

DP02

SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2009-2013 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Cowley town, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
HOUSEHOLDS BY TYPE				
Total households	216	+/-39	216	(X)
Family households (families)	171	+/-36	79.2%	+/-8.2
With own children under 18 years	72	+/-23	33.3%	+/-9.9
Married-couple family	138	+/-34	63.9%	+/-10.5
With own children under 18 years	47	+/-17	21.8%	+/-7.9
Male householder, no wife present, family	12	+/-13	5.6%	+/-5.9
With own children under 18 years	12	+/-13	5.6%	+/-5.9
Female householder, no husband present, family	21	+/-15	9.7%	+/-6.5
With own children under 18 years	13	+/-13	6.0%	+/-5.9
Nonfamily households	45	+/-19	20.8%	+/-8.2
Householder living alone	37	+/-16	17.1%	+/-7.0
65 years and over	21	+/-10	9.7%	+/-4.6
Households with one or more people under 18 years	76	+/-23	35.2%	+/-9.8
Households with one or more people 65 years and over	56	+/-20	25.9%	+/-8.4
Average household size	3.00	+/-0.41	(X)	(X)
Average family size	3.33	+/-0.48	(X)	(X)
RELATIONSHIP				
Population in households	648	+/-139	648	(X)
Householder	216	+/-39	33.3%	+/-4.4
Spouse	141	+/-38	21.8%	+/-3.8
Child	243	+/-82	37.5%	+/-6.7
Other relatives	15	+/-13	2.3%	+/-2.0
Nonrelatives	33	+/-27	5.1%	+/-4.0
Unmarried partner	14	+/-14	2.2%	+/-2.2
MARITAL STATUS				
Males 15 years and over	245	+/-70	245	(X)
Never married	63	+/-36	25.7%	+/-10.4
Now married, except separated	149	+/-38	60.8%	+/-12.9
Separated	0	+/-11	0.0%	+/-11.5

Subject	Cowley town, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Widowed	2	+/-3	0.8%	+/-1.3
Divorced	31	+/-35	12.7%	+/-12.8
Females 15 years and over	250	+/-51	250	(X)
Never married	63	+/-36	25.2%	+/-11.2
Now married, except separated	133	+/-34	53.2%	+/-10.8
Separated	7	+/-11	2.8%	+/-4.3
Widowed	22	+/-12	8.8%	+/-5.1
Divorced	25	+/-15	10.0%	+/-6.2
FERTILITY				
Number of women 15 to 50 years old who had a birth in the past 12 months	9	+/-11	9	(X)
Unmarried women (widowed, divorced, and never married)	0	+/-11	0.0%	+/-95.0
Per 1,000 unmarried women	0	+/-336	(X)	(X)
Per 1,000 women 15 to 50 years old	69	+/-84	(X)	(X)
Per 1,000 women 15 to 19 years old	0	+/-520	(X)	(X)
Per 1,000 women 20 to 34 years old	180	+/-207	(X)	(X)
Per 1,000 women 35 to 50 years old	0	+/-399	(X)	(X)
GRANDPARENTS				
Number of grandparents living with own grandchildren under 18 years	10	+/-11	10	(X)
Responsible for grandchildren	6	+/-9	60.0%	+/-53.6
Years responsible for grandchildren				
Less than 1 year	4	+/-7	40.0%	+/-52.9
1 or 2 years	0	+/-11	0.0%	+/-90.1
3 or 4 years	0	+/-11	0.0%	+/-90.1
5 or more years	2	+/-4	20.0%	+/-37.2
Number of grandparents responsible for own grandchildren under 18 years	6	+/-9	6	(X)
Who are female	4	+/-5	66.7%	+/-46.5
Who are married	4	+/-7	66.7%	+/-63.0
SCHOOL ENROLLMENT				
Population 3 years and over enrolled in school	230	+/-85	230	(X)
Nursery school, preschool	9	+/-9	3.9%	+/-3.9
Kindergarten	22	+/-15	9.6%	+/-6.6
Elementary school (grades 1-8)	100	+/-57	43.5%	+/-13.8
High school (grades 9-12)	44	+/-21	19.1%	+/-10.0
College or graduate school	55	+/-37	23.9%	+/-11.7
EDUCATIONAL ATTAINMENT				
Population 25 years and over	402	+/-81	402	(X)
Less than 9th grade	4	+/-4	1.0%	+/-1.1
9th to 12th grade, no diploma	31	+/-24	7.7%	+/-5.8
High school graduate (includes equivalency)	107	+/-33	26.6%	+/-6.7
Some college, no degree	144	+/-51	35.8%	+/-8.5
Associate's degree	43	+/-21	10.7%	+/-4.6
Bachelor's degree	55	+/-22	13.7%	+/-5.4
Graduate or professional degree	18	+/-11	4.5%	+/-2.9

