SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2008-2012 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Natrona County, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
HOUSEHOLDS BY TYPE				
Total households	30,406	+/-459	30,406	(X)
Family households (families)	20,295	+/-573	66.7%	+/-1.6
With own children under 18 years	8,979	+/-457	29.5%	+/-1.3
Married-couple family	15,281	+/-546	50.3%	+/-1.7
With own children under 18 years	6,026	+/-409	19.8%	+/-1.3
Male householder, no wife present, family	1,651	+/-260	5.4%	+/-0.8
With own children under 18 years	929	+/-216	3.1%	+/-0.7
Female householder, no husband present, family	3,363	+/-338	11.1%	+/-1.1
With own children under 18 years	2,024	+/-248	6.7%	+/-0.8
Nonfamily households	10,111	+/-499	33.3%	+/-1.6
Householder living alone	8,301	+/-528	27.3%	+/-1.7
65 years and over	2,731	+/-282	9.0%	+/-0.9
Households with one or more people under 18 years	9,942	+/-456	32.7%	+/-1.3
Households with one or more people 65 years and over	6,663	+/-203	21.9%	+/-0.7
Average household size	2.44	+/-0.04	(X)	(X)
Average family size	2.95	+/-0.07	(X)	(X)
RELATIONSHIP				
Population in households	74,252	+/-325	74,252	(X)
Householder	30,406	+/-459	40.9%	+/-0.6
Spouse	15,234	+/-570	20.5%	+/-0.8
Child	20,660	+/-640	27.8%	+/-0.9
Other relatives	3,722	+/-599	5.0%	+/-0.8
Nonrelatives	4,230	+/-520	5.7%	+/-0.7
Unmarried partner	2,185	+/-330	2.9%	+/-0.4
MARITAL STATUS				
Males 15 years and over	30,453	+/-117	30,453	(X)
Never married	8,851	+/-423	29.1%	+/-1.4
Now married, except separated	16,458	+/-590	54.0%	+/-1.9
Separated	383	+/-163	1.3%	+/-0.5
Widowed	848	+/-180	2.8%	+/-0.6

Subject	Natrona County, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Divorced	3,913	+/-395	12.8%	+/-1.3
Females 15 years and over	30,224	+/-112	30,224	(X)
Never married	6,546	+/-420	21.7%	+/-1.4
Now married, except separated	15,929	+/-590	52.7%	+/-2.0
Separated	497	+/-147	1.6%	+/-0.5
Widowed	2,683	+/-274	8.9%	+/-0.9
Divorced	4,569	+/-325	15.1%	+/-1.1
FERTILITY				
Number of women 15 to 50 years old who had a birth in the past 12 months	954	+/-197	954	(X)
Unmarried women (widowed, divorced, and never married)	403	+/-135	42.2%	+/-9.8
Per 1,000 unmarried women	47	+/-16	(X)	(X)
Per 1,000 women 15 to 50 years old	53	+/-11	(X)	(X)
Per 1,000 women 15 to 19 years old	20	+/-18	(X)	(X)
Per 1,000 women 20 to 34 years old	96	+/-23	(X)	(X)
Per 1,000 women 35 to 50 years old	20	+/-9	(X)	(X)
GRANDPARENTS				
Number of grandparents living with own grandchildren under 18 years	1,535	+/-303	1,535	(X)
Responsible for grandchildren	954	+/-274	62.1%	+/-10.7
Years responsible for grandchildren				
Less than 1 year	303	+/-159	19.7%	+/-9.1
1 or 2 years	224	+/-115	14.6%	+/-7.2
3 or 4 years	196	+/-115	12.8%	+/-6.8
5 or more years	231	+/-135	15.0%	+/-8.2
Number of grandparents responsible for own grandchildren under 18 years	954	+/-274	954	(X)
Who are female	546	+/-156	57.2%	+/-6.3
Who are married	726	+/-253	76.1%	+/-9.5
SCHOOL ENROLLMENT				
Population 3 years and over enrolled in school	19,469	+/-553	19,469	(X)
Nursery school, preschool	1,813	+/-287	9.3%	+/-1.5
Kindergarten	795	+/-161	4.1%	+/-0.9
Elementary school (grades 1-8)	7,951	+/-315	40.8%	+/-1.7
High school (grades 9-12)	4,032	+/-253	20.7%	+/-1.3
College or graduate school	4,878	+/-519	25.1%	+/-2.1
EDUCATIONAL ATTAINMENT				
Population 25 years and over	50,354	+/-138	50,354	(X)
Less than 9th grade	973	+/-220	1.9%	+/-0.4
9th to 12th grade, no diploma	3,021	+/-304	6.0%	+/-0.6
High school graduate (includes equivalency)	14,853	+/-663	29.5%	+/-1.3
Some college, no degree	14,824	+/-616	29.4%	+/-1.2
Associate's degree	5,608	+/-354	11.1%	+/-0.7
Bachelor's degree	7,360	+/-501	14.6%	+/-1.0
Graduate or professional degree	3,715	+/-362	7.4%	+/-0.7
Percent high school graduate or higher	(X)	(X)	92.1%	+/-0.7
Percent bachelor's degree or higher	(X)	(X)	22.0%	+/-1.1
VETERAN STATUS				
Civilian population 18 years and over	57,643	+/-62	57,643	(X)
Civilian veterans	6,308	+/-432	10.9%	+/-0.8

Subject	Natrona County, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
DISABILITY STATUS OF THE CIVILIAN NONINSTITUTIONALIZED POPULATION				
Total Civilian Noninstitutionalized Population	74,831	+/-185	74,831	(X)
With a disability	8,386	+/-521	11.2%	+/-0.7
Under 18 years	18,103	+/-52	18,103	(X)
With a disability	562	+/-129	3.1%	+/-0.7
18 to 64 years	47,604	+/-220	47,604	(X)
With a disability	4,649	+/-425	9.8%	+/-0.9
65 years and over	9,124	+/-160	9,124	(X)
With a disability	3,175	+/-282	34.8%	+/-3.2
RESIDENCE 1 YEAR AGO				
Population 1 year and over	75,079	+/-147	75,079	(X)
Same house	60,575	+/-1,310	80.7%	+/-1.7
Different house in the U.S.	14,404	+/-1,281	19.2%	+/-1.7
Same county	8,985	+/-1,060	12.0%	+/-1.4
Different county	5,419	+/-769	7.2%	+/-1.0
Same state	2,147	+/-490	2.9%	+/-0.7

West Indian (excluding Hispanic origin groups)	23	+/-27	0.0%	+/-0.1

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the

principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2008-2012 American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2007. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2008-2012 American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

DP04

SELECTED HOUSING CHARACTERISTICS

2008-2012 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

30.0 to 34.9 percent	979	+/-248	11.5%	+/-2.8
35.0 percent or more	2,827	+/-329	33.3%	+/-3.4
Not computed	622	+/-169	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household income are valid values.

The 2007, 2008, 2009, 2010, 2011, and 2012 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

Median calculations for base table sourcing VAL, MHC, SMOC, and TAX should exclude zero values.

Telephone service data are not available for certain geographic areas due to problems with data collection. See Errata Note #93 for details.

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

DP05 ACS DEMOGRAPHIC AND HOUSING ESTIMATES

2008-2012 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Total housing units	33,952	+/-135	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological differences in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see http://www.census.gov/acs/www/methodology/questionnaire_changes/. For more information about changes in the estimates see <http://www.census.gov/population/hispanic/files/acs08researchnote.pdf>.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '- ' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+ ' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
