Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data).

The effect of nonsampling error is not represented in these tables.

Ancestry listed in this table refers to the total number of people who responded with a particular ancestry; for example, the estimate given for Russian represents the number of people who listed Russian as either their first or second ancestry. This table lists only the largest ancestry groups; see the Detailed Tables for more categories. Race and Hispanic origin groups are not included in this table because official data for those groups come from the Race and Hispanic origin questions rather than the ancestry question (see Demographic Table).

Data for year of entry of the native population reflect the year of entry into the U.S. by people who were born in Puerto Rico, U.S. Island Areas or born outside the U.S. to a U.S. citizen parent and who subsequently moved to the U.S.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes when using multi-year data containing data from 2013. For more information, see: Language User Note.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2011-2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2011-2015 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
 An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to Labor Force Guidance.

Workers include members of the Armed Forces and civilians who were at work last week.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2011-2015 tables, industry data in the multiyear files (2011-2015) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at https://www.census.gov/people/io/methodology/.

Logical coverage edits applying a rules-based assignment of Medicaid, Medicare and military health coverage were added as of 2009 -- please see https://www.census.gov/library/working-papers/2010/demo/coverage_edits_final.html for more details. The 2008 data table in American FactFinder does not incorporate these edits. Therefore, the estimates that appear in these tables are not comparable to the estimates in the 2009 and later tables. Select geographies of 2008 data comparable to the 2009 and later tables are available at https://www.census.gov/data/tables/time-series/acs/1-year-re-run-health-insurance.html. The health insurance coverage category names were modified in 2010. See https://www.census.gov/topics/health/health-insurance/about/glossary.html#par_textimage_18 for a list of the insurance type definitions.

While the 2011-2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2011-2015 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

2011-2015 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Tell us what you think. Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

A processing error was found in the Year Structure Built estimates since data year 2008. For more information, please see the errata note #110.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Households not paying cash rent are excluded from the calculation of median gross rent.

Telephone service data are not available for certain geographic areas due to problems with data collection. See Errata Note #93 for details.

While the 2011-2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
 An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

ACS DEMOGRAPHIC AND HOUSING ESTIMATES

2011-2015 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Tell us what you think. Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Evanston city, Wyoming				
	Estimate	Margin of Error	Percent	Percent Margin of Error	
EX AND AGE					
Total population	12,213	+/-19	12,213	(X)	
Male	6,163	+/-195	50.5%	+/-1.6	
Female	6,050	+/-194	49.5%	+/-1.6	
Under 5 years	988	+/-207	8.1%	+/-1.7	
5 to 9 years	1,030	+/-195	8.4%	+/-1.6	
10 to 14 years	1,192	+/-253	9.8%	+/-2.1	
15 to 19 years	708	+/-109	5.8%	+/-0.9	
20 to 24 years	884	+/-179	7.2%	+/-1.5	
25 to 34 years	1,743	+/-197	14.3%	+/-1.6	
35 to 44 years	1,699	+/-260	13.9%	+/-2.1	
45 to 54 years	1,217	+/-210	10.0%	+/-1.7	
55 to 59 years	1,013	+/-181	8.3%	+/-1.5	
60 to 64 years	599	+/-136	4.9%	+/-1.1	
65 to 74 years	637	+/-143	5.2%	+/-1.2	
75 to 84 years	319	+/-84	2.6%	+/-0.7	
85 years and over	184	+/-64	1.5%	+/-0.5	
Median age (years)	33.0	+/-1.2	(X)	(X)	
18 years and over	8,518	+/-204	69.7%	+/-1.7	
21 years and over	8,239	+/-207	67.5%	+/-1.7	
62 years and over	1,549	+/-221	12.7%	+/-1.8	
65 years and over	1,140	+/-165	9.3%	+/-1.4	
18 years and over	8,518	+/-204	8,518	(X)	
Male	4,044	+/-185	47.5%	+/-1.7	
Female	4,474	+/-174	52.5%	+/-1.7	
65 years and over	1,140	+/-165	1,140	(X)	
Male	570	+/-120	50.0%	+/-7.0	

