

Uinta County, Wyoming
Selected Social Characteristics in the United States: 2005-2009
 Data Set: 2005-2009 American Community Survey 5-Year Estimates
 Survey: American Community Survey

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

For more information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Selected Social Characteristics in the United States	Estimate	Margin of Error	Percent	Margin of Error
HOUSEHOLDS BY TYPE				
Total households	7,251	+/-269	7,251	(X)
Family households (families)	5,308	+/-281	73.2%	+/-3.5
With own children under 18 years	2,802	+/-233	38.6%	+/-3.0
Married-couple family	4,342	+/-300	59.9%	+/-4.1
With own children under 18 years	2,148	+/-216	29.6%	+/-2.9
Male householder, no wife present, family	272	+/-106	3.8%	+/-1.4
With own children under 18 years	179	+/-78	2.5%	+/-1.1
Female householder, no husband present, family	694	+/-180	9.6%	+/-2.4
With own children under 18 years	475	+/-153	6.6%	+/-2.1
Nonfamily households	1,943	+/-279	26.8%	+/-3.5
Householder living alone	1,610	+/-255	22.2%	+/-3.4
65 years and over	488	+/-111	6.7%	+/-1.5
Households with one or more people under 18 years	3,054	+/-260	42.1%	+/-3.3
Households with one or more people 65 years and over	1,157	+/-84	16.0%	+/-1.2
Average household size	2.73	+/-0.10	(X)	(X)
Average family size	3.21	+/-0.14	(X)	(X)
RELATIONSHIP				
Population in households	19,785	+/-222	19,785	(X)
Householder	7,251	+/-269	36.6%	+/-1.3
Spouse	4,353	+/-309	22.0%	+/-1.5
Child	6,598	+/-383	33.3%	+/-1.9
Other relatives	793	+/-304	4.0%	+/-1.5
Nonrelatives	790	+/-195	4.0%	+/-1.0
Unmarried partner	428	+/-164	2.2%	+/-0.8
MARITAL STATUS				
Males 15 years and over	7,658	+/-65	7,658	(X)
Never married	1,898	+/-168	24.8%	+/-2.2
Now married, except separated	4,638	+/-278	60.6%	+/-3.7
Separated	63	+/-40	0.8%	+/-0.5
Widowed	153	+/-76	2.0%	+/-1.0
Divorced	906	+/-237	11.8%	+/-3.1
Females 15 years and over	7,392	+/-92	7,392	(X)
Never married	1,436	+/-201	19.4%	+/-2.6
Now married, except separated	4,350	+/-345	58.8%	+/-4.7
Separated	60	+/-45	0.8%	+/-0.6
Widowed	382	+/-95	5.2%	+/-1.3
Divorced	1,164	+/-220	15.7%	+/-3.0
FERTILITY				
Number of women 15 to 50 years old who had a birth in the past 12 months	391	+/-120	391	(X)
Unmarried women (widowed, divorced, and never married)	129	+/-77	33.0%	+/-15.5
Per 1,000 unmarried women	61	+/-35	(X)	(X)
Per 1,000 women 15 to 50 years old	78	+/-24	(X)	(X)

Selected Social Characteristics in the United States	Estimate	Margin of Error	Percent	Margin of Error
Per 1,000 women 15 to 19 years old	51	+/-57	(X)	(X)
Per 1,000 women 20 to 34 years old	187	+/-63	(X)	(X)
Per 1,000 women 35 to 50 years old	7	+/-11	(X)	(X)
GRANDPARENTS				
Number of grandparents living with own grandchildren under 18 years	479	+/-195	479	(X)
Responsible for grandchildren	163	+/-94	34.0%	+/-15.3
Years responsible for grandchildren				
Less than 1 year	76	+/-72	15.9%	+/-12.0
1 or 2 years	8	+/-12	1.7%	+/-2.5
3 or 4 years	40	+/-44	8.4%	+/-9.4
5 or more years	39	+/-40	8.1%	+/-9.1
Number of grandparents responsible for own grandchildren under 18 years	163	+/-94	163	(X)
Who are female	54	+/-32	33.1%	+/-22.1
Who are married	120	+/-80	73.6%	+/-25.0
SCHOOL ENROLLMENT				
Population 3 years and over enrolled in school	5,620	+/-227	5,620	(X)
Nursery school, preschool	337	+/-118	6.0%	+/-2.0
Kindergarten	367	+/-159	6.5%	+/-2.9
Elementary school (grades 1-8)	2,853	+/-188	50.8%	+/-3.3
High school (grades 9-12)	1,442	+/-153	25.7%	+/-2.5
College or graduate school	621	+/-156	11.0%	+/-2.6
EDUCATIONAL ATTAINMENT				
Population 25 years and over	12,236	+/-48	12,236	(X)
Less than 9th grade	225	+/-84	1.8%	+/-0.7
9th to 12th grade, no diploma	1,016	+/-222	8.3%	+/-1.8
High school graduate (includes equivalency)	4,391	+/-346	35.9%	+/-2.8
Some college, no degree	3,609	+/-381	29.5%	+/-3.1
Associate's degree	875	+/-194	7.2%	+/-1.6
Bachelor's degree	1,486	+/-218	12.1%	+/-1.8
Graduate or professional degree	634	+/-168	5.2%	+/-1.4
Percent high school graduate or higher	89.9%	+/-2.0	(X)	(X)
Percent bachelor's degree or higher	17.3%	+/-2.3	(X)	(X)
VETERAN STATUS				
Civilian population 18 years and over	13,922	+/-18	13,922	(X)
Civilian veterans	1,455	+/-206	10.5%	+/-1.5
DISABILITY STATUS OF THE CIVILIAN NONINSTITUTIONALIZED POPULATION				
Total Civilian Noninstitutionalized Population	(X)	(X)	(X)	(X)
With a disability	(X)	(X)	(X)	(X)
Under 18 years	(X)	(X)	(X)	(X)
With a disability	(X)	(X)	(X)	(X)

