SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2008-2012 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Glenrock town, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
<b>HOUSEHOLDS BY TYPE</b>				
Total households	976	+/-96	976	(X)
Family households (families)	720	+/-74	73.8%	+/-6.5
With own children under 18 years	319	+/-59	32.7%	+/-6.5
Married-couple family	580	+/-76	59.4%	+/-7.6
With own children under 18 years	213	+/-55	21.8%	+/-6.2
Male householder, no wife present, family	45	+/-33	4.6%	+/-3.3
With own children under 18 years	25	+/-23	2.6%	+/-2.3
Female householder, no husband present, family	95	+/-37	9.7%	+/-3.6
With own children under 18 years	81	+/-33	8.3%	+/-3.3
Nonfamily households	256	+/-77	26.2%	+/-6.5
Householder living alone	220	+/-71	22.5%	+/-6.1
65 years and over	82	+/-41	8.4%	+/-3.9
Households with one or more people under 18 years	395	+/-61	40.5%	+/-7.0
Households with one or more people 65 years and over	236	+/-66	24.2%	+/-5.7
Average household size	2.61	+/-0.26	(X)	(X)
Average family size	2.99	+/-0.29	(X)	(X)
<b>RELATIONSHIP</b>				
Population in households	2,547	+/-41	2,547	(X)
Householder	976	+/-96	38.3%	+/-3.7
Spouse	621	+/-78	24.4%	+/-3.1
Child	697	+/-121	27.4%	+/-4.7
Other relatives	114	+/-52	4.5%	+/-2.0
Nonrelatives	139	+/-88	5.5%	+/-3.4
Unmarried partner	70	+/-43	2.7%	+/-1.7
<b>MARITAL STATUS</b>				
Males 15 years and over	1,086	+/-107	1,086	(X)
Never married	292	+/-102	26.9%	+/-8.0
Now married, except separated	640	+/-71	58.9%	+/-7.7
Separated	5	+/-9	0.5%	+/-0.8
Widowed	33	+/-32	3.0%	+/-2.8

Subject	Glenrock town, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Divorced	116	+/-67	10.7%	+/-5.8
Females 15 years and over	956	+/-68	956	(X)
Never married	165	+/-57	17.3%	+/-5.7
Now married, except separated	609	+/-76	63.7%	+/-6.8
Separated	28	+/-30	2.9%	+/-3.1
Widowed	44	+/-26	4.6%	+/-2.7
Divorced	110	+/-43	11.5%	+/-4.5
<b>FERTILITY</b>				
Number of women 15 to 50 years old who had a birth in the past 12 months	79	+/-44	79	(X)
Unmarried women (widowed, divorced, and never married)	52	+/-39	65.8%	+/-34.4
Per 1,000 unmarried women	227	+/-158	(X)	(X)
Per 1,000 women 15 to 50 years old	139	+/-72	(X)	(X)
Per 1,000 women 15 to 19 years old	54	+/-111	(X)	(X)
Per 1,000 women 20 to 34 years old	205	+/-127	(X)	(X)
Per 1,000 women 35 to 50 years old	68	+/-101	(X)	(X)
<b>GRANDPARENTS</b>				
Number of grandparents living with own grandchildren under 18 years	143	+/-63	143	(X)
Responsible for grandchildren	121	+/-71	84.6%	+/-23.2
Years responsible for grandchildren				
Less than 1 year	72	+/-64	50.3%	+/-36.1
1 or 2 years	0	+/-12	0.0%	+/-20.2
3 or 4 years	33	+/-40	23.1%	+/-25.2
5 or more years	16	+/-19	11.2%	+/-13.4
Number of grandparents responsible for own grandchildren under 18 years	121	+/-71	121	(X)
Who are female	57	+/-35	47.1%	+/-6.5
Who are married	115	+/-71	95.0%	+/-8.6
<b>SCHOOL ENROLLMENT</b>				
Population 3 years and over enrolled in school	631	+/-124	631	(X)
Nursery school, preschool	54	+/-34	8.6%	+/-5.5
Kindergarten	30	+/-26	4.8%	+/-3.8
Elementary school (grades 1-8)	237	+/-68	37.6%	+/-7.7

West Indian (excluding Hispanic origin groups)	20	+/-31	0.8%	+/-1.2

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the

principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2008-2012 American Community Survey

Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2007. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2008-2012 American Community Survey

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

35.0 percent or more	23	+/-23	8.4%	+/-8.5
Not computed	41	+/-39	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household Income are valid values.

The 2007, 2008, 2009, 2010, 2011, and 2012 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

Median calculations for base table sourcing VAL, MHC, SMOC, and TAX should exclude zero values.

Telephone service data are not available for certain geographic areas due to problems with data collection. See Errata Note #93 for details.

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

DP05 ACS DEMOGRAPHIC AND HOUSING ESTIMATES

2008-2012 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Native Hawaiian	0	+/-12	0.0%	+/-1.3
Guamanian or Chamorro	0	+/-12	0.0%	+/-1.3
Samoan	0	+/-12	0.0%	+/-1.3
Other Pacific Islander	0	+/-12	0.0%	+/-1.3
Some other race	0	+/-12	0.0%	+/-1.3
Two or more races	56	+/-55	2.2%	+/-2.2
White and Black or African American	5	+/-9	0.2%	+/-0.4
White and American Indian and Alaska Native	50	+/-53	2.0%	+/-2.1
White and Asian	0	+/-12	0.0%	+/-1.3
Black or African American and American Indian and Alaska Native	0	+/-12	0.0%	+/-1.3
Race alone or in combination with one or more other races				
Total population	2,548	+/-39	2,548	(X)
White	2,502	+/-60	98.2%	+/-1.6
Black or African American	47	+/-43	1.8%	+/-1.7
American Indian and Alaska Native	53	+/-56	2.1%	+/-2.2
Asian	1	+/-3	0.0%	+/-0.1
Native Hawaiian and Other Pacific Islander	1	+/-3	0.0%	+/-0.1
Some other race	0	+/-12	0.0%	+/-1.3
HISPANIC OR LATINO AND RACE				
Total population	2,548	+/-39	2,548	(X)
Hispanic or Latino (of any race)	232	+/-135	9.1%	+/-5.2
Mexican	181	+/-111	7.1%	+/-4.3
Puerto Rican	0	+/-12	0.0%	+/-1.3
Cuban	36	+/-60	1.4%	+/-2.3
Other Hispanic or Latino	15	+/-18	0.6%	+/-0.7
Not Hispanic or Latino	2,316	+/-136	90.9%	+/-5.2
White alone	2,229	+/-145	87.5%	+/-5.6
Black or African American alone	28	+/-34	1.1%	+/-1.3
American Indian and Alaska Native alone	3	+/-5	0.1%	+/-0.2
Asian alone	0	+/-12	0.0%	+/-1.3
Native Hawaiian and Other Pacific Islander alone	0	+/-12	0.0%	+/-1.3
Some other race alone	0	+/-12	0.0%	+/-1.3
Two or more races	56	+/-55	2.2%	+/-2.2
Two races including Some other race	0	+/-12	0.0%	+/-1.3
Two races excluding Some other race, and Three or more races	56	+/-55	2.2%	+/-2.2

Subject	Glenrock town, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Total housing units	1,040	+/-100	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological differences in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see [http://www.census.gov/acs/www/methodology/questionnaire\\_changes/](http://www.census.gov/acs/www/methodology/questionnaire_changes/). For more information about changes in the estimates see <http://www.census.gov/population/hispanic/files/acs08researchnote.pdf>.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '- ' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+ ' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
