Publications are typically updated annually, quarterly, or monthly.

The Economic Analysis Division's (EAD) core mission is to coordinate, develop, and disseminate economic and demographic research and information. The EAD strives to provide quality customer service to clients via published reports, presentations, and customized information responses and to provide policy and economic analysis to state agencies.

The Wyoming Economic Analysis Division (EAD)

State Data Center

The Economic Analysis Division (EAD) serves as the lead agency for the Wyoming State Data Center (SDC) program. The SDC is a partnership with the U.S. Census Bureau to provide a vehicle for the dissemination of data provided by the Bureau to state and local governments. It is the official source of demographic, economic, and social statistics produced by the Census Bureau. The extensive data library includes federal, state, and county information on income, employment, demographics, population, and more. Available Census data products and information:

- Decennial Census data
- American Community Survey (ACS)
- Annual population estimates and projections by state, county, city, and town
- 2007 Economic Census
- County Business Patterns
- Local Employment Dynamics (LED)
- Poverty, income, and health insurance coverage data
- Median household income
- Customized demographic and population tabulations and trend analysis
- Maps and geographic summaries
- Housing statistics and building permits
- American FactFinder

Other information disseminated by the EAD: export data, health insurance information, county economic profiles, and Wyoming Gross Domestic Product, as well as income, employment, and earnings data by county.

Wyoming Cost of Living

The Wyoming Cost of Living Index (WCLI) is a summarization of price data collected in 28 cities and towns throughout Wyoming biannually (2nd and 4th quarter). The information is utilized to build a comparative index, which gauges each county's price level with the statewide average, and to estimate inflation rates for Wyoming and the five regions of the State. Priced items are aggregated into six categories, which include housing, apparel, transportation, food, recreation & personal care, and medical. Each category is weighted according to importance in the average consumer's budget. Historical inflation values are also available on the EAD's website.

EQUALITY STATE ALMANAC

A comprehensive publication that includes demographic, economic, and geographic statistics for Wyoming and each of the 23 counties. Statistics are derived from various data sources, which include state and federal government agencies and private entities.

Revenue Forecasting

CREG The Consensus Revenue Estimating Group (CREG) is the official estimating body for all Wyoming State Government revenues. The EAD's administrator and the Budget & Fiscal Manager for the Legislative Service Office serve as co-chairs of the group. Additional members of the CREG include representatives from the State Treasurer's Office, Dept. of Revenue, Dept. of Education, State Auditor's Office, Wyoming Geological

Survey, Wyoming Oil & Gas Conservation Commission, and the University of Wyoming. The CREG meets biannually: the October meeting provides the initial revenue forecast while the January meeting presents an opportunity to review and update the October forecast before the Legislature convenes. CREG publications include the October & January revenue forecasts, monthly reports, and news releases. In conjunction with the release of the monthly CREG report, the Wyoming Insight is also published. It provides a snapshot of energy and business indicators for the State.

Economic Forecasts

The 10-Year Outlook is an economic and demographic forecast that provides businesses, individuals, and government agencies with a profile of key economic trends and variables in Wyoming. The report's focus is on long-term structural trends within the State's economy. The report presents non-agricultural wage and salary employment by industry, labor force and unemployment, population and migration, and income and earnings data.

The EAD also maintains a Regional Economic Models Inc. (REMI) Policy Insight model for the State. REMI is a regional dynamic economic forecasting and policy analysis model. It provides time series analysis and is able to measure economic impacts to Wyoming's economy. The EAD periodically publishes special reports using REMI analysis.
