SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2010-2014 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Cody city, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
HOUSEHOLDS BY TYPE				
Total households	3,905	+/-206	3,905	(X)
Family households (families)	2,542	+/-194	65.1%	+/-5.3
With own children under 18 years	1,071	+/-150	27.4%	+/-4.3
Married-couple family	2,130	+/-216	54.5%	+/-5.9
With own children under 18 years	820	+/-159	21.0%	+/-4.4
Male householder, no wife present, family	61	+/-62	1.6%	+/-1.6
With own children under 18 years	53	+/-62	1.4%	+/-1.6
Female householder, no husband present, family	351	+/-148	9.0%	+/-3.8
With own children under 18 years	198	+/-104	5.1%	+/-2.7
Nonfamily households	1,363	+/-248	34.9%	+/-5.3
Householder living alone	1,052	+/-230	26.9%	+/-5.1
65 years and over	362	+/-120	9.3%	+/-2.9
Households with one or more people under 18 years	1,125	+/-153	28.8%	+/-4.3
Households with one or more people 65 years and over	1,118	+/-159	28.6%	+/-3.6
Average household size	2.44	+/-0.13	(X)	(X)
Average family size	2.99	+/-0.17	(X)	(X)
RELATIONSHIP				
Population in households	9,536	+/-86	9,536	(X)
Householder	3,905	+/-206	41.0%	+/-2.2
Spouse	2,090	+/-208	21.9%	+/-2.2
Child	2,659	+/-299	27.9%	+/-3.1
Other relatives	300	+/-143	3.1%	+/-1.5
Nonrelatives	582	+/-198	6.1%	+/-2.1
Unmarried partner	226	+/-125	2.4%	+/-1.3
MARITAL STATUS				
Males 15 years and over	3,525	+/-277	3,525	(X)
Never married	988	+/-252	28.0%	+/-5.9
Now married, except separated	2,163	+/-205	61.4%	+/-6.1
Separated	17	+/-24	0.5%	+/-0.7

Subject	Cody city, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Widowed	63	+/-47	1.8%	+/-1.3
Divorced	294	+/-103	8.3%	+/-2.8
Females 15 years and over	4,322	+/-256	4,322	(X)
Never married	1,064	+/-273	24.6%	+/-5.5
Now married, except separated	2,282	+/-240	52.8%	+/-6.6
Separated	70	+/-77	1.6%	+/-1.8
Widowed	402	+/-122	9.3%	+/-2.7
Divorced	504	+/-164	11.7%	+/-3.8
FERTILITY				
Number of women 15 to 50 years old who had a birth in the past 12 months	144	+/-85	144	(X)
Unmarried women (widowed, divorced, and never married)	13	+/-24	9.0%	+/-18.7
Per 1,000 unmarried women	10	+/-19	(X)	(X)
Per 1,000 women 15 to 50 years old	58	+/-35	(X)	(X)
Per 1,000 women 15 to 19 years old	0	+/-94	(X)	(X)
Per 1,000 women 20 to 34 years old	104	+/-75	(X)	(X)
Per 1,000 women 35 to 50 years old	24	+/-29	(X)	(X)
GRANDPARENTS				
Number of grandparents living with own grandchildren under 18 years	132	+/-90	132	(X)
Responsible for grandchildren	18	+/-24	13.6%	+/-21.3
Years responsible for grandchildren				
Less than 1 year	0	+/-16	0.0%	+/-20.2
1 or 2 years	0	+/-16	0.0%	+/-20.2
3 or 4 years	13	+/-23	9.8%	+/-19.4
5 or more years	5	+/-9	3.8%	+/-7.8
Number of grandparents responsible for own grandchildren under 18 years	18	+/-24	18	(X)
Who are female	11	+/-14	61.1%	+/-31.0
Who are married	13	+/-23	72.2%	+/-55.3
SCHOOL ENROLLMENT				
Population 3 years and over enrolled in school	2,218	+/-297	2,218	(X)
Nursery school, preschool	159	+/-99	7.2%	+/-4.5
Kindergarten	89	+/-58	4.0%	+/-2.5
Elementary school (grades 1-8)	1,013	+/-196	45.7%	+/-8.4
High school (grades 9-12)	516	+/-177	23.3%	+/-7.2
College or graduate school	441	+/-182	19.9%	+/-7.0
EDUCATIONAL ATTAINMENT				
Population 25 years and over	6,740	+/-285	6,740	(X)
Less than 9th grade	145	+/-76	2.2%	+/-1.1
9th to 12th grade, no diploma	349	+/-144	5.2%	+/-2.1
High school graduate (includes equivalency)	2,328	+/-359	34.5%	+/-5.1
Some college, no degree	1,552	+/-312	23.0%	+/-4.6
Associate's degree	646	+/-178	9.6%	+/-2.6
Bachelor's degree	1,100	+/-222	16.3%	+/-3.2
Graduate or professional degree	620	+/-179	9.2%	+/-2.6
Percent high school graduate or higher	(X)	(X)	92.7%	+/-2.3
Percent bachelor's degree or higher	(X)	(X)	25.5%	+/-4.2
VETERAN STATUS				
Civilian population 18 years and over	7,476	+/-248	7,476	(X)
Civilian veterans	878	+/-160	11.7%	+/-2.1

Total Households	(X)	(X)	(X)	(X)
With a computer	(X)	(X)	(X)	(X)
With a broadband Internet subscription	(X)	(X)	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes

when using multi-year data containing data from 2013.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2010-2014 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2010-2014 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Workers include members of the Armed Forces and civilians who were at work last week.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2010-2014 tables, industry data in the multiyear files (2010-2014) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at <http://www.census.gov/people/io/methodology/>.

Logical coverage edits applying a rules-based assignment of Medicaid, Medicare and military health coverage were added as of 2009 -- please see http://www.census.gov/hhes/www/hlthins/publications/coverage_edits_final.pdf for more details. The corresponding 2008 data table in American FactFinder does not incorporate these edits and is therefore not comparable to this table in 2009, 2010, 2011, or 2012. Select geographies of 2008 data comparable to the 2009, 2010, 2011, and 2012 tables are accessible at <http://www.census.gov/hhes/www/hlthins/data/acs/2008/re-run.html>.

The health insurance coverage category names were modified in 2010. See ACS Health Insurance Definitions for a list of the insurance type definitions.

While the 2010-2014 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2010-2014 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

35.0 percent or more	267	+/-105	19.9%	+/-7.7
Not computed	126	+/-91	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Households not paying cash rent are excluded from the calculation of median gross rent.

Telephone service data are not available for certain geographic areas due to problems with data collection. See Errata Note #93 for details.

While the 2010-2014 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2010-2014 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval

or upper interval of an open-ended distribution.

3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

DP05 ACS DEMOGRAPHIC AND HOUSING ESTIMATES

2010-2014 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Cody city, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Total housing units	4,318	+/-238	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2010-2014 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
