

DP02

SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2008-2012 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Jackson town, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
HOUSEHOLDS BY TYPE				
Total households	3,328	+/-337	3,328	(X)
Family households (families)	1,880	+/-268	56.5%	+/-7.5
With own children under 18 years	1,090	+/-255	32.8%	+/-7.5
Married-couple family	1,485	+/-268	44.6%	+/-7.9
With own children under 18 years	784	+/-224	23.6%	+/-6.8
Male householder, no wife present, family	75	+/-76	2.3%	+/-2.2
With own children under 18 years	75	+/-76	2.3%	+/-2.2
Female householder, no husband present, family	320	+/-153	9.6%	+/-4.6
With own children under 18 years	231	+/-135	6.9%	+/-4.0
Nonfamily households	1,448	+/-323	43.5%	+/-7.5
Householder living alone	1,052	+/-294	31.6%	+/-7.3
65 years and over	136	+/-85	4.1%	+/-2.5
Households with one or more people under 18 years	1,100	+/-254	33.1%	+/-7.5
Households with one or more people 65 years and over	299	+/-114	9.0%	+/-3.2
Average household size	2.87	+/-0.30	(X)	(X)
Average family size	3.75	+/-0.48	(X)	(X)
RELATIONSHIP				
Population in households	9,541	+/-67	9,541	(X)
Householder	3,328	+/-337	34.9%	+/-3.6
Spouse	1,476	+/-276	15.5%	+/-2.9
Child	2,835	+/-371	29.7%	+/-3.9
Other relatives	863	+/-448	9.0%	+/-4.7
Nonrelatives	1,039	+/-421	10.9%	+/-4.4
Unmarried partner	423	+/-219	4.4%	+/-2.3
MARITAL STATUS				
Males 15 years and over	3,931	+/-371	3,931	(X)
Never married	2,055	+/-473	52.3%	+/-8.8
Now married, except separated	1,644	+/-296	41.8%	+/-8.6
Separated	1	+/-2	0.0%	+/-0.1
Widowed	53	+/-63	1.3%	+/-1.6

Subject	Jackson town, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Divorced	178	+/-110	4.5%	+/-2.8
Females 15 years and over	3,807	+/-298	3,807	(X)
Never married	1,376	+/-335	36.1%	+/-8.2
Now married, except separated	1,557	+/-301	40.9%	+/-7.9
Separated	276	+/-285	7.2%	+/-7.4
Widowed	275	+/-167	7.2%	+/-4.3
Divorced	323	+/-198	8.5%	+/-5.1
FERTILITY				
Number of women 15 to 50 years old who had a birth in the past 12 months	62	+/-79	62	(X)
Unmarried women (widowed, divorced, and never married)	42	+/-69	67.7%	+/-58.0
Per 1,000 unmarried women	29	+/-48	(X)	(X)
Per 1,000 women 15 to 50 years old	25	+/-31	(X)	(X)
Per 1,000 women 15 to 19 years old	0	+/-109	(X)	(X)
Per 1,000 women 20 to 34 years old	52	+/-67	(X)	(X)
Per 1,000 women 35 to 50 years old	0	+/-30	(X)	(X)
GRANDPARENTS				
Number of grandparents living with own grandchildren under 18 years	116	+/-162	116	(X)
Responsible for grandchildren	116	+/-162	100.0%	+/-24.1
Years responsible for grandchildren				
Less than 1 year	0	+/-17	0.0%	+/-24.1
1 or 2 years	0	+/-17	0.0%	+/-24.1
3 or 4 years	0	+/-17	0.0%	+/-24.1
5 or more years	116	+/-162	100.0%	+/-24.1
Number of grandparents responsible for own grandchildren under 18 years	116	+/-162	116	(X)
Who are female	116	+/-162	100.0%	+/-24.1
Who are married	0	+/-17	0.0%	+/-24.1
SCHOOL ENROLLMENT				
Population 3 years and over enrolled in school	2,050	+/-359	2,050	(X)
Nursery school, preschool	116	+/-111	5.7%	+/-5.4
Kindergarten	124	+/-123	6.0%	+/-5.5
Elementary school (grades 1-8)	1,021	+/-242	49.8%	+/-11.4
High school (grades 9-12)	531	+/-236	25.9%	+/-9.6
College or graduate school	258	+/-133	12.6%	+/-6.2
EDUCATIONAL ATTAINMENT				
Population 25 years and over	6,742	+/-331	6,742	(X)
Less than 9th grade	287	+/-241	4.3%	+/-3.6
9th to 12th grade, no diploma	138	+/-90	2.0%	+/-1.3
High school graduate (includes equivalency)	2,187	+/-473	32.4%	+/-6.8
Some college, no degree	1,134	+/-442	16.8%	+/-6.4
Associate's degree	351	+/-165	5.2%	+/-2.4
Bachelor's degree	1,869	+/-400	27.7%	+/-5.9
Graduate or professional degree	776	+/-230	11.5%	+/-3.4
Percent high school graduate or higher	(X)	(X)	93.7%	+/-3.7
Percent bachelor's degree or higher	(X)	(X)	39.2%	+/-6.9
VETERAN STATUS				
Civilian population 18 years and over	7,263	+/-272	7,263	(X)
Civilian veterans	401	+/-168	5.5%	+/-2.3

Subject	Jackson town, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
DISABILITY STATUS OF THE CIVILIAN NONINSTITUTIONALIZED POPULATION				
Total Civilian Noninstitutionalized Population	9,582	+/-40	9,582	(X)
With a disability	686	+/-232	7.2%	+/-2.4
Under 18 years	2,375	+/-267	2,375	(X)
With a disability	158	+/-146	6.7%	+/-6.1
18 to 64 years	6,782	+/-328	6,782	(X)
With a disability	467	+/-180	6.9%	+/-2.7
65 years and over	425	+/-180	425	(X)

West Indian (excluding Hispanic origin groups)	0	+/-17	0.0%	+/-0.3

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the

principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2008-2012 American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

DP03 | SELECTED ECONOMIC CHARACTERISTICS

2008-2012 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2007. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2008-2012 American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

\$1,500 or more	147	+/-102	8.1%	+/-5.7
Median (dollars)	1,020	+/-151	(X)	(X)
No rent paid	44	+/-57	(X)	(X)
GROSS RENT AS A PERCENTAGE OF HOUSEHOLD INCOME (GRAPI)				
Occupied units paying rent (excluding units where GRAPI cannot be computed)	1,821	+/-329	1,821	(X)
Less than 15.0 percent	205	+/-131	11.3%	+/-7.4
15.0 to 19.9 percent	249	+/-152	13.7%	+/-7.3
20.0 to 24.9 percent	254	+/-164	13.9%	+/-8.7
25.0 to 29.9 percent	274	+/-156	15.0%	+/-8.1
30.0 to 34.9 percent	203	+/-150	11.1%	+/-7.6
35.0 percent or more	636	+/-217	34.9%	+/-11.5
Not computed	44	+/-57	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household Income are valid values.

The 2007, 2008, 2009, 2010, 2011, and 2012 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

Median calculations for base table sourcing VAL, MHC, SMOC, and TAX should exclude zero values.

Telephone service data are not available for certain geographic areas due to problems with data collection. See Errata Note #93 for details.

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Total housing units	4,671	+/-317	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological differences in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see http://www.census.gov/acs/www/methodology/questionnaire_changes/. For more information about changes in the estimates see <http://www.census.gov/population/hispanic/files/acs08researchnote.pdf>.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '- ' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+ ' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