Source: U.S. Census Bureau, 2005-2009 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the

lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Notes:

- Ancestry listed in this table refers to the total number of people who responded with a particular ancestry; for example, the estimate given for Russian represents the number of people who listed Russian as either their first or second ancestry. This table lists only the largest ancestry groups; see the Detailed Tables for more categories. Race and Hispanic origin groups are not included in this table because official data for those groups come from the Race and Hispanic origin questions rather than the ancestry question (see Demographic Table).
- The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Because of contextual differences between the 2008-2009 disability data and disability data collected in prior years, the Census Bureau is unable to combine the 5 years of disability data in order to produce the multi-year estimate that would appear in this table. Multi-year estimates of disability status will become available once five consecutive years of data are collected. For more information about the differences between the 2008 and prior years' disability questions, see [Review of Changes to the Measurement of Disability in the 2008 ACS](#).
- Data for year of entry of the native population reflect the year of entry into the U.S. by people who were born in Puerto Rico, U.S. Island Areas or born outside the U.S. to a U.S. citizen parent and who subsequently moved to the U.S.
- While the 2005-2009 American Community Survey (ACS) data generally reflect the November 2008 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.
- Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

The letters PDF or symbol  indicate a document is in the [Portable Document Format \(PDF\)](#). To view the file you will need the [Adobe® Acrobat® Reader](#), which is available for **free** from the Adobe web site.

Source: U.S. Census Bureau, 2005-2009 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Notes:

- Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to [Labor Force Guidance](#).
- Workers include members of the Armed Forces and civilians who were at work last week.
- Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2000.
- Industry codes are 4-digit codes and are based on the North American Industry Classification System 2002 and 2007. The 2005, 2006 and 2007 ACS data are coded using NAICS 2002 while the 2008 and 2009 ACS data use NAICS 2007 codes. Categories that differ between 2002 and 2007 NAICS are aggregated so that the 5 years of data are consistent in display and reflect the NAICS 2007 codes. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.
- Selected earnings and income data are not available for certain geographic areas due to problems with group quarters data collection and imputation. See the [ACS User Notes](#) for details.
- Logical coverage edits applying a rules-based assignment of Medicaid, Medicare and military health coverage were added in 2009 -- please see http://www.census.gov/hhes/www/hlthins/publications/coverage_edits_final.pdf for more details.
- While the 2005-2009 American Community Survey (ACS) data generally reflect the November 2008 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.
- Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

The letters PDF or symbol  indicate a document is in the [Portable Document Format \(PDF\)](#). To view the file you will need the [Adobe® Acrobat® Reader](#), which is available for **free** from the Adobe web site.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Notes:

•Caution should be used when comparing data for Number of Rooms between 2008 and 2009. A data collection error was identified for 2008 impacting the "1 room" category. For more information please see [Errata Note #54](#).

- Caution should be used when comparing data for Number of Bedrooms between 2008 and 2009. A data collection error was identified for 2008 impacting the "0 bedrooms" category. For more information please see [Errata Note #54](#).
- The 2005-2009 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.
- Caution should be used when comparing data for Telephone Service Availability between 2008 and 2009. A data collection error was identified for 2008 impacting the "no" category and underreporting those who did not have telephone service available. For more information please see [Errata Note #53](#).
- Caution should be used when comparing data for Occupants per Room between 2008 and 2009. A data collection error was identified for 2008 impacting the "1 room" category. For more information please see [Errata Note #54](#).
- In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.
- In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.
- In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household Income are valid values.
- The median gross rent excludes no cash renters.
- While the 2005-2009 American Community Survey (ACS) data generally reflect the November 2008 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.
- Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Notes:

-For more information on understanding race and Hispanic origin data, please see the Census 2000 Brief entitled, [Overview of Race and Hispanic Origin](#), issued March 2001. (pdf format)

-The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological differences in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see http://www.census.gov/acs/www/methodology/questionnaire_changes/. For more information about changes in the estimates see <http://www.census.gov/population/www/socdemo/hispanic/reports.html>.