With a broadband Internet subscription	(X)	(X)	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes

when using multi-year data containing data from 2013.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2009-2013 5-Year American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

DP03 | SELECTED ECONOMIC CHARACTERISTICS

2009-2013 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Unrelated individuals 15 years and over	(X)	(X)	21.8%	+/-19.3

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Census occupation codes are 4-digit codes and are based on the Standard Occupational Classification (SOC). The Census occupation codes for 2010 and later years are based on the 2010 revision of the SOC. To allow for the creation of 2009-2013 tables, occupation data in the multiyear files (2009-2013) were recoded to 2013 Census occupation codes. We recommend using caution when comparing data coded using 2013 Census occupation codes with data coded using Census occupation codes prior to 2010. For more information on the Census occupation code changes, please visit our website at <http://www.census.gov/people/io/methodology/>.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2009-2013 and 2011-2013 tables, industry data in the multiyear files (2009-2013 and 2011-2013) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at <http://www.census.gov/people/io/methodology/>.

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2009-2013 5-Year American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

30.0 to 34.9 percent	0	+/-11	0.0%	+/-33.6
35.0 percent or more	3	+/-4	4.3%	+/-6.2
Not computed	4	+/-5	(X)	(X)
GROSS RENT				
Occupied units paying rent	27	+/-17	27	(X)
Less than \$200	0	+/-11	0.0%	+/-54.8
\$200 to \$299	0	+/-11	0.0%	+/-54.8
\$300 to \$499	4	+/-4	14.8%	+/-20.0
\$500 to \$749	20	+/-16	74.1%	+/-26.3
\$750 to \$999	0	+/-11	0.0%	+/-54.8
\$1,000 to \$1,499	3	+/-4	11.1%	+/-16.1
\$1,500 or more	0	+/-11	0.0%	+/-54.8
Median (dollars)	613	+/-190	(X)	(X)
No rent paid	5	+/-7	(X)	(X)
GROSS RENT AS A PERCENTAGE OF HOUSEHOLD INCOME (GRAPI)				
Occupied units paying rent (excluding units where GRAPI cannot be computed)	27	+/-17	27	(X)
Less than 15.0 percent	9	+/-7	33.3%	+/-28.3
15.0 to 19.9 percent	0	+/-11	0.0%	+/-54.8
20.0 to 24.9 percent	3	+/-4	11.1%	+/-16.1
25.0 to 29.9 percent	0	+/-11	0.0%	+/-54.8
30.0 to 34.9 percent	9	+/-11	33.3%	+/-35.7
35.0 percent or more	6	+/-10	22.2%	+/-34.0
Not computed	5	+/-7	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household Income are valid values.

Median calculations for base table sourcing VAL, MHC, SMOC, and TAX should exclude zero values.

The 2007, 2008, 2009, 2010, 2011, 2012, and 2013 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

Telephone service data are not available for certain geographic areas due to problems with data collection. See Errata Note #93 for details.

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2009-2013 5-Year American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

DP05

ACS DEMOGRAPHIC AND HOUSING ESTIMATES

2009-2013 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

HISPANIC OR LATINO AND RACE				
Total population	648	+/-139	648	(X)
Hispanic or Latino (of any race)	16	+/-15	2.5%	+/-2.2
Mexican	16	+/-15	2.5%	+/-2.2
Puerto Rican	0	+/-11	0.0%	+/-4.5
Cuban	0	+/-11	0.0%	+/-4.5
Other Hispanic or Latino	0	+/-11	0.0%	+/-4.5
Not Hispanic or Latino	632	+/-136	97.5%	+/-2.2
White alone	629	+/-137	97.1%	+/-2.3
Black or African American alone	0	+/-11	0.0%	+/-4.5
American Indian and Alaska Native alone	3	+/-5	0.5%	+/-0.8
Asian alone	0	+/-11	0.0%	+/-4.5
Native Hawaiian and Other Pacific Islander alone	0	+/-11	0.0%	+/-4.5
Some other race alone	0	+/-11	0.0%	+/-4.5
Two or more races	0	+/-11	0.0%	+/-4.5
Two races including Some other race	0	+/-11	0.0%	+/-4.5
Two races excluding Some other race, and Three or more races	0	+/-11	0.0%	+/-4.5

Subject	Cowley town, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Total housing units	252	+/-45	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological differences in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see http://www.census.gov/acs/www/methodology/questionnaire_changes/. For more information about changes in the estimates see <http://www.census.gov/population/hispanic/files/acs08researchnote.pdf>.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
