Wyoming Demographic Update

WAM CED & PSP COMMITTEE

Casper, Wyoming

April 22, 2010

Dr. Wenlin Liu and Amy Bittner
State of Wyoming
Economic Analysis Division

Overview

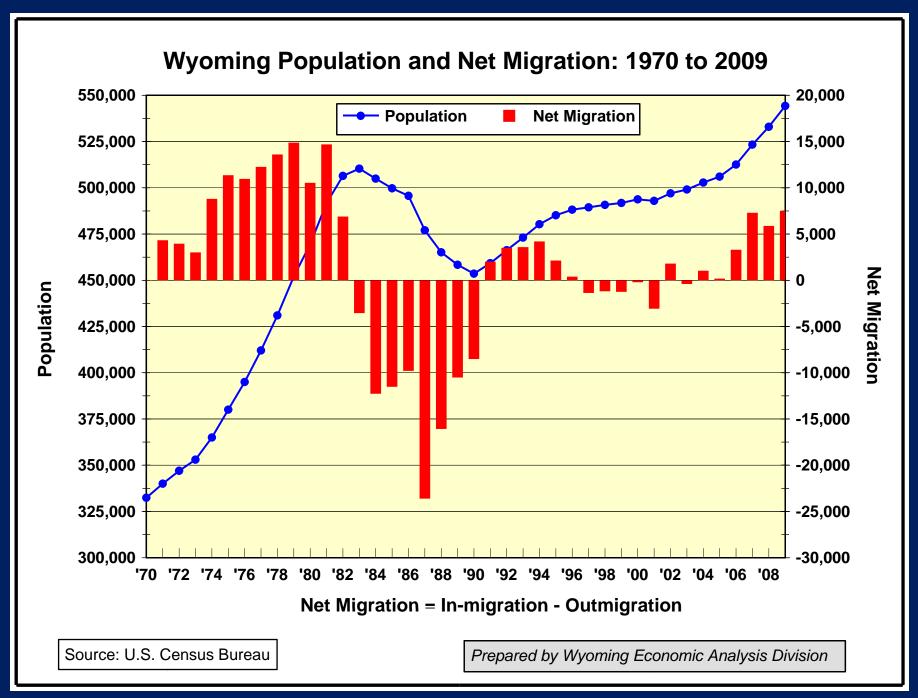

- Wyoming's population reached 544,270 in 2009.
 - Between 2008-2009, the State grew 2.1% (fastest in the nation) or 11,300 persons.
 - Increase since 2000: 10.2% or 50,487 persons. Population change: births, deaths, and migration.
- In-Migration: Driven by employment opportunities.
 - Employment growth since 2004, 12.1%.
 - 2006-2008: high annual employment growth rates, 1st in U.S. Employment growth driven by Mining sector.
 - Counties: Campbell, Sublette, and Sweetwater.
 - 2007-2008: Highest proportion of in-migrants were from MI, CA, SD, UT, and NV.
 - In-migration slows the aging of an area. Movers tend to be younger than non-movers.
 - Negative employment in 2009. Slower annual population growth in future (1%).