-While the 2005-2009 American Community Survey (ACS) data generally reflect the November 2008 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

-Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '****' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A

Uinta County, Wyoming
Population and Housing Narrative Profile: 2005-2009
 Data Set: **2005-2009 American Community Survey 5-Year Estimates**
 Survey: **American Community Survey**

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

For more information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

HOUSEHOLDS AND FAMILIES: In 2005-2009 there were 7,300 households in Uinta County. The average household size was 2.7 people.

Families made up 73 percent of the households in Uinta County. This figure includes both married-couple families (60 percent) and other families (13 percent). Nonfamily households made up 27 percent of all households in Uinta County. Most of the nonfamily households were people living alone, but some were composed of people living in households in which no one was related to the householder.

Source: American Community Survey, 2005-2009

DISABILITY: In Uinta County, among people at least five years old in 2005-2009, percent reported a disability. The likelihood of having a disability varied by age - from percent of people 5 to 15 years old, to percent of people 16 to 64 years old, and to percent of those 65 and older.

INDUSTRIES: In 2005-2009, for the employed population 16 years and older, the leading industries in Uinta County were Educational services, and health care, and social assistance, 23 percent, and Retail trade, 12 percent.

Employment by Industry in Uinta County, Wyoming in 2005-2009

Source: American Community Survey, 2005-2009

OCCUPATIONS AND TYPE OF EMPLOYER: Among the most common occupations were: Management, professional, and related occupations, 26 percent; Service occupations, 20 percent; Sales and office occupations, 20 percent; Production, transportation, and material moving occupations, 17 percent; and Construction, extraction, maintenance, and repair occupations, 17 percent. Seventy-two percent of the people employed were Private wage and salary workers; 20 percent was Federal, state, or local government workers; and 7 percent was Self-employed in own not incorporated business workers.

TRAVEL TO WORK: Seventy percent of Uinta County workers drove to work alone in 2005-2009, 18 percent carpoolled, 3 percent took public transportation, and 6 percent used other means. The remaining 3 percent worked at home. Among those who commuted to work, it took them on average 20.6 minutes to get to work.

INCOME: The median income of households in Uinta County was \$56,407. Eighty-seven percent of the households received earnings and 14 percent received retirement income other than Social Security. Twenty-three percent of the households received Social Security. The average income from Social Security was \$14,276. These income sources are not mutually exclusive; that is, some households received income from more than one source.

POVERTY AND PARTICIPATION IN GOVERNMENT PROGRAMS: In 2005-2009, 10 percent of people were in poverty. Twelve percent of related children under 18 were below the poverty level, compared with 8 percent of people 65 years old and over. Seven percent of all families and 27 percent of families with a female householder and no husband present had incomes below the poverty level.

Poverty Rates in Uinta County, Wyoming in 2005-2009

Source: American Community Survey, 2005-2009

POPULATION OF Uinta County: In 2005-2009, Uinta County had a total population of 20,000 - 9,700 (48 percent) females and 10,000 (52 percent) males. The median age was 33.8 years. Thirty-one percent of the population was under 18 years and 8 percent was 65 years and older.

The Age Distribution of People in Uinta County, Wyoming in 2005-2009

Source: American Community Survey, 2005-2009

For people reporting one race alone, 95 percent was White; less than 0.5 percent was Black or African American; 1 percent was American Indian and Alaska Native; less than 0.5 percent was Asian; less than 0.5 percent was Native Hawaiian and Other Pacific Islander, and 1 percent was Some other race. Three percent reported Two or more races. Eight percent of the people in Uinta County was Hispanic. Ninety percent of the people in Uinta County was White non-Hispanic. People of Hispanic origin may be of any race.

HOUSING CHARACTERISTICS: In 2005-2009, Uinta County had a total of 8,600 housing units, 16 percent of which were vacant. Of the total housing units, 67 percent was in single-unit structures, 14 percent was in multi-unit structures, and 19 percent was mobile homes. Eighteen percent of the housing units were built since 1990.

The Types of Housing Units in Uinta County, Wyoming in 2005-2009

Source: American Community Survey, 2005-2009

OCCUPIED HOUSING UNIT CHARACTERISTICS: In 2005-2009, Uinta County had 7,300 occupied housing units - 5,500 (75 percent) owner occupied and 1,800 (25 percent) renter occupied. Five percent of the households did not have telephone service and 3 percent of the households did not have access to a car, truck, or van for private use. Multi Vehicle households were not rare. Thirty-seven percent had two vehicles and another 41 percent had three or more.

HOUSING COSTS: The median monthly housing costs for mortgaged owners was \$1,134, nonmortgaged owners \$336, and renters \$522. Twenty percent of owners with mortgages, 5 percent of owners without mortgages, and 31 percent of renters in Uinta County spent 30 percent or more of household income on housing.

Occupants with a Housing Cost Burden in Uinta County, Wyoming in 2005-2009

The U.S. Census Bureau's Population Estimates Program produces the [official population estimates for the nation, states, counties and places, and the official estimates of housing units for states and counties](#). The population and housing characteristics included above are derived from the American Community Survey.

Notes:

- Detail may not add to totals due to rounding.
- Percentages are based on unrounded numbers.

statistical test is not appropriate.

- 6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
- 7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
- 8. An '(X)' means that the estimate is not applicable or not available.
