SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2010-2014 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Green River city, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
<b>HOUSEHOLDS BY TYPE</b>				
Total households	4,434	+/-181	4,434	(X)
Family households (families)	3,250	+/-177	73.3%	+/-4.4
With own children under 18 years	1,467	+/-140	33.1%	+/-3.6
Married-couple family	2,630	+/-208	59.3%	+/-4.7
With own children under 18 years	1,096	+/-135	24.7%	+/-3.3
Male householder, no wife present, family	247	+/-104	5.6%	+/-2.4
With own children under 18 years	136	+/-75	3.1%	+/-1.7
Female householder, no husband present, family	373	+/-104	8.4%	+/-2.4
With own children under 18 years	235	+/-100	5.3%	+/-2.3
Nonfamily households	1,184	+/-221	26.7%	+/-4.4
Householder living alone	922	+/-210	20.8%	+/-4.3
65 years and over	278	+/-85	6.3%	+/-1.8
Households with one or more people under 18 years	1,638	+/-139	36.9%	+/-3.7
Households with one or more people 65 years and over	742	+/-102	16.7%	+/-2.0
Average household size	2.82	+/-0.11	(X)	(X)
Average family size	3.28	+/-0.14	(X)	(X)
<b>RELATIONSHIP</b>				
Population in households	12,518	+/-54	12,518	(X)
Householder	4,434	+/-181	35.4%	+/-1.4
Spouse	2,667	+/-194	21.3%	+/-1.6
Child	4,222	+/-298	33.7%	+/-2.4
Other relatives	532	+/-190	4.2%	+/-1.5
Nonrelatives	663	+/-199	5.3%	+/-1.6
Unmarried partner	365	+/-134	2.9%	+/-1.1
<b>MARITAL STATUS</b>				
Males 15 years and over	5,116	+/-242	5,116	(X)
Never married	1,485	+/-252	29.0%	+/-4.1
Now married, except separated	2,760	+/-232	53.9%	+/-4.7
Separated	121	+/-79	2.4%	+/-1.6

Subject	Green River city, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Widowed	98	+/-63	1.9%	+/-1.2
Divorced	652	+/-158	12.7%	+/-3.1
Females 15 years and over	4,697	+/-223	4.697	(X)
Never married	935	+/-180	19.9%	+/-3.4
Now married, except separated	2,742	+/-208	58.4%	+/-5.2
Separated	182	+/-108	3.9%	+/-2.2
Widowed	236	+/-70	5.0%	+/-1.4
Divorced	602	+/-158	12.8%	+/-3.2
FERTILITY				
Number of women 15 to 50 years old who had a birth in the past 12 months	127	+/-61	127	(X)
Unmarried women (widowed, divorced, and never married)	10	+/-17	7.9%	+/-13.1
Per 1,000 unmarried women	8	+/-14	(X)	(X)
Per 1,000 women 15 to 50 years old	43	+/-21	(X)	(X)
Per 1,000 women 15 to 19 years old	0	+/-69	(X)	(X)
Per 1,000 women 20 to 34 years old	96	+/-46	(X)	(X)
Per 1,000 women 35 to 50 years old	5	+/-10	(X)	(X)
GRANDPARENTS				
Number of grandparents living with own grandchildren under 18 years	166	+/-84	166	(X)
Responsible for grandchildren	135	+/-71	81.3%	+/-18.0
Years responsible for grandchildren				
Less than 1 year	30	+/-36	18.1%	+/-18.9
1 or 2 years	73	+/-61	44.0%	+/-28.7
3 or 4 years	13	+/-19	7.8%	+/-11.9
5 or more years	19	+/-20	11.4%	+/-13.1
Number of grandparents responsible for own grandchildren under 18 years	135	+/-71	135	(X)
Who are female	86	+/-48	63.7%	+/-15.5
Who are married	88	+/-61	65.2%	+/-24.7
SCHOOL ENROLLMENT				
Population 3 years and over enrolled in school	3,389	+/-308	3,389	(X)
Nursery school, preschool	215	+/-79	6.3%	+/-2.3
Kindergarten	108	+/-50	3.2%	+/-1.5
Elementary school (grades 1-8)	1,622	+/-218	47.9%	+/-5.5
High school (grades 9-12)	891	+/-184	26.3%	+/-4.6
College or graduate school	553	+/-157	16.3%	+/-4.2
EDUCATIONAL ATTAINMENT				
Population 25 years and over	8,064	+/-257	8,064	(X)
Less than 9th grade	215	+/-93	2.7%	+/-1.2
9th to 12th grade, no diploma	474	+/-133	5.9%	+/-1.7
High school graduate (includes equivalency)	2,664	+/-296	33.0%	+/-3.5
Some college, no degree	2,422	+/-290	30.0%	+/-3.6
Associate's degree	752	+/-175	9.3%	+/-2.1
Bachelor's degree	1,261	+/-233	15.6%	+/-2.8
Graduate or professional degree	276	+/-94	3.4%	+/-1.2
Percent high school graduate or higher	(X)	(X)	91.5%	+/-2.2
Percent bachelor's degree or higher	(X)	(X)	19.1%	+/-3.1
VETERAN STATUS				
Civilian population 18 years and over	9,093	+/-230	9,093	(X)
Civilian veterans	1,025	+/-193	11.3%	+/-2.1

Subject	Green River city, Wyoming

With a computer	(X)	(X)	(X)	(X)
With a broadband Internet subscription	(X)	(X)	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes

when using multi-year data containing data from 2013.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2010-2014 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Workers include members of the Armed Forces and civilians who were at work last week.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2010-2014 tables, industry data in the multiyear files (2010-2014) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at <http://www.census.gov/people/io/methodology/>.

Logical coverage edits applying a rules-based assignment of Medicaid, Medicare and military health coverage were added as of 2009 -- please see [http://www.census.gov/hhes/www/hlthins/publications/coverage\\_edits\\_final.pdf](http://www.census.gov/hhes/www/hlthins/publications/coverage_edits_final.pdf) for more details. The corresponding 2008 data table in American FactFinder does not incorporate these edits and is therefore not comparable to this table in 2009, 2010, 2011, or 2012. Select geographies of 2008 data comparable to the 2009, 2010, 2011, and 2012 tables are accessible at <http://www.census.gov/hhes/www/hlthins/data/acs/2008/re-run.html>.

The health insurance coverage category names were modified in 2010. See ACS Health Insurance Definitions for a list of the insurance type definitions.

While the 2010-2014 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2010-2014 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Households not paying cash rent are excluded from the calculation of median gross rent.

Telephone service data are not available for certain geographic areas due to problems with data collection. See Errata Note #93 for details.

While the 2010-2014 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval

or upper interval of an open-ended distribution.

3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Subject	Green River city, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Total housing units	4,759	+/-199	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2010-2014 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