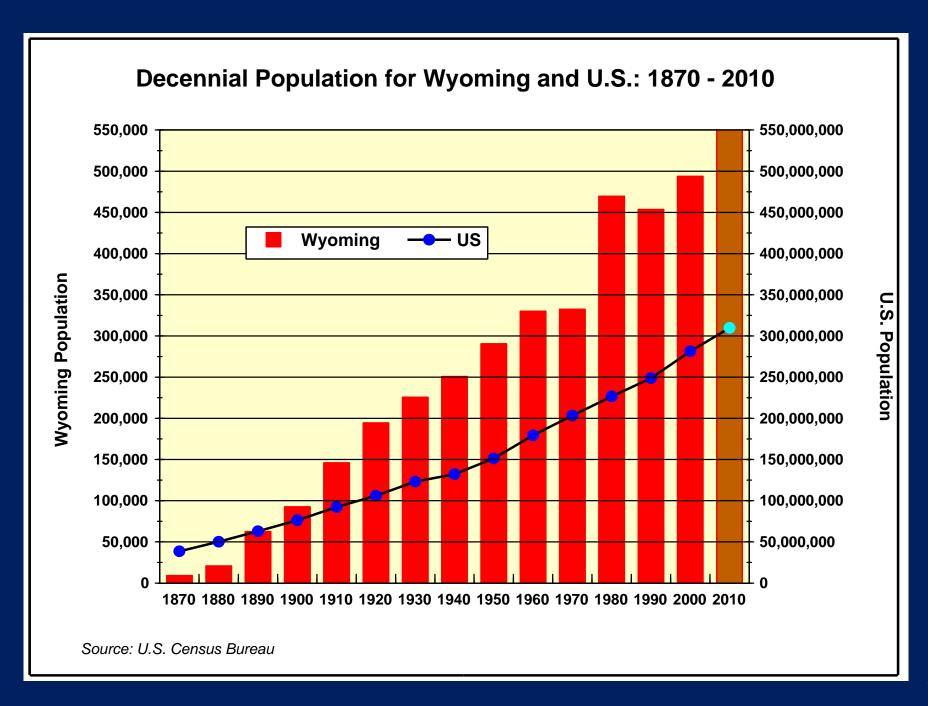

Overview continued...

- Race and Ethnicity two separate concepts. Ethnicity usually refers to Hispanic or Non-Hispanic.
 - Minority is any group that is not single race, Non-Hispanic White. Between 2000 and 2008 the Minority population increased by 30.8%.
 - Hispanic is largest minority group and growth between 2000-2008 was 30%. A person who is Hispanic may be of any race.

• Age:

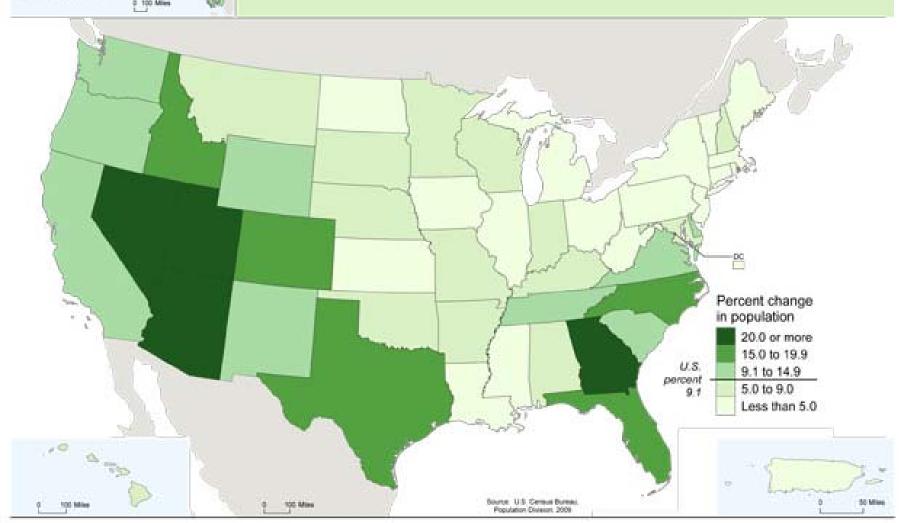

- Aging was slowing down in Wyoming due to employment opportunities in mining industry that brought younger workers.
- Rural areas tend to have higher proportion of age 65 years and older.
- Job opportunities help prevent youth from leaving the State.
- Baby boomers grandchildren. Births in 2008 were 8,000, highest since 1986.
- Slowdown in employment may cause faster aging Wyoming.

