SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2008-2012 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Converse County, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
<b>HOUSEHOLDS BY TYPE</b>				
Total households	5,608	+/-203	5,608	(X)
Family households (families)	3,775	+/-238	67.3%	+/-3.7
With own children under 18 years	1,695	+/-215	30.2%	+/-3.5
Married-couple family	3,099	+/-248	55.3%	+/-4.1
With own children under 18 years	1,232	+/-196	22.0%	+/-3.3
Male householder, no wife present, family	230	+/-105	4.1%	+/-1.8
With own children under 18 years	157	+/-91	2.8%	+/-1.6
Female householder, no husband present, family	446	+/-130	8.0%	+/-2.3
With own children under 18 years	306	+/-120	5.5%	+/-2.1
Nonfamily households	1,833	+/-225	32.7%	+/-3.7
Householder living alone	1,628	+/-202	29.0%	+/-3.4
65 years and over	609	+/-134	10.9%	+/-2.3
Households with one or more people under 18 years	1,914	+/-215	34.1%	+/-3.4
Households with one or more people 65 years and over	1,295	+/-95	23.1%	+/-1.6
Average household size	2.44	+/-0.09	(X)	(X)
Average family size	2.97	+/-0.13	(X)	(X)
<b>RELATIONSHIP</b>				
Population in households	13,700	+/-35	13,700	(X)
Householder	5,608	+/-203	40.9%	+/-1.5
Spouse	3,109	+/-254	22.7%	+/-1.9
Child	3,793	+/-257	27.7%	+/-1.9
Other relatives	526	+/-182	3.8%	+/-1.3
Nonrelatives	664	+/-211	4.8%	+/-1.5
Unmarried partner	221	+/-78	1.6%	+/-0.6
<b>MARITAL STATUS</b>				
Males 15 years and over	5,502	+/-90	5,502	(X)
Never married	1,330	+/-153	24.2%	+/-2.7
Now married, except separated	3,345	+/-234	60.8%	+/-4.2
Separated	59	+/-53	1.1%	+/-1.0
Widowed	115	+/-53	2.1%	+/-1.0

Subject	Converse County, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Divorced	653	+/-165	11.9%	+/-3.0
Females 15 years and over	5,412	+/-76	5,412	(X)
Never married	928	+/-180	17.1%	+/-3.3
Now married, except separated	3,181	+/-288	58.8%	+/-5.4
Separated	121	+/-102	2.2%	+/-1.9
Widowed	434	+/-113	8.0%	+/-2.1
Divorced	748	+/-189	13.8%	+/-3.5
<b>FERTILITY</b>				
Number of women 15 to 50 years old who had a birth in the past 12 months	210	+/-69	210	(X)
Unmarried women (widowed, divorced, and never married)	85	+/-55	40.5%	+/-20.4
Per 1,000 unmarried women	67	+/-44	(X)	(X)
Per 1,000 women 15 to 50 years old	69	+/-23	(X)	(X)
Per 1,000 women 15 to 19 years old	10	+/-19	(X)	(X)
Per 1,000 women 20 to 34 years old	119	+/-54	(X)	(X)
Per 1,000 women 35 to 50 years old	44	+/-25	(X)	(X)
<b>GRANDPARENTS</b>				
Number of grandparents living with own grandchildren under 18 years	403	+/-145	403	(X)
Responsible for grandchildren	282	+/-127	70.0%	+/-19.2
Years responsible for grandchildren				
Less than 1 year	81	+/-66	20.1%	+/-15.7
1 or 2 years	11	+/-17	2.7%	+/-4.4
3 or 4 years	124	+/-94	30.8%	+/-19.4
5 or more years	66	+/-50	16.4%	+/-11.7
Number of grandparents responsible for own grandchildren under 18 years	282	+/-127	282	(X)
Who are female	116	+/-62	41.1%	+/-7.4
Who are married	273	+/-127	96.8%	+/-4.2
<b>SCHOOL ENROLLMENT</b>				
Population 3 years and over enrolled in school	3,248	+/-202	3,248	(X)
Nursery school, preschool	328	+/-97	10.1%	+/-2.9
Kindergarten	109	+/-53	3.4%	+/-1.6
Elementary school (grades 1-8)	1,496	+/-139	46.1%	+/-3.8
High school (grades 9-12)	714	+/-93	22.0%	+/-2.9
College or graduate school	601	+/-141	18.5%	+/-3.8
<b>EDUCATIONAL ATTAINMENT</b>				
Population 25 years and over	9,326	+/-59	9,326	(X)
Less than 9th grade	249	+/-128	2.7%	+/-1.4
9th to 12th grade, no diploma	536	+/-145	5.7%	+/-1.5
High school graduate (includes equivalency)	3,765	+/-351	40.4%	+/-3.7
Some college, no degree	2,393	+/-257	25.7%	+/-2.7
Associate's degree	856	+/-194	9.2%	+/-2.1
Bachelor's degree	1,120	+/-203	12.0%	+/-2.2
Graduate or professional degree	407	+/-135	4.4%	+/-1.4
Percent high school graduate or higher	(X)	(X)	91.6%	+/-2.1
Percent bachelor's degree or higher	(X)	(X)	16.4%	+/-2.8
<b>VETERAN STATUS</b>				
Civilian population 18 years and over	10,318	+/-5	10,318	(X)
Civilian veterans	1,271	+/-183	12.3%	+/-1.8

Subject	Converse County, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
<b>DISABILITY STATUS OF THE CIVILIAN NONINSTITUTIONALIZED POPULATION</b>				
Total Civilian Noninstitutionalized Population	13,709	+/-35	13,709	(X)
With a disability	1,599	+/-236	11.7%	+/-1.7
Under 18 years	3,458	+/-8	3,458	(X)
With a disability	88	+/-58	2.5%	+/-1.7
18 to 64 years	8,467	+/-57	8,467	(X)
With a disability	769	+/-190	9.1%	+/-2.2
65 years and over	1,784	+/-58	1,784	(X)
With a disability	742	+/-146	41.6%	+/-7.4
<b>RESIDENCE 1 YEAR AGO</b>				
Population 1 year and over	13,619	+/-68	13,619	(X)
Same house	11,314	+/-493	83.1%	+/-3.6
Different house in the U.S.	2,305	+/-488	16.9%	+/-3.6

West Indian (excluding Hispanic origin groups)	20	+/-31	0.1%	+/-0.2

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the

principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2008-2012 American Community Survey

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

DP03 | SELECTED ECONOMIC CHARACTERISTICS

2008-2012 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2007. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2008-2012 American Community Survey

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Not computed	206	+/-93	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household income are valid values.

The 2007, 2008, 2009, 2010, 2011, and 2012 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

Median calculations for base table sourcing VAL, MHC, SMOC, and TAX should exclude zero values.

Telephone service data are not available for certain geographic areas due to problems with data collection. See Errata Note #93 for details.

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

	Estimate	Margin of Error	Percent	Percent Margin of Error
Total housing units	6,366	+/-43	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological differences in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see [http://www.census.gov/acs/www/methodology/questionnaire\\_changes/](http://www.census.gov/acs/www/methodology/questionnaire_changes/). For more information about changes in the estimates see <http://www.census.gov/population/hispanic/files/acs08researchnote.pdf>.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-1' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+1' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
