Total households	(X)	(X)	(X)	(X)
With a computer	(X)	(X)	(X)	(X)
With a broadband Internet subscription	(X)	(X)	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data).

The effect of nonsampling error is not represented in these tables.

Ancestry listed in this table refers to the total number of people who responded with a particular ancestry; for example, the estimate given for Russian represents the number of people who listed Russian as either their first or second ancestry. This table lists only the largest ancestry groups; see the Detailed Tables for more categories. Race and Hispanic origin groups are not included in this table because official data for those groups come from the Race and Hispanic origin questions rather than the ancestry question (see Demographic Table).

Data for year of entry of the native population reflect the year of entry into the U.S. by people who were born in Puerto Rico, U.S. Island Areas or born outside the U.S. to a U.S. citizen parent and who subsequently moved to the U.S.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes when using 2013 data or multi-year data containing data from 2013. For more information, see: Language User Note.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2012-2016 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2012-2016 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to Labor Force Guidance.

Workers include members of the Armed Forces and civilians who were at work last week.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2012-2016 tables, industry data in the multiyear files (2012-2016) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at <https://www.census.gov/people/io/methodology/>.

Logical coverage edits applying a rules-based assignment of Medicaid, Medicare and military health coverage were added as of 2009 -- please see https://www.census.gov/library/working-papers/2010/demo/coverage_edits_final.html for more details. The 2008 data table in American FactFinder does not incorporate these edits. Therefore, the estimates that appear in these tables are not comparable to the estimates in the 2009 and later tables. Select geographies of 2008 data comparable to the 2009 and later tables are available at <https://www.census.gov/data/time-series/acs/1-year-re-run-health-insurance.html>. The health insurance coverage category names were modified in 2010. See https://www.census.gov/topics/health/health-insurance/about/glossary.html#par_textimage_18 for a list of the insurance type definitions.

While the 2012-2016 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2012-2016 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-l' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+u' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

SELECTED HOUSING CHARACTERISTICS

2012-2016 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Tell us what you think. Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

A processing error was found in the Year Structure Built estimates since data year 2008. For more information, please see the errata note #110.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Households not paying cash rent are excluded from the calculation of median gross rent.

Telephone service data are not available for certain geographic areas due to problems with data collection of this question that occurred in 2015 and 2016. Both ACS 1-year and ACS 5-year files were affected. It may take several years in the ACS 5-year files until the estimates are available for the geographic areas affected.

While the 2012-2016 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census

2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

ACS DEMOGRAPHIC AND HOUSING ESTIMATES

2012-2016 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Tell us what you think. Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Rock Springs city, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
SEX AND AGE				
Total population	23,967	+/-33	23,967	(X)
Male	12,711	+/-374	53.0%	+/-1.6
Female	11,256	+/-373	47.0%	+/-1.6
Under 5 years	2,097	+/-230	8.7%	+/-1.0
5 to 9 years	1,962	+/-310	8.2%	+/-1.3
10 to 14 years	2,123	+/-375	8.9%	+/-1.6
15 to 19 years	1,306	+/-191	5.4%	+/-0.8
20 to 24 years	1,632	+/-281	6.8%	+/-1.2
25 to 34 years	4,186	+/-332	17.5%	+/-1.4
35 to 44 years	3,218	+/-267	13.4%	+/-1.1
45 to 54 years	2,708	+/-331	11.3%	+/-1.4
55 to 59 years	1,521	+/-243	6.3%	+/-1.0
60 to 64 years	1,180	+/-182	4.9%	+/-0.8
65 to 74 years	1,151	+/-140	4.8%	+/-0.6
75 to 84 years	690	+/-132	2.9%	+/-0.6
85 years and over	193	+/-94	0.8%	+/-0.4
Median age (years)	32.2	+/-1.0	(X)	(X)
18 years and over	17,091	+/-419	71.3%	+/-1.7
21 years and over	16,175	+/-474	67.5%	+/-2.0
62 years and over	2,678	+/-250	11.2%	+/-1.0
65 years and over	2,034	+/-194	8.5%	+/-0.8
18 years and over	17,091	+/-419	17,091	(X)
Male	9,042	+/-355	52.9%	+/-1.4
Female	8,049	+/-290	47.1%	+/-1.4
65 years and over	2,034	+/-194	2,034	(X)
Male	917	+/-108	45.1%	+/-2.9