Subject	Evanston city, Wyoming				
	Estimate	Margin of Error	Percent	Percent Margin of Error	
Female	570	+/-109	50.0%		
RACE					
Total population	40.040		40.040	()()	
One race	12,213	+/-19	12,213	(X)	
Two or more races	11,634	+/-239	95.3%		
Two of more faces	579	+/-241	4.7%	+/-2.0	
One race	11,634	+/-239	95.3%	+/-2.0	
White	11,210	+/-359	91.8%	+/-2.9	
Black or African American	25	+/-36	0.2%	+/-0.3	
American Indian and Alaska Native	75	+/-69	0.6%	+/-0.6	
Cherokee tribal grouping	0	+/-18	0.0%	+/-0.2	
Chippewa tribal grouping	0	+/-18	0.0%	+/-0.2	
Navajo tribal grouping	0	+/-18	0.0%	+/-0.2	
Sioux tribal grouping	0	+/-18	0.0%	+/-0.2	
Asian	25	+/-29	0.2%	+/-0.2	
Asian Indian	0	+/-18	0.0%	+/-0.2	
Chinese	0	+/-18	0.0%	+/-0.2	
Filipino	9	+/-14	0.1%	+/-0.1	
Japanese	0	+/-18	0.0%	+/-0.2	
Korean	15	+/-25	0.1%	+/-0.2	
Vietnamese	0	+/-18	0.0%	+/-0.2	
Other Asian	1	+/-3	0.0%	+/-0.1	
Native Hawaiian and Other Pacific Islander	0	+/-18	0.0%	+/-0.2	
Native Hawaiian	0	+/-18	0.0%	+/-0.2	
Guamanian or Chamorro	0	+/-18	0.0%	+/-0.2	
Samoan	0	+/-18	0.0%	+/-0.2	
Other Pacific Islander	0	+/-18	0.0%	+/-0.2	
Some other race	299	+/-325	2.4%	+/-0.2	
Two or more races	579	+/-323	4.7%	+/-2.0	
White and Black or African American	11	+/-241	0.1%		
White and American Indian and Alaska Native	369	+/-19	3.0%	+/-0.2	
White and Asian	0	+/-00	0.0%	+/-0.7	
Black or African American and American Indian and Alaska Native	0	+/-18	0.0%	+/-0.2	
Race alone or in combination with one or more other races					
Total population	12,213	+/-19	12,213	(X)	
White	11,789	+/-343	96.5%	+/-2.8	
Black or African American	46	+/-44	0.4%	+/-0.4	
American Indian and Alaska Native	626	+/-259	5.1%	+/-2.1	
Asian	42	+/-41	0.3%	+/-0.3	
Native Hawaiian and Other Pacific Islander	189	+/-228	1.5%	+/-1.9	
Some other race	299	+/-325	2.4%		
HISPANIC OR LATINO AND RACE					
Total population	12,213	+/-19	12,213	(X)	
Hispanic or Latino (of any race)	1,516	+/-19	12,213		
Mexican	1,023	+/-1/7	8.4%		
Puerto Rican	1,023	+/-319	1.4%		
Cuban	0	+/-225	0.0%		
Other Hispanic or Latino					
Not Hispanic or Latino	321	+/-302	2.6%		
White alone	10,697	+/-176	87.6%		
Black or African American alone	10,175	+/-179	83.3%		
	25	+/-36	0.2%		
American Indian and Alaska Native alone	75	+/-69	0.6%		
Asian alone	25	+/-29	0.2%		
Native Hawaiian and Other Pacific Islander alone	0	+/-18	0.0%	+/-0.2	

Subject	Evanston city, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Some other race alone	0	+/-18	0.0%	+/-0.2
Two or more races	397	+/-74	3.3%	+/-0.6
Two races including Some other race	0	+/-18	0.0%	+/-0.2
Two races excluding Some other race, and Three or more races	397	+/-74	3.3%	+/-0.6
Total housing units	1.055	/ 000		
	4,955	+/-203	(X)	(X)
CITIZEN, VOTING AGE POPULATION				
Citizen, 18 and over population	8,174	+/-274	8,174	(X)
Male	3,829	+/-209	46.8%	+/-1.9
Female	4,345	+/-200	53.2%	+/-1.9

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2011-2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
 An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of

sample cases is too small.
