WYOMING EMPLOYMENT, INCOME, AND GROSS DOMESTIC PRODUCT REPORT

December 2012

Prepared by
Gabrielle Horvath, Intern

Supervised by
Amy Bittner, Senior Economist

Department of Administration and Information
Economic Analysis Division

"To coordinate, develop, and disseminate economic & demographic research and information."

STAFF

Bill Mai – *Administrator*
Justin Ballard – *Principal Economist*
Dr. Wenlin Liu – *Principal Economist*
Jim Robinson – *Principal Economist*
Amy Bittner – *Senior Economist*
Emily Johnson – *Economist*

Other information available from the
Economic Analysis Division:

Consensus Revenue Estimating Group (CREG) – State Revenue Forecast
Equality State Almanac
Housing Information
Wyoming Cost of Living Index (WCLI)
Wyoming Economic and Demographic Forecast
Wyoming Sales, Use, and Lodging Tax Revenue Report
Wyoming State Data Center (SDC)*
Population Estimates and Forecasts

*The Wyoming State Data Center Program is a joint effort between the Economic Analysis Division and the U.S. Census Bureau. The State Data Center acts as the Census information clearinghouse for the entire state. The extensive data library includes Federal, state, and county information on income, employment, demographics, population, and more.

INTRODUCTION

The *2012 Wyoming Employment, Income, and Gross Domestic Product Report* serves as a compendium of Federal government data, highlighting Wyoming and its twenty-three counties. The report contains several of the best indicators of Wyoming's demographic and economic growth and is presented in a format which can be used for planning and projection purposes.

Specifically, data contained within the publication include:

- Total Employment, Employment by Industry, and Unemployment Rates for the United States, individual states, Wyoming, and counties.
- Income descriptions such as Total Personal Income, Per Capita Personal Income, Total Personal Income by Source and Earnings by Major Industry, and Average Wage and Salary per Job for the United States, Wyoming, and counties.
- Personal Transfer Receipts and Farm Income for Wyoming.
- Total Gross Domestic Product data for the United States and individual states; Gross Domestic Product by Industry for the United States and Wyoming.

All information contained herein, except unemployment data, was obtained from the U.S. Bureau of Economic Analysis (BEA). The U.S. Bureau of Labor Statistics (BLS) served as the source for the unemployment rates. Source websites are listed below:

U.S. Bureau of Economic Analysis (BEA): <http://www.bea.gov>

U.S. Bureau of Labor Statistics (BLS): <http://www.bls.gov/>

The BEA compiles employment and income data on a place of work basis, therefore a residence adjustment has been made. Employment and income data were compiled according to the North American Industry Classification System (NAICS). Gross Domestic Product was also compiled using NAICS. NAICS is a classification system developed jointly by the United States, Canada, and Mexico for improved comparability of industrial statistics across North America. Detailed information about data compilation is located in the Data Notes, Glossary, and Industry Classification section, pages 98 - 102. Definitions of the major NAICS sector classifications are found on pages 103 - 106. Due to processing time, the release of a majority of the data is lagged approximately 24 months.

Additional economic and demographic data for Wyoming and its counties, including this report, are available electronically on the Economic Analysis Division's website, <http://eadiv.state.wy.us>, or by contacting:

Summary

EMPLOYMENT Total Employment

United States

From 2007 to 2010, the United States has not experienced an annual increase in total employment (number of jobs)¹.

Total employment in the United States declined 0.3%, or 441,400 jobs, from 2009 to 2010, an improvement from the 3.0% decline (5,436,100 jobs) between 2008 and 2009.

Although employment is falling at a decelerating rate, total employment in the United States continues to trend downward.

