Non-Migrant*: 176,818 tax returns were filed in 2002 with 389,560 exemptions reported.

* Number of Returns: includes records for individual income tax forms 1040, 1040A and 1040EZ. The foreign category also includes forms 1040NR, 1040PR, 1040VI and 1040SS processed through Cycle 39. Returns processed after late September are not included in the data. The number of returns also exclude returns with filer and spouse of filer deceased (and there are no other exemptions on the return); returns that do not match Year-1 to Year-2 and matched returns that are not geographically coded in either year, and "zero exemptions" returns are all excluded.

* Number of Exemptions: includes the filer (if not deceased), the number of children exemptions (at home, away, and with EIC), the number of parent's exemptions and the number of other exemptions.

* Matching Returns: tax returns are matched for two particular tax years (2002 and 2001). These are generically referred to as Year-1 (prior year) and Year-2 (current year). There are three categories of match status: (a) matched, (b) unmatched, Year-1 only, and (c) unmatched, Year-2 only. The match is made based on the SSN of the primary filer only. That is, no match is attempted on the secondary filer.

* Non-Migrant: tax returns filed in the state of Wyoming both in 2002 and in 2001.
