(1) CREG forecast effective as of January 13, 2012.

(2) Year-to-date forecast is determined by using the pace of historical revenues applied to the CREG forecast for fiscal 2012.

(3) Common School Permanent Land Fund (CSPLF) investment income exceeded the spending policy amount (SPA) statutorily established for this account by \$7.5 million, therefore a like amount of FMRs which would normally flow to the SFP will be diverted to the CSPLF SPRA. Additionally, the SPRA balance exceeds the 75% of SPA trigger established in statute, and \$462,000 will tip from the SPRA to the CSPLF corpus.

(4) The "Difference YTD" is greatly impacted by the receipt of CLBs. Excluding CLBs, FMRs are on a pace nearly identical to the severance tax pace.