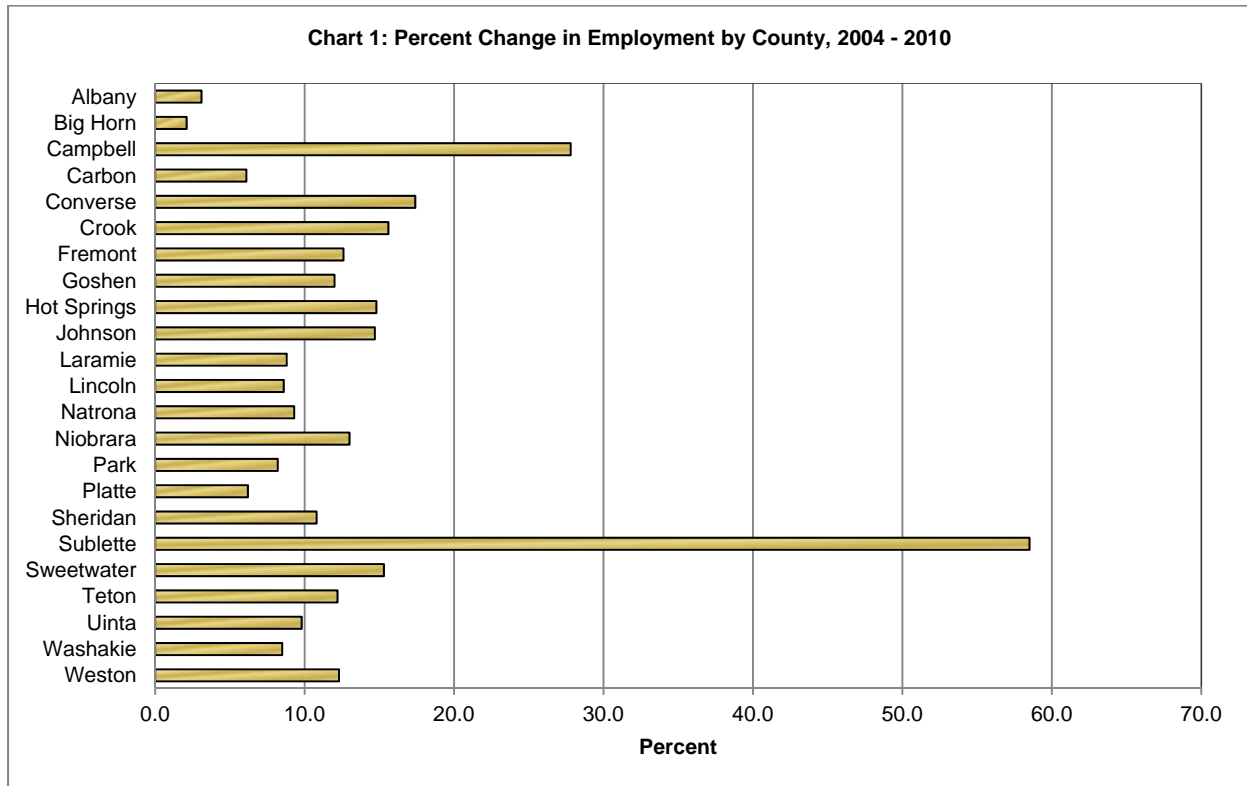

Still, between 2004 and 2010, employment has experienced net growth of 2.8% (4,740,700 jobs).

Wyoming

Between 2009 and 2010, total employment in Wyoming fell by 2,724 jobs, or 0.7%.

Despite a decrease in employment since 2008, the percent change in total employment in Wyoming from 2004 to 2010 remained the third highest in the nation at 12%, or 41,378 jobs. This was due to outstanding growth between 2004 and 2008, when 55,424 jobs were added to the workforce.

Between 2004 and 2010, Wyoming exhibited the third largest percentage increase in total employment in the United States behind Texas (13.2%) and Utah (12.5%).

As depicted in **Chart 1**, all twenty three counties in Wyoming exhibited employment growth between 2004 and 2010. During this period the counties that registered the largest increases in total employment include Sublette (58.5%) and Campbell (27.8%).

¹ The U.S. Bureau of Economic Analysis (BEA) calculates total employment by surveying individual employers and/or establishments. These employers report the number of both full-time and part-time workers. Employees, sole proprietors, and active partners are included, but unpaid family members and volunteers are not included. Employment figures represent number of jobs, not employed people. If an individual holds two separate jobs at any given time, the individual is counted twice, since two employment positions are occupied.

Non-Farm Employment by Type and Industry

United States

Of the twenty non-farm primary North American Industry Classification System (NAICS)² sectors, the United States saw the greatest annual employment growth in *Mining* (5.1%), *Administrative and Waste Services* (3.6%), and *Educational Services* (2.6%) between 2009 and 2010.

Several sectors experienced declines in total employment including *Construction* (-6.4%), *Information* (-3.1%), and *Manufacturing* (-2.3%).

Wyoming

From 2009 to 2010, Wyoming experienced employment growth in *Management of Companies and Enterprises* (11.6%), *Educational Services* (5.7%), and *Forestry, Fishing, and Related Activities* (2.6%).

The sectors that exhibited the largest declines were *Construction* (-5.7%), *Retail Trade* (-3.5%), and *Wholesale Trade* (-3.0%).

Chart 2: Distribution of Employment by NAICS Industry for the U.S. and Wyoming, 2010

Chart 2 displays the distribution of employment by sector according to the 20 main NAICS industry sectors in the United States and Wyoming.

² The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. business economy. NAICS groups establishments into industries based on the activity in which they are primarily engaged.

Unemployment Rate

United States

The unemployment rate³ in the United States was 8.9% in 2011. This was an improvement from 9.6% in 2010 and 9.3% in 2009. The last time the U.S. saw higher unemployment⁴ was in 1983.

Wyoming

In 2011, unemployment in Wyoming was the seventh lowest in the nation with a rate of 6.0%. North Dakota boasted the lowest unemployment rate, 3.5%, while Nevada demonstrated the highest rate in the nation at 13.5%.

