## SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2006-2010 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns. For 2006 to 2009, the Population Estimates Program provides intercensal estimates of the population for the nation, states, and counties.

Subject	Riverton city, Wyoming			
	Estimate	Estimate Margin of Error	Percent	Percent Margin of Error
<b>HOUSEHOLDS BY TYPE</b>				
Total households	4,516	+/-221	4,516	(X)
Family households (families)	2,734	+/-202	60.5%	+/-5.0
With own children under 18 years	1,435	+/-179	31.8%	+/-4.3
Married-couple family	2,036	+/-233	45.1%	+/-5.8
With own children under 18 years	924	+/-176	20.5%	+/-4.3
Male householder, no wife present, family	178	+/-94	3.9%	+/-2.1
With own children under 18 years	138	+/-87	3.1%	+/-1.9
Female householder, no husband present, family	520	+/-196	11.5%	+/-4.2
With own children under 18 years	373	+/-186	8.3%	+/-4.0
Nonfamily households	1,782	+/-279	39.5%	+/-5.0
Householder living alone	1,547	+/-257	34.3%	+/-4.6
65 years and over	586	+/-126	13.0%	+/-2.6
Households with one or more people under 18 years	1,486	+/-180	32.9%	+/-4.4
Households with one or more people 65 years and over	1,140	+/-161	25.2%	+/-3.2
Average household size	2.23	+/-0.11	(X)	(X)
Average family size	2.83	+/-0.16	(X)	(X)
<b>RELATIONSHIP</b>				
Population in households	10,074	+/-121	10,074	(X)
Householder	4,516	+/-221	44.8%	+/-2.2
Spouse	2,094	+/-237	20.8%	+/-2.3
Child	2,632	+/-227	26.1%	+/-2.2
Other relatives	278	+/-139	2.8%	+/-1.4
Nonrelatives	554	+/-206	5.5%	+/-2.0
Unmarried partner	329	+/-143	3.3%	+/-1.4
<b>MARITAL STATUS</b>				
Males 15 years and over	3,819	+/-234	3,819	(X)
Never married	1,010	+/-185	26.4%	+/-4.1
Now married, except separated	2,157	+/-225	56.5%	+/-6.0
Separated	45	+/-50	1.2%	+/-1.3
Widowed	113	+/-60	3.0%	+/-1.6
Divorced	494	+/-152	12.9%	+/-3.8
Females 15 years and over	4,267	+/-220	4,267	(X)

Subject	Riverton city, Wyoming			
	Estimate	Estimate Margin of Error	Percent	Percent Margin of Error
Never married	815	+/-198	19.1%	+/-4.3
Now married, except separated	2,155	+/-238	50.5%	+/-5.7
Separated	70	+/-64	1.6%	+/-1.5
Widowed	499	+/-133	11.7%	+/-3.1
Divorced	728	+/-212	17.1%	+/-4.7
<b>FERTILITY</b>				
Number of women 15 to 50 years old who had a birth in the past 12 months	271	+/-125	271	(X)
Unmarried women (widowed, divorced, and never married)	83	+/-76	30.6%	+/-23.5
Per 1,000 unmarried women	78	+/-63	(X)	(X)
Per 1,000 women 15 to 50 years old	115	+/-51	(X)	(X)
Per 1,000 women 15 to 19 years old	214	+/-218	(X)	(X)
Per 1,000 women 20 to 34 years old	184	+/-97	(X)	(X)
Per 1,000 women 35 to 50 years old	7	+/-14	(X)	(X)
<b>GRANDPARENTS</b>				
Number of grandparents living with own grandchildren under 18 years	63	+/-54	63	(X)
Responsible for grandchildren	13	+/-20	20.6%	+/-32.8
Years responsible for grandchildren				
Less than 1 year	13	+/-20	20.6%	+/-32.8
1 or 2 years	0	+/-119	0.0%	+/-37.3
3 or 4 years	0	+/-119	0.0%	+/-37.3
5 or more years	0	+/-119	0.0%	+/-37.3
Number of grandparents responsible for own grandchildren under 18 years	13	+/-20	13	(X)
Who are female	13	+/-20	100.0%	+/-82.2
Who are married	0	+/-119	0.0%	+/-82.3
<b>SCHOOL ENROLLMENT</b>				
Population 3 years and over enrolled in school	2,624	+/-327	2,624	(X)
Nursery school, preschool	203	+/-119	7.7%	+/-4.8
Kindergarten	159	+/-103	6.1%	+/-3.8
Elementary school (grades 1-8)	1,068	+/-288	40.7%	+/-9.2
High school (grades 9-12)	363	+/-130	13.8%	+/-4.9
College or graduate school	831	+/-216	31.7%	+/-7.0
<b>EDUCATIONAL ATTAINMENT</b>				
Population 25 years and over	6,801	+/-305	6,801	(X)
Less than 9th grade	354	+/-196	5.2%	+/-2.8
9th to 12th grade, no diploma	420	+/-143	6.2%	+/-2.0
High school graduate (includes equivalency)	1,714	+/-232	25.2%	+/-3.4
Some college, no degree	2,019	+/-290	29.7%	+/-4.0
Associate's degree	804	+/-202	11.8%	+/-3.0
Bachelor's degree	884	+/-195	13.0%	+/-2.8
Graduate or professional degree	606	+/-184	8.9%	+/-2.6
Percent high school graduate or higher	(X)	(X)	88.6%	+/-3.5
Percent bachelor's degree or higher	(X)	(X)	21.9%	+/-3.2
<b>VETERAN STATUS</b>				
Civilian population 18 years and over	7,810	+/-283	7,810	(X)
Civilian veterans	887	+/-159	11.4%	+/-2.0
<b>DISABILITY STATUS OF THE CIVILIAN NONINSTITUTIONALIZED POPULATION</b>

