping	33	+/-29	0.1%	+/-0.1
Asian	554	+/-117	1.0%	+/-0.2
Asian Indian	63	+/-98	0.1%	+/-0.2
Chinese	39	+/-43	0.1%	+/-0.1
Filipino	282	+/-171	0.5%	+/-0.3
Japanese	89	+/-73	0.2%	+/-0.1
Korean	12	+/-20	0.0%	+/-0.1
Vietnamese	0	+/-28	0.0%	+/-0.1
Other Asian	69	+/-72	0.1%	+/-0.1
Native Hawaiian and Other Pacific Islander	0	+/-28	0.0%	+/-0.1
Native Hawaiian	0	+/-28	0.0%	+/-0.1
Guamanian or Chamorro	0	+/-28	0.0%	+/-0.1
Samoan	0	+/-28	0.0%	+/-0.1
Other Pacific Islander	0	+/-28	0.0%	+/-0.1
Some other race	597	+/-207	1.1%	+/-0.4
Two or more races	1,831	+/-375	3.3%	+/-0.7
White and Black or African American	591	+/-211	1.1%	+/-0.4
White and American Indian and Alaska Native	673	+/-243	1.2%	+/-0.4
White and Asian	124	+/-92	0.2%	+/-0.2
Black or African American and American Indian and Alaska Native	3	+/-5	0.0%	+/-0.1
Race alone or in combination with one or more other races				
Total population	55,729	+/-36	55,729	(X)
White	53,464	+/-415	95.9%	+/-0.8
Black or African American	1,189	+/-184	2.1%	+/-0.3
American Indian and Alaska Native	1,339	+/-319	2.4%	+/-0.6
Asian	760	+/-97	1.4%	+/-0.2
Native Hawaiian and Other Pacific Islander	136	+/-122	0.2%	+/-0.2
Some other race	834	+/-265	1.5%	+/-0.5
HISPANIC OR LATINO AND RACE				
Total population	55,729	+/-36	55,729	(X)
Hispanic or Latino (of any race)	4,333	+/-294	7.8%	+/-0.5
Mexican	3,142	+/-372	5.6%	+/-0.7
Puerto Rican	54	+/-39	0.1%	+/-0.1
Cuban	42	+/-53	0.1%	+/-0.1
Other Hispanic or Latino	1,095	+/-346	2.0%	+/-0.6
Not Hispanic or Latino	51,396	+/-297	92.2%	+/-0.5
White alone	48,868	+/-328	87.7%	+/-0.6
Black or African American alone	478	+/-151	0.9%	+/-0.3
American Indian and Alaska Native alone	319	+/-120	0.6%	+/-0.2
Asian alone	513	+/-101	0.9%	+/-0.2
Native Hawaiian and Other Pacific Islander alone	0	+/-28	0.0%	+/-0.1
Some other race alone	0	+/-28	0.0%	+/-0.1
Two or more races	1,218	+/-264	2.2%	+/-0.5
Two races including Some other race	23	+/-26	0.0%	+/-0.1
Two races excluding Some other race, and Three or more races	1,195	+/-265	2.1%	+/-0.5

Subject	Casper city, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Total housing units	25,130	+/-282	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological differences in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see [http://www.census.gov/acs/www/methodology/questionnaire\\_changes/](http://www.census.gov/acs/www/methodology/questionnaire_changes/). For more information about changes in the estimates see <http://www.census.gov/population/hispanic/files/acs08researchnote.pdf>.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '- ' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+ ' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
