SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2009-2013 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Uinta County, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
HOUSEHOLDS BY TYPE				
Total households	7,290	+/-254	7,290	(X)
Family households (families)	5,322	+/-250	73.0%	+/-2.9
With own children under 18 years	2,755	+/-254	37.8%	+/-3.2
Married-couple family	4,230	+/-285	58.0%	+/-3.9
With own children under 18 years	1,997	+/-247	27.4%	+/-3.3
Male householder, no wife present, family	194	+/-80	2.7%	+/-1.1
With own children under 18 years	142	+/-62	1.9%	+/-0.9
Female householder, no husband present, family	898	+/-203	12.3%	+/-2.7
With own children under 18 years	616	+/-173	8.4%	+/-2.3
Nonfamily households	1,968	+/-234	27.0%	+/-2.9
Householder living alone	1,711	+/-228	23.5%	+/-2.9
65 years and over	429	+/-115	5.9%	+/-1.6
Households with one or more people under 18 years	3,014	+/-262	41.3%	+/-3.2
Households with one or more people 65 years and over	1,373	+/-111	18.8%	+/-1.5
Average household size	2.85	+/-0.10	(X)	(X)
Average family size	3.38	+/-0.14	(X)	(X)
RELATIONSHIP				
Population in households	20,806	+/-84	20,806	(X)
Householder	7,290	+/-254	35.0%	+/-1.2
Spouse	4,211	+/-272	20.2%	+/-1.3
Child	7,429	+/-333	35.7%	+/-1.6
Other relatives	1,006	+/-246	4.8%	+/-1.2
Nonrelatives	870	+/-203	4.2%	+/-1.0
Unmarried partner	496	+/-170	2.4%	+/-0.8
MARITAL STATUS				
Males 15 years and over	7,916	+/-77	7,916	(X)
Never married	2,109	+/-276	26.6%	+/-3.4
Now married, except separated	4,460	+/-284	56.3%	+/-3.6
Separated	94	+/-79	1.2%	+/-1.0

Subject	Uinta County, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Widowed	189	+/-80	2.4%	+/-1.0
Divorced	1,064	+/-225	13.4%	+/-2.9
Females 15 years and over	7,846	+/-76	7,846	(X)
Never married	1,523	+/-207	19.4%	+/-2.6
Now married, except separated	4,316	+/-306	55.0%	+/-4.1
Separated	103	+/-80	1.3%	+/-1.0
Widowed	545	+/-143	6.9%	+/-1.8
Divorced	1,359	+/-266	17.3%	+/-3.4
FERTILITY				
Number of women 15 to 50 years old who had a birth in the past 12 months	343	+/-102	343	(X)
Unmarried women (widowed, divorced, and never married)	91	+/-63	26.5%	+/-16.1
Per 1,000 unmarried women	40	+/-28	(X)	(X)
Per 1,000 women 15 to 50 years old	70	+/-21	(X)	(X)
Per 1,000 women 15 to 19 years old	32	+/-46	(X)	(X)
Per 1,000 women 20 to 34 years old	155	+/-45	(X)	(X)
Per 1,000 women 35 to 50 years old	6	+/-8	(X)	(X)
GRANDPARENTS				
Number of grandparents living with own grandchildren under 18 years	451	+/-194	451	(X)
Responsible for grandchildren	152	+/-125	33.7%	+/-24.8
Years responsible for grandchildren				
Less than 1 year	12	+/-20	2.7%	+/-4.2
1 or 2 years	8	+/-14	1.8%	+/-3.0
3 or 4 years	0	+/-21	0.0%	+/-6.4
5 or more years	132	+/-115	29.3%	+/-23.1
Number of grandparents responsible for own grandchildren under 18 years	152	+/-125	152	(X)
Who are female	88	+/-64	57.9%	+/-16.8
Who are married	117	+/-123	77.0%	+/-29.7
SCHOOL ENROLLMENT				
Population 3 years and over enrolled in school	5,939	+/-302	5,939	(X)
Nursery school, preschool	435	+/-115	7.3%	+/-1.8
Kindergarten	465	+/-134	7.8%	+/-2.3
Elementary school (grades 1-8)	2,833	+/-191	47.7%	+/-3.4
High school (grades 9-12)	1,337	+/-118	22.5%	+/-2.3
College or graduate school	869	+/-240	14.6%	+/-3.5
EDUCATIONAL ATTAINMENT				
Population 25 years and over	13,131	+/-105	13,131	(X)
Less than 9th grade	342	+/-165	2.6%	+/-1.2
9th to 12th grade, no diploma	1,081	+/-235	8.2%	+/-1.8
High school graduate (includes equivalency)	4,565	+/-376	34.8%	+/-2.9
Some college, no degree	3,541	+/-374	27.0%	+/-2.8
Associate's degree	1,120	+/-190	8.5%	+/-1.5
Bachelor's degree	1,725	+/-260	13.1%	+/-2.0
Graduate or professional degree	757	+/-194	5.8%	+/-1.5
Percent high school graduate or higher	(X)	(X)	89.2%	+/-2.1
Percent bachelor's degree or higher	(X)	(X)	18.9%	+/-2.2
VETERAN STATUS				
Civilian population 18 years and over	14,750	+/-3	14,750	(X)
Civilian veterans	1,359	+/-218	9.2%	+/-1.5

Subject	Uinta County, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
DISABILITY STATUS OF THE CIVILIAN NONINSTITUTIONALIZED POPULATION				
Total Civilian Noninstitutionalized Population	20,868	+/-67	20,868	(X)
With a disability	2,738	+/-328	13.1%	+/-1.6
Under 18 years	6,285	+/-12	6,285	(X)
With a disability	242	+/-100	3.9%	+/-1.6
18 to 64 years	12,671	+/-92	12,671	(X)

With a broadband Internet subscription	(X)	(X)	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes

when using multi-year data containing data from 2013.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2009-2013 5-Year American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

DP03 | SELECTED ECONOMIC CHARACTERISTICS

2009-2013 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Census occupation codes are 4-digit codes and are based on the Standard Occupational Classification (SOC). The Census occupation codes for 2010 and later years are based on the 2010 revision of the SOC. To allow for the creation of 2009-2013 tables, occupation data in the multiyear files (2009-2013) were recoded to 2013 Census occupation codes. We recommend using caution when comparing data coded using 2013 Census occupation codes with data coded using Census occupation codes prior to 2010. For more information on the Census occupation code changes, please visit our website at <http://www.census.gov/people/io/methodology/>.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2009-2013 and 2011-2013 tables, industry data in the multiyear files (2009-2013 and 2011-2013) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at <http://www.census.gov/people/io/methodology/>.

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2009-2013 5-Year American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

35.0 percent or more	554	+/-159	31.2%	+/-7.5
Not computed	218	+/-94	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household Income are valid values.

Median calculations for base table sourcing VAL, MHC, SMOC, and TAX should exclude zero values.

The 2007, 2008, 2009, 2010, 2011, 2012, and 2013 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

Telephone service data are not available for certain geographic areas due to problems with data collection. See Errata Note #93 for details.

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Subject	Uinta County, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Total housing units	8,713	+/-36	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological differences in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see http://www.census.gov/acs/www/methodology/questionnaire_changes/. For more information about changes in the estimates see <http://www.census.gov/population/hispanic/files/acs08researchnote.pdf>.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2009-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