Welsh	48	+/-46	0.5%	+/-0.4
West Indian (excluding Hispanic origin groups)	37	+/-33	0.4%	+/-0.3

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2006-2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2006-2010 American Community Survey

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Unrelated individuals 15 years and over	(X)	(X)	22.4%	+/-5.8

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2007. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

Occupation codes are 4-digit codes and are based on the Standard Occupational Classification (SOC) 2010. The 2010 Census occupation codes were updated in accordance with the 2010 revision of the SOC. To allow for the creation of 2006-2010 and 2008-2010 tables, occupation data in the multiyear files (2006-2010 and 2008-2010) were recoded to 2010 Census occupation codes. We recommend using caution when comparing data coded using 2010 Census occupation codes with data coded using previous Census occupation codes. For more information on the Census occupation code changes, please visit our website at <http://www.census.gov/hhes/www/oiindex/>.

While the 2006-2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2006-2010 American Community Survey

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Not computed	172	+/-114	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household income are valid values.

The 2009 and 2010 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

While the 2006-2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Some other race	181	+/-128	1.8%	+/-1.2
HISPANIC OR LATINO AND RACE				
Total population	10,246	+/-25	10,246	(X)
Hispanic or Latino (of any race)	925	+/-314	9.0%	+/-3.1
Mexican	552	+/-307	5.4%	+/-3.0
Puerto Rican	4	+/-6	0.0%	+/-0.1
Cuban	0	+/-119	0.0%	+/-0.3
Other Hispanic or Latino	369	+/-307	3.6%	+/-3.0
Not Hispanic or Latino	9,321	+/-318	91.0%	+/-3.1
White alone	8,300	+/-444	81.0%	+/-4.3
Black or African American alone	111	+/-41	1.1%	+/-0.4
American Indian and Alaska Native alone	613	+/-350	6.0%	+/-3.4
Asian alone	37	+/-43	0.4%	+/-0.4
Native Hawaiian and Other Pacific Islander alone	0	+/-119	0.0%	+/-0.3
Some other race alone	12	+/-19	0.1%	+/-0.2
Two or more races	248	+/-150	2.4%	+/-1.5
Two races including Some other race	0	+/-119	0.0%	+/-0.3
Two races excluding Some other race, and Three or more races	248	+/-150	2.4%	+/-1.5
Total housing units	4,748	+/-271	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data).

The effect of nonsampling error is not represented in these tables.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological differences in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see [http://www.census.gov/acs/www/methodology/questionnaire\\_changes/](http://www.census.gov/acs/www/methodology/questionnaire_changes/). For more information about changes in the estimates see <http://www.census.gov/population/www/socdemo/hispanic/reports.html>.

While the 2006-2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
