SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2007-2011 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Mills town, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
<b>HOUSEHOLDS BY TYPE</b>				
Total households	1,635	+/-145	1,635	(X)
Family households (families)	858	+/-105	52.5%	+/-7.4
With own children under 18 years	364	+/-94	22.3%	+/-6.3
Married-couple family	486	+/-91	29.7%	+/-6.4
With own children under 18 years	134	+/-61	8.2%	+/-4.1
Male householder, no wife present, family	129	+/-70	7.9%	+/-4.3
With own children under 18 years	61	+/-51	3.7%	+/-3.1
Female householder, no husband present, family	243	+/-110	14.9%	+/-6.5
With own children under 18 years	169	+/-82	10.3%	+/-4.9
Nonfamily households	777	+/-167	47.5%	+/-7.4
Householder living alone	612	+/-148	37.4%	+/-7.0
65 years and over	139	+/-59	8.5%	+/-3.5
Households with one or more people under 18 years	415	+/-85	25.4%	+/-6.3
Households with one or more people 65 years and over	356	+/-85	21.8%	+/-4.6
Average household size	2.10	+/-0.19	(X)	(X)
Average family size	2.80	+/-0.30	(X)	(X)
<b>RELATIONSHIP</b>				
Population in households	3,437	+/-19	3,437	(X)
Householder	1,635	+/-145	47.6%	+/-4.2
Spouse	506	+/-92	14.7%	+/-2.7
Child	821	+/-164	23.9%	+/-4.8
Other relatives	215	+/-147	6.3%	+/-4.3
Nonrelatives	260	+/-87	7.6%	+/-2.5
Unmarried partner	163	+/-80	4.7%	+/-2.3
<b>MARITAL STATUS</b>				
Males 15 years and over	1,588	+/-142	1,588	(X)
Never married	583	+/-145	36.7%	+/-7.8
Now married, except separated	553	+/-109	34.8%	+/-7.6
Separated	18	+/-22	1.1%	+/-1.4
Widowed	101	+/-54	6.4%	+/-3.3

Subject	Mills town, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Divorced	333	+/-129	21.0%	+/-7.5
Females 15 years and over	1,249	+/-120	1,249	(X)
Never married	180	+/-97	14.4%	+/-7.4
Now married, except separated	506	+/-93	40.5%	+/-8.6
Separated	35	+/-36	2.8%	+/-2.8
Widowed	145	+/-77	11.6%	+/-5.9
Divorced	383	+/-126	30.7%	+/-8.7
<b>FERTILITY</b>				
Number of women 15 to 50 years old who had a birth in the past 12 months	30	+/-37	30	(X)
Unmarried women (widowed, divorced, and never married)	25	+/-36	83.3%	+/-43.9
Per 1,000 unmarried women	59	+/-81	(X)	(X)
Per 1,000 women 15 to 50 years old	39	+/-46	(X)	(X)
Per 1,000 women 15 to 19 years old	0	+/-360	(X)	(X)
Per 1,000 women 20 to 34 years old	17	+/-30	(X)	(X)
Per 1,000 women 35 to 50 years old	64	+/-91	(X)	(X)
<b>GRANDPARENTS</b>				
Number of grandparents living with own grandchildren under 18 years	66	+/-67	66	(X)
Responsible for grandchildren	35	+/-39	53.0%	+/-36.2
Years responsible for grandchildren				
Less than 1 year	0	+/-89	0.0%	+/-36.3
1 or 2 years	17	+/-28	25.8%	+/-49.0
3 or 4 years	18	+/-26	27.3%	+/-23.1
5 or more years	0	+/-89	0.0%	+/-36.3
Number of grandparents responsible for own grandchildren under 18 years	35	+/-39	35	(X)
Who are female	27	+/-30	77.1%	+/-30.2
Who are married	35	+/-39	100.0%	+/-50.1
<b>SCHOOL ENROLLMENT</b>				
Population 3 years and over enrolled in school	709	+/-122	709	(X)
Nursery school, preschool	72	+/-49	10.2%	+/-7.0
Kindergarten	50	+/-46	7.1%	+/-6.7
Elementary school (grades 1-8)	218	+/-107	30.7%	+/-14.4
High school (grades 9-12)	160	+/-92	22.6%	+/-12.2
College or graduate school	209	+/-111	29.5%	+/-13.9
<b>EDUCATIONAL ATTAINMENT</b>				
Population 25 years and over	2,457	+/-159	2,457	(X)
Less than 9th grade	54	+/-41	2.2%	+/-1.7
9th to 12th grade, no diploma	225	+/-100	9.2%	+/-3.9
High school graduate (includes equivalency)	1,002	+/-150	40.8%	+/-5.3
Some college, no degree	750	+/-157	30.5%	+/-6.3
Associate's degree	167	+/-78	6.8%	+/-3.2
Bachelor's degree	207	+/-104	8.4%	+/-4.3
Graduate or professional degree	52	+/-46	2.1%	+/-1.9
Percent high school graduate or higher	(X)	(X)	88.6%	+/-4.3
Percent bachelor's degree or higher	(X)	(X)	10.5%	+/-4.4
<b>VETERAN STATUS</b>				
Civilian population 18 years and over	2,722	+/-148	2,722	(X)
Civilian veterans	418	+/-109	15.4%	+/-4.0

Subject	Mills town, Wyoming

Welsh	11	+/-17	0.3%	+/-0.5
West Indian (excluding Hispanic origin groups)	6	+/-12	0.2%	+/-0.4

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2007-2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2007. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

Census occupation codes are 4-digit codes and are based on the Standard Occupational Classification (SOC). The Census occupation codes for 2010 and later years are based on the 2010 revision of the SOC. To allow for the creation of 2007-2011 and 2009-2011 tables, occupation data in the multiyear files (2007-2011 and 2009-2011) were recoded to 2011 Census occupation codes. We recommend using caution when comparing data coded using 2011 Census occupation codes with data coded using Census occupation codes prior to 2010. For more information on the Census occupation code changes, please visit our website at <http://www.census.gov/hhes/www/oiindex/>.

While the 2007-2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2007-2011 American Community Survey

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household income are valid values.

The 2007, 2008, 2009, 2010, and 2011 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

Median calculations for base table sourcing VAL, MHC, SMOC, and TAX should exclude zero values.

While the 2007-2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic

entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Cuban	0	+/-89	0.0%	+/-0.9
Other Hispanic or Latino	0	+/-89	0.0%	+/-0.9
Not Hispanic or Latino	3,225	+/-183	93.8%	+/-5.4
White alone	3,162	+/-186	92.0%	+/-5.5
Black or African American alone	14	+/-22	0.4%	+/-0.7
American Indian and Alaska Native alone	33	+/-31	1.0%	+/-0.9
Asian alone	10	+/-16	0.3%	+/-0.5
Native Hawaiian and Other Pacific Islander alone	0	+/-89	0.0%	+/-0.9
Some other race alone	0	+/-89	0.0%	+/-0.9
Two or more races	6	+/-12	0.2%	+/-0.4
Two races including Some other race	0	+/-89	0.0%	+/-0.9
Two races excluding Some other race, and Three or more races	6	+/-12	0.2%	+/-0.4

Subject	Mills town, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Total housing units	1,707	+/-149	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological differences in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see [http://www.census.gov/acs/www/methodology/questionnaire\\_changes/](http://www.census.gov/acs/www/methodology/questionnaire_changes/). For more information about changes in the estimates see <http://www.census.gov/population/www/socdemo/hispanic/reports.html>.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2007-2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '- ' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+ ' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