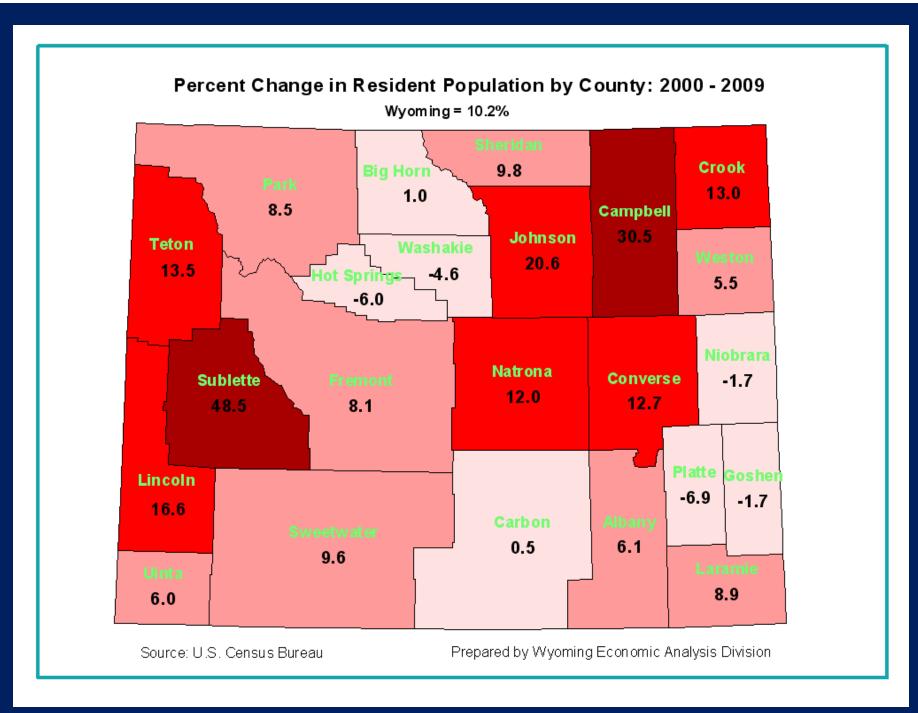

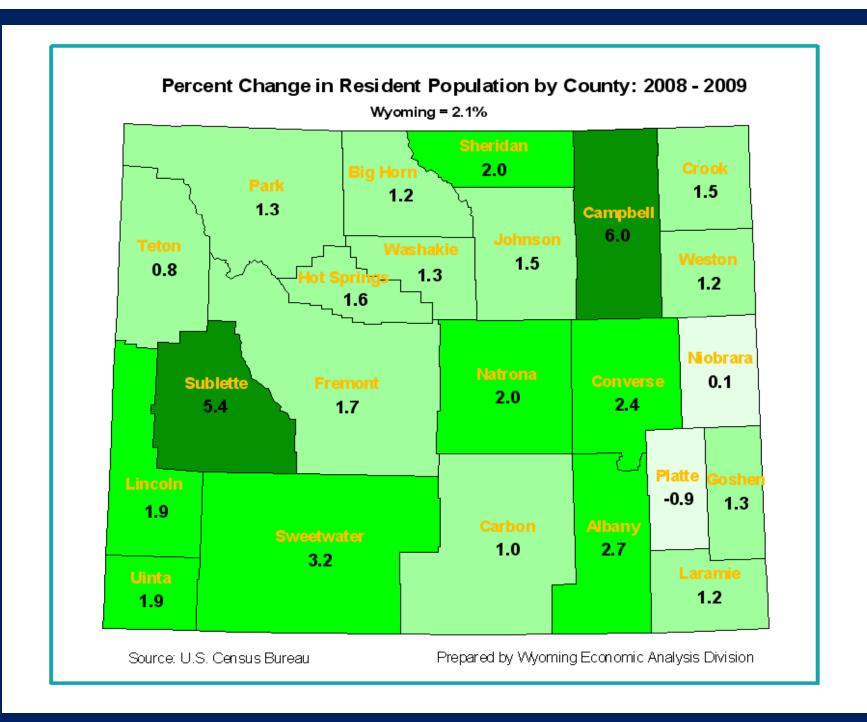

Percent Change in Population for States and Puerto Rico: April 1, 2000 to July 1, 2009

