SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2009-2013 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Carbon County, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
HOUSEHOLDS BY TYPE				
Total households	6,077	+/-303	6,077	(X)
Family households (families)	4,003	+/-242	65.9%	+/-3.6
With own children under 18 years	1,709	+/-181	28.1%	+/-2.7
Married-couple family	3,243	+/-252	53.4%	+/-4.0
With own children under 18 years	1,189	+/-162	19.6%	+/-2.6
Male householder, no wife present, family	196	+/-71	3.2%	+/-1.2
With own children under 18 years	121	+/-56	2.0%	+/-0.9
Female householder, no husband present, family	564	+/-135	9.3%	+/-2.2
With own children under 18 years	399	+/-119	6.6%	+/-1.9
Nonfamily households	2,074	+/-275	34.1%	+/-3.6
Householder living alone	1,732	+/-223	28.5%	+/-3.1
65 years and over	517	+/-104	8.5%	+/-1.7
Households with one or more people under 18 years	1,870	+/-189	30.8%	+/-2.8
Households with one or more people 65 years and over	1,412	+/-72	23.2%	+/-1.4
Average household size	2.42	+/-0.10	(X)	(X)
Average family size	2.96	+/-0.14	(X)	(X)
RELATIONSHIP				
Population in households	14,715	+/-364	14,715	(X)
Householder	6,077	+/-303	41.3%	+/-1.7
Spouse	3,246	+/-256	22.1%	+/-1.6
Child	4,109	+/-257	27.9%	+/-1.8
Other relatives	483	+/-197	3.3%	+/-1.3
Nonrelatives	800	+/-210	5.4%	+/-1.4
Unmarried partner	368	+/-120	2.5%	+/-0.8
MARITAL STATUS				
Males 15 years and over	6,957	+/-42	6,957	(X)
Never married	1,907	+/-260	27.4%	+/-3.7
Now married, except separated	3,580	+/-330	51.5%	+/-4.8
Separated	161	+/-71	2.3%	+/-1.0

Subject	Carbon County, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Widowed	207	+/-74	3.0%	+/-1.1
Divorced	1,102	+/-197	15.8%	+/-2.8
Females 15 years and over	5,725	+/-40	5,725	(X)
Never married	1,100	+/-141	19.2%	+/-2.4
Now married, except separated	3,322	+/-220	58.0%	+/-3.9
Separated	114	+/-61	2.0%	+/-1.1
Widowed	464	+/-97	8.1%	+/-1.7
Divorced	725	+/-153	12.7%	+/-2.7
FERTILITY				
Number of women 15 to 50 years old who had a birth in the past 12 months	225	+/-106	225	(X)
Unmarried women (widowed, divorced, and never married)	94	+/-73	41.8%	+/-26.1
Per 1,000 unmarried women	67	+/-51	(X)	(X)
Per 1,000 women 15 to 50 years old	70	+/-33	(X)	(X)
Per 1,000 women 15 to 19 years old	13	+/-22	(X)	(X)
Per 1,000 women 20 to 34 years old	158	+/-80	(X)	(X)
Per 1,000 women 35 to 50 years old	5	+/-7	(X)	(X)
GRANDPARENTS				
Number of grandparents living with own grandchildren under 18 years	170	+/-83	170	(X)
Responsible for grandchildren	94	+/-59	55.3%	+/-23.2
Years responsible for grandchildren				
Less than 1 year	41	+/-43	24.1%	+/-21.8
1 or 2 years	18	+/-29	10.6%	+/-15.4
3 or 4 years	0	+/-18	0.0%	+/-16.1
5 or more years	35	+/-30	20.6%	+/-17.5
Number of grandparents responsible for own grandchildren under 18 years	94	+/-59	94	(X)
Who are female	42	+/-24	44.7%	+/-13.7
Who are married	85	+/-58	90.4%	+/-11.1
SCHOOL ENROLLMENT				
Population 3 years and over enrolled in school	3,438	+/-199	3,438	(X)
Nursery school, preschool	273	+/-88	7.9%	+/-2.4
Kindergarten	118	+/-48	3.4%	+/-1.4
Elementary school (grades 1-8)	1,697	+/-92	49.4%	+/-3.3
High school (grades 9-12)	718	+/-74	20.9%	+/-2.2
College or graduate school	632	+/-139	18.4%	+/-3.3
EDUCATIONAL ATTAINMENT				
Population 25 years and over	10,830	+/-101	10,830	(X)
Less than 9th grade	413	+/-107	3.8%	+/-1.0
9th to 12th grade, no diploma	712	+/-150	6.6%	+/-1.4
High school graduate (includes equivalency)	3,970	+/-315	36.7%	+/-3.0
Some college, no degree	2,844	+/-230	26.3%	+/-2.1
Associate's degree	974	+/-153	9.0%	+/-1.4
Bachelor's degree	1,325	+/-177	12.2%	+/-1.6
Graduate or professional degree	592	+/-142	5.5%	+/-1.3
Percent high school graduate or higher	(X)	(X)	89.6%	+/-1.7
Percent bachelor's degree or higher	(X)	(X)	17.7%	+/-2.0
VETERAN STATUS				
Civilian population 18 years and over	12,114	+/-9	12,114	(X)
Civilian veterans	1,603	+/-194	13.2%	+/-1.6

