Contact: Dr. Wenlin Liu, Chief Economist

Where Do Wyoming's Workers Live? Where Do Wyoming's Residents Work?

CHEYENNE – Analyzing the most recent work flow data from the U.S. Census Bureau, 248,218 workers lived in Wyoming in 2020, of which 14,338 or 5.8 percent of them crossed the state line for work (including telework). Colorado attracted 4,864 workers (2.0%) from Wyoming, and 7,101 (2.9%) traveled from Wyoming to other neighboring states for employment. Conversely, of the 258,481 workers who worked and earned wages from Wyoming in 2020, 24,601 of them resided outside the state, or 9.5 percent of the workforce. About 7,110 workers (2.8%) traveled from Colorado, and 12,779 (4.9%) residents from other neighboring states held Wyoming employment positions. Overall, 2020 saw 10,263 (net flow) more non-resident workers hold Wyoming jobs (inflow) than the number of Wyoming workers employed in other states (outflow).

The residence-to-workplace flow data is based on information for workers' residence location and workplace location. Data on commuting activity between places provides a gauge of their economic connection. Commuting plays an important role in the interchange of people, goods, and services across places. "Information about the relationship between the residence and workplace helps policy makers better understand their community's housing demand and labor force availability, as well as issues related to economic development, job training, transportation infrastructure, and provisions of public services and local amenities," said Dr. Wenlin Liu, Chief Economist with the State of Wyoming, Economic Analysis Division. Where people choose to live and work also has an impact on state and local government tax base. "Workers who commute from outside of a region often times spend most of their earnings where they live rather than where they work," stated Liu.

Highlights of County Flows

- In all, 44,778 (around 17.6 %) Wyoming workers commute intrastate to a different county for employment.
- In 2020, 51.2 percent of workers who **lived** in Crook County, and around 40.0 percent of workers who **lived** in Converse, Johnson, Lincoln, Niobrara, and Weston Counties traveled outside their residence county for work, compared to 14.6 percent in Teton County.
- Non-county resident workers held more than half the jobs in Crook (53.3%) and Teton (53.0%) counties, compared to 19.9 percent in Fremont County.
- In 2020, 582 (24.9%) workers who **lived** in Crook County, and 455 (16.8%) workers who **lived** in Weston County traveled to Campbell County for work, while 1,302 (17.5%) resident workers in Lincoln County were employed in Teton County.
- An estimated 2,628 workers from Larimer and Weld counties in Colorado traveled to Laramie County for work in 2020. On the other hand, only 1,854 Laramie County residents traveled to these two counties for employment.