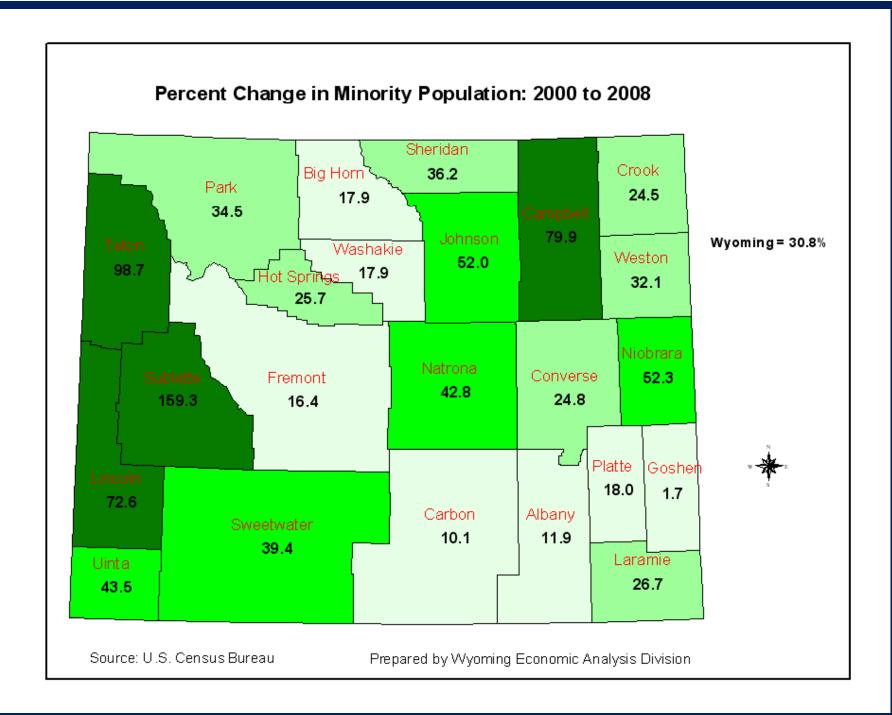

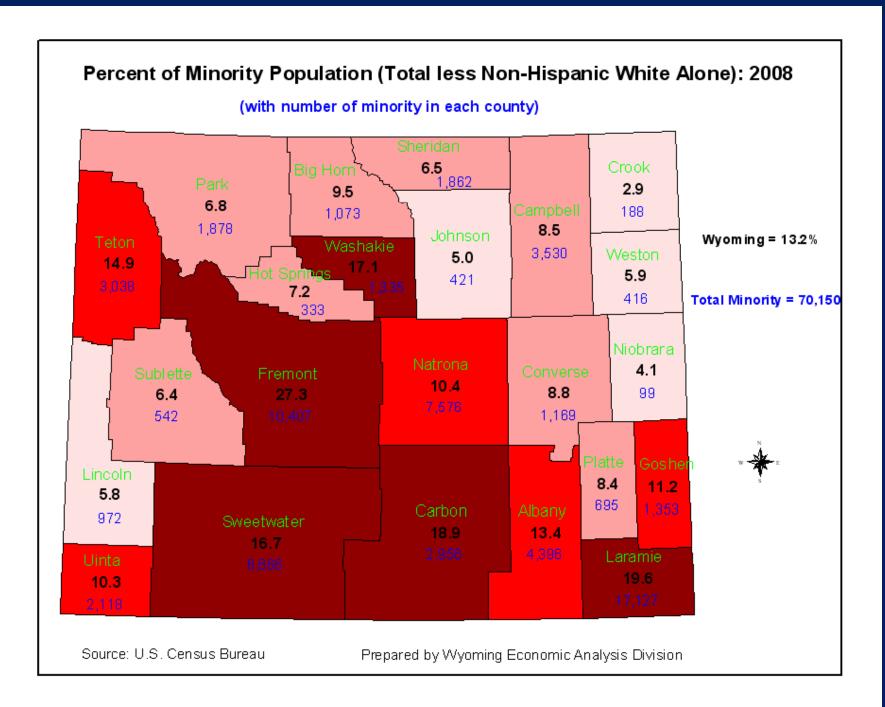

Race and Ethnicity

- Race categories:
 - White
 - Black or African-American
 - American Indian and Alaska Native
 - Asian
 - Native Hawaiian and Other Pacific Islander
 - Two or more races
 - Some other race
- Ethnicity:
 - Hispanic
 - Non-Hispanic
- Example:
 - White, Non Hispanic largest proportion of Wyoming's population
 - White alone indicates person is white, but does not distinguish
 if they are Hispanic or Non-Hispanic.