Subject	Rock Springs city, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Female	1,117	+/-119	54.9%	+/-2.9
RACE				
Total population	23,967	+/-33	23,967	(X)
One race	22,812	+/-385	95.2%	+/-1.6
Two or more races	1,155	+/-385	4.8%	+/-1.6
One race	22,812	+/-385	95.2%	+/-1.6
White	21,681	+/-354	90.5%	+/-1.5
Black or African American	304	+/-238	1.3%	+/-1.0
American Indian and Alaska Native	153	+/-132	0.6%	+/-0.5
Cherokee tribal grouping	0	+/-21	0.0%	+/-0.1
Chippewa tribal grouping	0	+/-21	0.0%	+/-0.1
Navajo tribal grouping	18	+/-18	0.1%	+/-0.1
Sioux tribal grouping	0	+/-21	0.0%	+/-0.1
Asian	144	+/-99	0.6%	+/-0.4
Asian Indian	0	+/-21	0.0%	+/-0.1
Chinese	0	+/-21	0.0%	+/-0.1
Filipino	61	+/-66	0.3%	+/-0.3
Japanese	33	+/-41	0.1%	+/-0.2
Korean	6	+/-9	0.0%	+/-0.1
Vietnamese	0	+/-21	0.0%	+/-0.1
Other Asian	44	+/-57	0.2%	+/-0.2
Native Hawaiian and Other Pacific Islander	137	+/-207	0.6%	+/-0.9
Native Hawaiian	0	+/-21	0.0%	+/-0.1
Guamanian or Chamorro	0	+/-21	0.0%	+/-0.1
Samoa	137	+/-207	0.6%	+/-0.9
Other Pacific Islander	0	+/-21	0.0%	+/-0.1
Some other race	393	+/-158	1.6%	+/-0.7
Two or more races	1,155	+/-385	4.8%	+/-1.6
White and Black or African American	228	+/-245	1.0%	+/-1.0
White and American Indian and Alaska Native	621	+/-285	2.6%	+/-1.2
White and Asian	210	+/-141	0.9%	+/-0.6
Black or African American and American Indian and Alaska Native	0	+/-21	0.0%	+/-0.1
Race alone or in combination with one or more other races				
Total population	23,967	+/-33	23,967	(X)
White	22,827	+/-344	95.2%	+/-1.4
Black or African American	532	+/-224	2.2%	+/-0.9
American Indian and Alaska Native	844	+/-259	3.5%	+/-1.1
Asian	415	+/-159	1.7%	+/-0.7
Native Hawaiian and Other Pacific Islander	140	+/-208	0.6%	+/-0.9
Some other race	425	+/-166	1.8%	+/-0.7
HISPANIC OR LATINO AND RACE				
Total population	23,967	+/-33	23,967	(X)
Hispanic or Latino (of any race)	3,855	+/-387	16.1%	+/-1.6
Mexican	2,906	+/-435	12.1%	+/-1.8
Puerto Rican	11	+/-14	0.0%	+/-0.1
Cuban	87	+/-113	0.4%	+/-0.5
Other Hispanic or Latino	851	+/-296	3.6%	+/-1.2
Not Hispanic or Latino	20,112	+/-390	83.9%	+/-1.6
White alone	18,599	+/-421	77.6%	+/-1.8
Black or African American alone	287	+/-238	1.2%	+/-1.0
American Indian and Alaska Native alone	146	+/-131	0.6%	+/-0.5
Asian alone	144	+/-99	0.6%	+/-0.4
Native Hawaiian and Other Pacific Islander alone	137	+/-207	0.6%	+/-0.9

Subject	Rock Springs city, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Some other race alone	12	+/-20	0.1%	+/-0.1
Two or more races	787	+/-315	3.3%	+/-1.3
Two races including Some other race	0	+/-21	0.0%	+/-0.1
Two races excluding Some other race, and Three or more races	787	+/-315	3.3%	+/-1.3
Total housing units	10,240	+/-356	(X)	(X)
CITIZEN, VOTING AGE POPULATION				
Citizen, 18 and over population	16,107	+/-468	16,107	(X)
Male	8,462	+/-384	52.5%	+/-1.5
Female	7,645	+/-284	47.5%	+/-1.5

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2012-2016 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
