

DP02

SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2007-2011 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Teton County, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
HOUSEHOLDS BY TYPE				
Total households	7,246	+/-376	7,246	(X)
Family households (families)	4,210	+/-424	58.1%	+/-4.8
With own children under 18 years	1,718	+/-340	23.7%	+/-4.3
Married-couple family	3,724	+/-419	51.4%	+/-4.9
With own children under 18 years	1,478	+/-308	20.4%	+/-4.0
Male householder, no wife present, family	188	+/-104	2.6%	+/-1.4
With own children under 18 years	119	+/-78	1.6%	+/-1.1
Female householder, no husband present, family	298	+/-131	4.1%	+/-1.8
With own children under 18 years	121	+/-101	1.7%	+/-1.4
Nonfamily households	3,036	+/-372	41.9%	+/-4.8
Householder living alone	2,232	+/-338	30.8%	+/-4.6
65 years and over	519	+/-151	7.2%	+/-2.1
Households with one or more people under 18 years	1,757	+/-344	24.2%	+/-4.3
Households with one or more people 65 years and over	1,277	+/-146	17.6%	+/-2.0
Average household size	2.86	+/-0.14	(X)	(X)
Average family size	3.36	+/-0.23	(X)	(X)
RELATIONSHIP				
Population in households	20,735	+/-144	20,735	(X)
Householder	7,246	+/-376	34.9%	+/-1.8
Spouse	3,726	+/-429	18.0%	+/-2.1
Child	5,233	+/-470	25.2%	+/-2.3
Other relatives	978	+/-470	4.7%	+/-2.3
Nonrelatives	3,552	+/-743	17.1%	+/-3.6
Unmarried partner	390	+/-164	1.9%	+/-0.8
MARITAL STATUS				
Males 15 years and over	9,366	****	9,366	(X)
Never married	4,247	+/-535	45.3%	+/-5.7
Now married, except separated	4,268	+/-570	45.6%	+/-6.1
Separated	0	+/-89	0.0%	+/-0.3
Widowed	151	+/-96	1.6%	+/-1.0
Divorced	700	+/-235	7.5%	+/-2.5
Females 15 years and over	8,359	****	8,359	(X)
Never married	3,085	+/-476	36.9%	+/-5.7

Subject	Teton County, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Now married, except separated	3,873	+/-491	46.3%	+/-5.9
Separated	152	+/-223	1.8%	+/-2.7
Widowed	455	+/-130	5.4%	+/-1.6
Divorced	794	+/-292	9.5%	+/-3.5
FERTILITY				
Number of women 15 to 50 years old who had a birth in the past 12 months	154	+/-122	154	(X)
Unmarried women (widowed, divorced, and never married)	0	+/-89	0.0%	+/-18.9
Per 1,000 unmarried women	0	+/-10	(X)	(X)
Per 1,000 women 15 to 50 years old	28	+/-22	(X)	(X)
Per 1,000 women 15 to 19 years old	0	+/-73	(X)	(X)
Per 1,000 women 20 to 34 years old	39	+/-40	(X)	(X)
Per 1,000 women 35 to 50 years old	21	+/-26	(X)	(X)
GRANDPARENTS				
Number of grandparents living with own grandchildren under 18 years	170	+/-119	170	(X)
Responsible for grandchildren	45	+/-45	26.5%	+/-28.7
Years responsible for grandchildren				
Less than 1 year	25	+/-38	14.7%	+/-22.4
1 or 2 years	20	+/-24	11.8%	+/-17.3
3 or 4 years	0	+/-89	0.0%	+/-17.3
5 or more years	0	+/-89	0.0%	+/-17.3
Number of grandparents responsible for own grandchildren under 18 years	45	+/-45	45	(X)
Who are female	15	+/-16	33.3%	+/-41.8
Who are married	20	+/-24	44.4%	+/-55.5
SCHOOL ENROLLMENT				
Population 3 years and over enrolled in school	3,582	+/-361	3,582	(X)
Nursery school, preschool	292	+/-139	8.2%	+/-3.4
Kindergarten	188	+/-131	5.2%	+/-3.6
Elementary school (grades 1-8)	1,702	+/-168	47.5%	+/-6.0
High school (grades 9-12)	886	+/-134	24.7%	+/-3.6
College or graduate school	514	+/-230	14.3%	+/-5.5
EDUCATIONAL ATTAINMENT				
Population 25 years and over	15,350	*****	15,350	(X)
Less than 9th grade	636	+/-658	4.1%	+/-4.3
9th to 12th grade, no diploma	128	+/-162	0.8%	+/-1.1
High school graduate (includes equivalency)	2,870	+/-525	18.7%	+/-3.4
Some college, no degree	3,096	+/-556	20.2%	+/-3.6
Associate's degree	536	+/-257	3.5%	+/-1.7
Bachelor's degree	5,533	+/-728	36.0%	+/-4.7
Graduate or professional degree	2,551	+/-321	16.6%	+/-2.1
Percent high school graduate or higher	(X)	(X)	95.0%	+/-4.4
Percent bachelor's degree or higher	(X)	(X)	52.7%	+/-5.2
VETERAN STATUS				
Civilian population 18 years and over	17,063	+/-8	17,063	(X)
Civilian veterans	1,192	+/-198	7.0%	+/-1.2
DISABILITY STATUS OF THE CIVILIAN NONINSTITUTIONALIZED POPULATION				
Total Civilian Noninstitutionalized Population	(X)	(X)	(X)	(X)
With a disability	(X)	(X)	(X)	(X)
Under 18 years	(X)	(X)	(X)	(X)

Welsh	235	+/-165	1.1%	+/-0.8
West Indian (excluding Hispanic origin groups)	10	+/-21	0.0%	+/-0.1

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2007-2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2007-2011 American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

	Estimate	Margin of Error	Percent	Percent Margin of Error
65 years and over	(X)	(X)	0.6%	+/-0.9
People in families	(X)	(X)	7.2%	+/-4.6
Unrelated individuals 15 years and over	(X)	(X)	8.3%	+/-5.0

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2007. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

Census occupation codes are 4-digit codes and are based on the Standard Occupational Classification (SOC). The Census occupation codes for 2010 and later years are based on the 2010 revision of the SOC. To allow for the creation of 2007-2011 and 2009-2011 tables, occupation data in the multiyear files (2007-2011 and 2009-2011) were recoded to 2011 Census occupation codes. We recommend using caution when comparing data coded using 2011 Census occupation codes with data coded using Census occupation codes prior to 2010. For more information on the Census occupation code changes, please visit our website at <http://www.census.gov/hhes/www/oiindex/>.

While the 2007-2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2007-2011 American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Not computed	270	+/-140	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household income are valid values.

The 2007, 2008, 2009, 2010, and 2011 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

Median calculations for base table sourcing VAL, MHC, SMOC, and TAX should exclude zero values.

While the 2007-2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Two or more races	123	+/-121	0.6%	+/-0.6
Two races including Some other race	0	+/-89	0.0%	+/-0.2
Two races excluding Some other race, and Three or more races	123	+/-121	0.6%	+/-0.6
Total housing units	12,666	+/-53	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological differences in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see http://www.census.gov/acs/www/methodology/questionnaire_changes/. For more information about changes in the estimates see <http://www.census.gov/population/www/socdemo/hispanic/reports.html>.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2007-2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '- ' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+ ' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