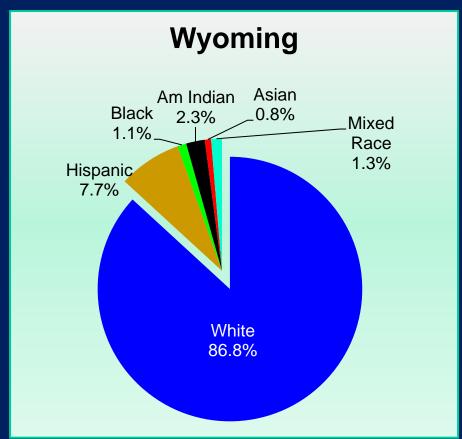

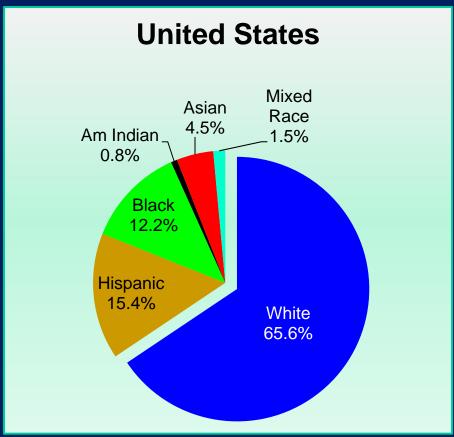

Minority Population, Proportion, and Changes

	Wyoming:	% of Total:	U. S. (000):	% of Total:
1980	37,622	(8.0%)	46,289	(20.4%)
1990	40,877	(9.0%)	60,582	(24.4%)
2000	54,983	(11.1%)	86,869	(30.9%)
2008	70,150	(13.2%)	104,568	(34.4%)
Population Change	Total:	Minority:	Total:	Minority:
% Ch 80-90	-3.4%	8.7%	9.8%	30.9%
% Ch 90-00	8.9%	34.5%	13.2%	43.4%
% Ch 00-08	7.9%	27.6%	8.0%	20.4%

Race and Hispanic Origin in 2008

Rank by % of White:

Wyoming - 9th highest

Hawaii	24.9%
District of Col.	33.1%
New Mexico	41.7%
California	42.3%
Texas	47.4%

Maine	95.3%
Vermont	95.2%
West Virginia	93.5%
New Hampshire	93.1%
lowa	90.3%

Population Aging

Speed and pattern of aging are determined by 3 principal factors:

