SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2011-2013 American Community Survey 3-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Uinta County, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
HOUSEHOLDS BY TYPE				
Total households	7,381	+/-344	7,381	(X)
Family households (families)	5,503	+/-383	74.6%	+/-4.5
With own children under 18 years	2,809	+/-341	38.1%	+/-4.2
Married-couple family	4,250	+/-351	57.6%	+/-4.3
With own children under 18 years	1,879	+/-292	25.5%	+/-3.6
Male householder, no wife present, family	134	+/-68	1.8%	+/-0.9
With own children under 18 years	113	+/-66	1.5%	+/-0.9
Female householder, no husband present, family	1,119	+/-326	15.2%	+/-4.4
With own children under 18 years	817	+/-310	11.1%	+/-4.2
Nonfamily households	1,878	+/-356	25.4%	+/-4.5
Householder living alone	1,540	+/-320	20.9%	+/-4.0
65 years and over	442	+/-186	6.0%	+/-2.5
Households with one or more people under 18 years	3,097	+/-352	42.0%	+/-4.3
Households with one or more people 65 years and over	1,481	+/-174	20.1%	+/-2.3
Average household size	2.82	+/-0.13	(X)	(X)
Average family size	3.24	+/-0.18	(X)	(X)
RELATIONSHIP				
Population in households	20,795	+/-128	20,795	(X)
Householder	7,381	+/-344	35.5%	+/-1.6
Spouse	4,217	+/-378	20.3%	+/-1.8
Child	7,190	+/-425	34.6%	+/-2.0
Other relatives	896	+/-336	4.3%	+/-1.6
Nonrelatives	1,111	+/-360	5.3%	+/-1.7
Unmarried partner	667	+/-275	3.2%	+/-1.3
MARITAL STATUS				
Males 15 years and over	7,960	+/-251	7,960	(X)
Never married	2,001	+/-337	25.1%	+/-4.2
Now married, except separated	4,374	+/-406	54.9%	+/-5.3
Separated	109	+/-108	1.4%	+/-1.3

Subject	Uinta County, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Widowed	290	+/-174	3.6%	+/-2.1
Divorced	1,186	+/-314	14.9%	+/-3.9
Females 15 years and over	7,853	+/-212	7,853	(X)
Never married	1,353	+/-289	17.2%	+/-3.7
Now married, except separated	4,555	+/-420	58.0%	+/-5.0
Separated	151	+/-170	1.9%	+/-2.1
Widowed	580	+/-182	7.4%	+/-2.3
Divorced	1,214	+/-306	15.5%	+/-4.0
FERTILITY				
Number of women 15 to 50 years old who had a birth in the past 12 months	274	+/-152	274	(X)
Unmarried women (widowed, divorced, and never married)	72	+/-94	26.3%	+/-26.6
Per 1,000 unmarried women	35	+/-45	(X)	(X)
Per 1,000 women 15 to 50 years old	58	+/-32	(X)	(X)
Per 1,000 women 15 to 19 years old	0	+/-73	(X)	(X)
Per 1,000 women 20 to 34 years old	137	+/-76	(X)	(X)
Per 1,000 women 35 to 50 years old	5	+/-6	(X)	(X)
GRANDPARENTS				
Number of grandparents living with own grandchildren under 18 years	N	N	N	N
Responsible for grandchildren	N	N	N	N
Years responsible for grandchildren				
Less than 1 year	N	N	N	N
1 or 2 years	N	N	N	N
3 or 4 years	N	N	N	N
5 or more years	N	N	N	N
Number of grandparents responsible for own grandchildren under 18 years	N	N	N	N
Who are female	N	N	N	N
Who are married	N	N	N	N
SCHOOL ENROLLMENT				
Population 3 years and over enrolled in school	6,000	+/-464	6,000	(X)
Nursery school, preschool	505	+/-201	8.4%	+/-3.1
Kindergarten	418	+/-160	7.0%	+/-2.6
Elementary school (grades 1-8)	2,781	+/-255	46.4%	+/-4.3
High school (grades 9-12)	1,483	+/-167	24.7%	+/-3.4
College or graduate school	813	+/-314	13.6%	+/-4.4
EDUCATIONAL ATTAINMENT				
Population 25 years and over	13,285	+/-108	13,285	(X)
Less than 9th grade	680	+/-294	5.1%	+/-2.2
9th to 12th grade, no diploma	1,123	+/-355	8.5%	+/-2.7
High school graduate (includes equivalency)	4,180	+/-576	31.5%	+/-4.4
Some college, no degree	3,532	+/-442	26.6%	+/-3.3
Associate's degree	938	+/-239	7.1%	+/-1.8
Bachelor's degree	2,084	+/-484	15.7%	+/-3.6
Graduate or professional degree	748	+/-235	5.6%	+/-1.8
Percent high school graduate or higher	(X)	(X)	86.4%	+/-3.6
Percent bachelor's degree or higher	(X)	(X)	21.3%	+/-4.1
VETERAN STATUS				
Civilian population 18 years and over	14,769	+/-4	14,769	(X)
Civilian veterans	1,212	+/-241	8.2%	+/-1.6