Subject	Carbon County, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
DISABILITY STATUS OF THE CIVILIAN NONINSTITUTIONALIZED POPULATION				
Total Civilian Noninstitutionalized Population	14,750	+/-362	14,750	(X)
With a disability	2,004	+/-196	13.6%	+/-1.3
Under 18 years	3,690	+/-4	3,690	(X)
With a disability	114	+/-60	3.1%	+/-1.6
18 to 64 years	9,089	+/-356	9,089	(X)
With a disability	1,043	+/-174	11.5%	+/-1.9

With a broadband Internet subscription	(X)	(X)	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes

when using multi-year data containing data from 2013.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2009-2013 5-Year American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

DP03 | SELECTED ECONOMIC CHARACTERISTICS

2009-2013 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Unrelated individuals 15 years and over	(X)	(X)	17.3%	+/-3.6

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Census occupation codes are 4-digit codes and are based on the Standard Occupational Classification (SOC). The Census occupation codes for 2010 and later years are based on the 2010 revision of the SOC. To allow for the creation of 2009-2013 tables, occupation data in the multiyear files (2009-2013) were recoded to 2013 Census occupation codes. We recommend using caution when comparing data coded using 2013 Census occupation codes with data coded using Census occupation codes prior to 2010. For more information on the Census occupation code changes, please visit our website at <http://www.census.gov/people/io/methodology/>.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2009-2013 and 2011-2013 tables, industry data in the multiyear files (2009-2013 and 2011-2013) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at <http://www.census.gov/people/io/methodology/>.

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2009-2013 5-Year American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

GROSS RENT AS A PERCENTAGE OF HOUSEHOLD INCOME (GRAPI)				
Occupied units paying rent (excluding units where GRAPI cannot be computed)	1,193	+/-214	1,193	(X)
Less than 15.0 percent	305	+/-109	25.6%	+/-8.3
15.0 to 19.9 percent	227	+/-90	19.0%	+/-7.5
20.0 to 24.9 percent	175	+/-83	14.7%	+/-5.9
25.0 to 29.9 percent	92	+/-49	7.7%	+/-3.8
30.0 to 34.9 percent	81	+/-64	6.8%	+/-5.3
35.0 percent or more	313	+/-126	26.2%	+/-9.0
Not computed	407	+/-117	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household Income are valid values.

Median calculations for base table sourcing VAL, MHC, SMOC, and TAX should exclude zero values.

The 2007, 2008, 2009, 2010, 2011, 2012, and 2013 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

Telephone service data are not available for certain geographic areas due to problems with data collection. See Errata Note #93 for details.

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Subject	Carbon County, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Total housing units	8,557	+/-153	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological differences in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see http://www.census.gov/acs/www/methodology/questionnaire_changes/. For more information about changes in the estimates see <http://www.census.gov/population/hispanic/files/acs08researchnote.pdf>.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