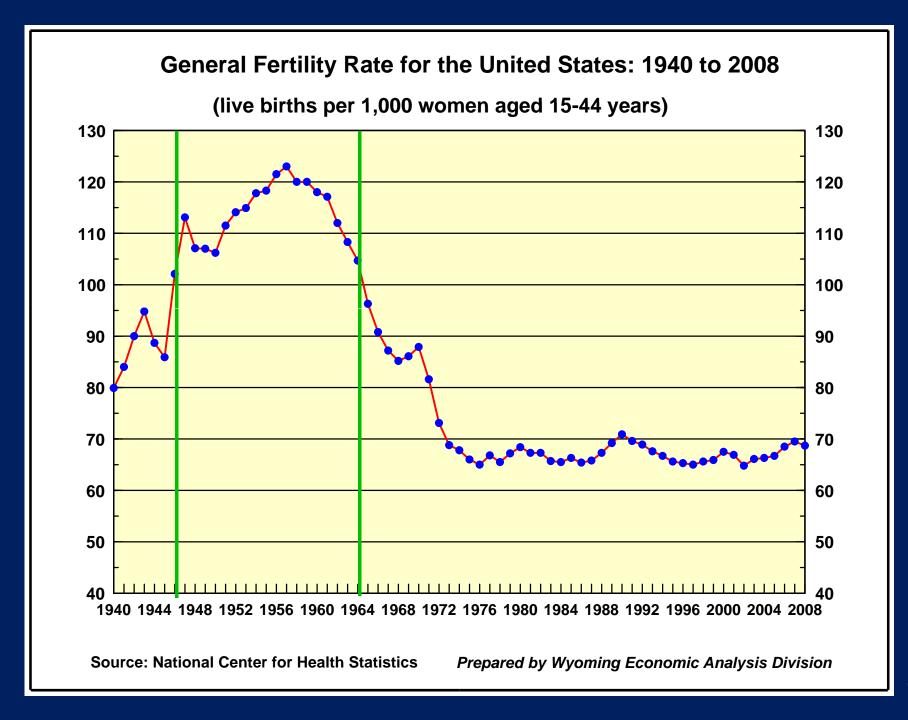

- Most important is the Secular decline in fertility rates
 - sustained increase in the ratio of old to young (<5 vs. 65 & +).
- Mortality rates declined substantially in many countries over the past century (rising life expectancy: Japan=82, US=78)
 - public health, medical tech, standards of living.
- Baby boom in developed countries
 - pronounced rise in post-WWII fertility rates.

Percent of Population 65 and over in 2008:

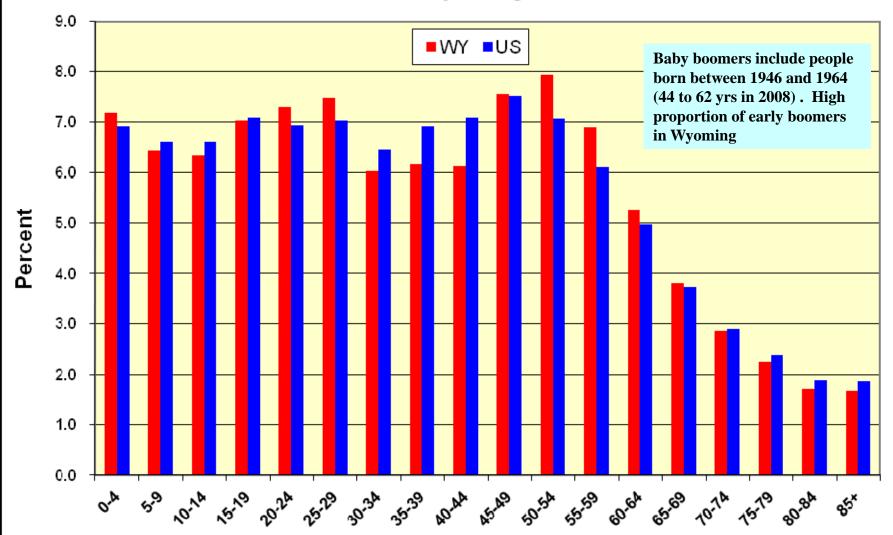

```
Japan = 21%; Germany = 19%; Western Europe = 17%. WORLD = 6%.
```

U.S. = 12.8% in 2008, 19.3% in 2030 (migration).

Wyoming = 12.3% in 2008, 20.8% in 2030.