Subject	Uinta County, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
DISABILITY STATUS OF THE CIVILIAN NONINSTITUTIONALIZED POPULATION				
Total Civilian Noninstitutionalized Population	20,855	+/-69	20,855	(X)
With a disability	2,749	+/-460	13.2%	+/-2.2
Under 18 years	6,240	+/-13	6,240	(X)
With a disability	272	+/-164	4.4%	+/-2.6
18 to 64 years	12,547	+/-146	12,547	(X)
With a disability	1,307	+/-361	10.4%	+/-2.9
65 years and over	2,068	+/-129	2,068	(X)
With a disability	1,170	+/-245	56.6%	+/-10.5
RESIDENCE 1 YEAR AGO				
Population 1 year and over	20,668	+/-133	20,668	(X)
Same house	15,866	+/-910	76.8%	+/-4.3
Different house in the U.S.	4,751	+/-919	23.0%	+/-4.5
Same county	1,920	+/-581	9.3%	+/-2.8
Different county	2,831	+/-640	13.7%	+/-3.1
Same state	969	+/-550	4.7%	+/-2.7
Different state	1,862	+/-639	9.0%	+/-3.1
Abroad	51	+/-102	0.2%	+/-0.5
PLACE OF BIRTH				
Total population	21,015	*****	21,015	(X)
Native	19,858	+/-311	94.5%	+/-1.5
Born in United States	19,793	+/-309	94.2%	+/-1.5
State of residence	7,164	+/-785	34.1%	+/-3.7
Different state	12,629	+/-820	60.1%	+/-3.9
Born in Puerto Rico, U.S. Island areas, or born abroad to American parent(s)	65	+/-65	0.3%	+/-0.3

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes

when using multi-year data containing data from 2013.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2011-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2011-2013 3-Year American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2009-2013 and 2011-2013 tables, industry data in the multiyear files (2009-2013 and 2011-2013) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at <http://www.census.gov/people/io/methodology/>.

While the 2011-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2011-2013 3-Year American Community Survey

Explanation of Symbols:

1. An *** entry in the margin of error column indicates that either no sample observations or too few sample observations were

available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

8. An '(X)' means that the estimate is not applicable or not available.

GROSS RENT				
Occupied units paying rent	N	N	N	N
Less than \$200	N	N	N	N
\$200 to \$299	N	N	N	N
\$300 to \$499	N	N	N	N
\$500 to \$749	N	N	N	N
\$750 to \$999	N	N	N	N
\$1,000 to \$1,499	N	N	N	N
\$1,500 or more	N	N	N	N
Median (dollars)	669	+/-41	(X)	(X)
No rent paid	N	N	N	N
GROSS RENT AS A PERCENTAGE OF HOUSEHOLD INCOME (GRAPI)				
Occupied units paying rent (excluding units where GRAPI cannot be computed)	2,101	+/-400	2,101	(X)
Less than 15.0 percent	448	+/-201	21.3%	+/-9.1
15.0 to 19.9 percent	302	+/-146	14.4%	+/-7.1
20.0 to 24.9 percent	409	+/-194	19.5%	+/-7.8
25.0 to 29.9 percent	206	+/-113	9.8%	+/-5.3
30.0 to 34.9 percent	91	+/-80	4.3%	+/-3.7
35.0 percent or more	645	+/-284	30.7%	+/-11.6
Not computed	168	+/-99	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household Income are valid values.

The 2009, 2010, 2011, 2012, and 2013 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

Median calculations for base table sourcing VAL, MHC, SMOC, and TAX should exclude zero values.

Telephone service data are not available for certain geographic areas due to problems with data collection. See Errata Note #93 for details.

While the 2011-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2011-2013 3-Year American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

DP05 ACS DEMOGRAPHIC AND HOUSING ESTIMATES

2011-2013 American Community Survey 3-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Two races excluding Some other race, and Three or more races	N	N	N	N

Subject	Uinta County, Wyoming			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Total housing units	8,724	+/-56	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2011-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