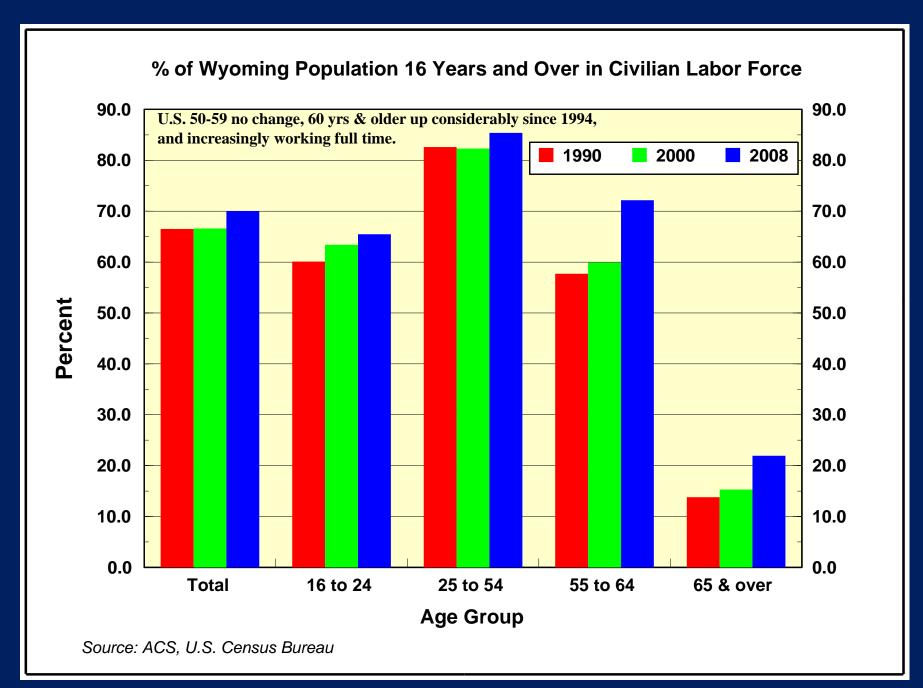

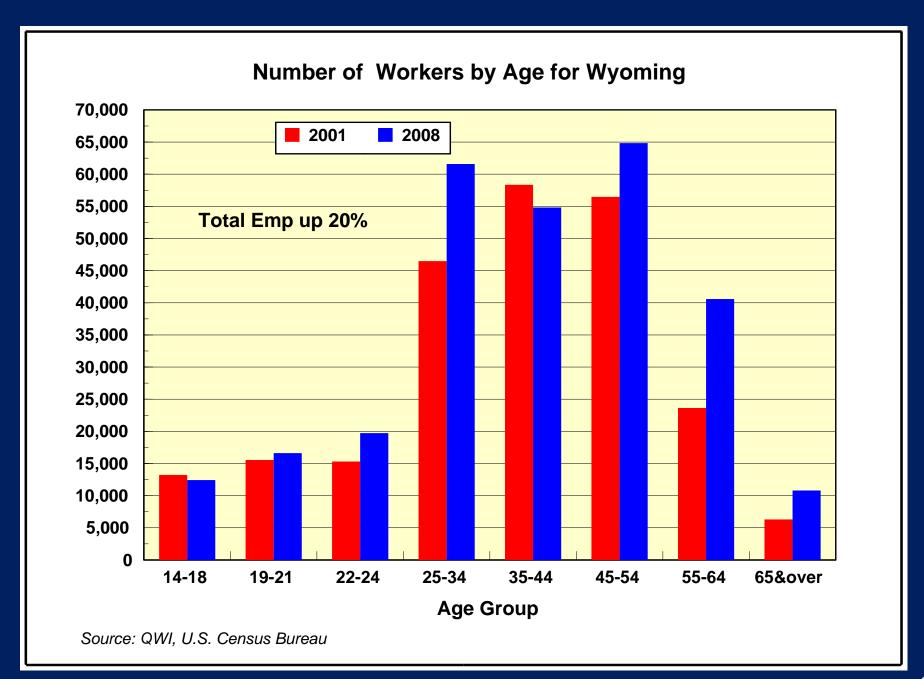

Percent of Population by Age Group for U.S. and Wyoming: 2008

Percent of Total Population

Why Population Aging Matters?

- The oldest old (80 & over) increases fastest (centenarians). -disability, pension & retirement income, health care costs.
- Increasing burden of chronic non-communicable diseases.
 -e.g. heart disease, cancer, diabetes vs. infectious and parasitic.
- Aging and population decline, e.g. Russia, Japan, Ukraine.
 -economic growth, international migration policy.
- Changing family structure, living arrangement (care change).
- Shifting pattern of work and retirement.
 -workforce vs. pensioner; 1950-80s, since early 90s, M vs. F
- Chronic deficit on Social Security & Medicare programs;
 State Medicaid, sustainability.
- Emerging economic challenge
 Financial expenditure, labor supply, total savings, productivity growth.
 Socioeconomic consequences (transportation, housing). Are they predictable?