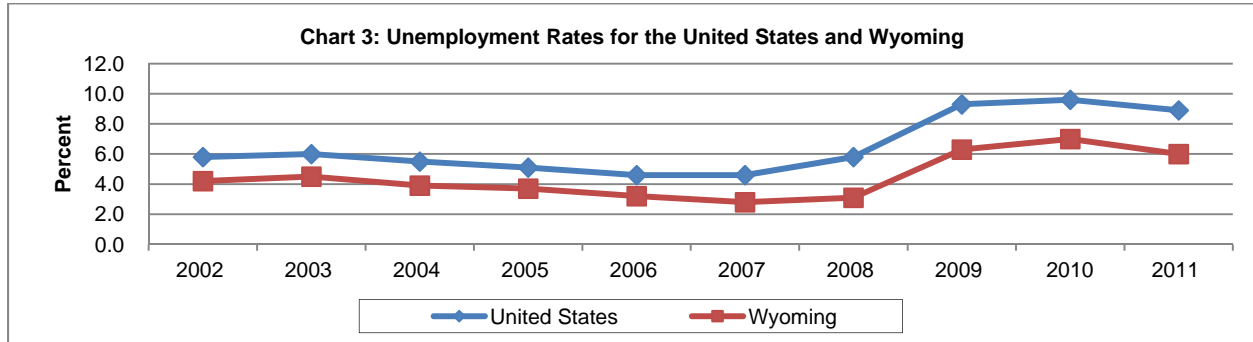

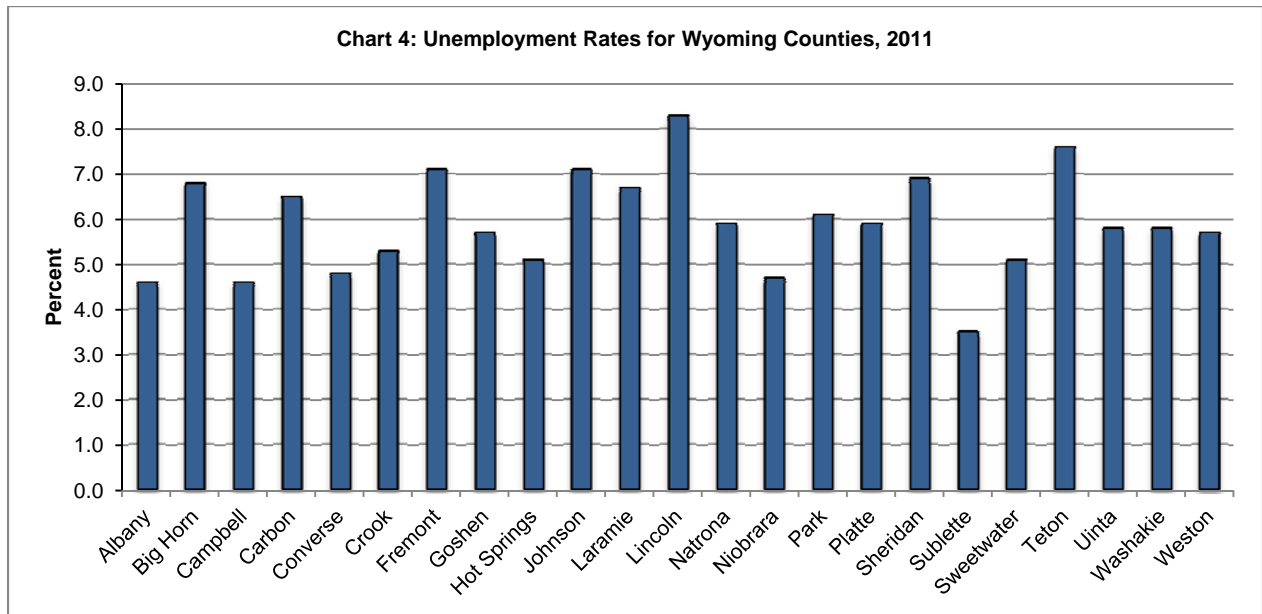

Chart 3 illustrates unemployment rates for the U.S. and Wyoming. Wyoming has generally had lower unemployment rates than the United States. By 2011, neither have reached pre-recession levels.

As seen in **Chart 4**, the Wyoming counties with the lowest unemployment rates in 2011 were Sublette (3.5%), Albany (4.6%), and Campbell (4.6%). The counties with the highest unemployment rates were Lincoln (8.3%), Teton (7.6%), Johnson (7.1%), and Fremont (7.1%).

³ The unemployment rate is calculated by dividing the number of unemployed persons by the total civilian labor force, or a combination of all employed and unemployed persons. Persons under the age of 16, persons in an institution such as a nursing home or corrections facility, and persons serving on active duty in the armed forces are not included in the civilian labor force.

⁴ The U.S. Bureau of Labor Statistics (BLS) defines unemployed persons as those ages 16 and over who do not have a job, have actively looked for a job in the prior four weeks before the survey, and are currently available for work. Actively looking for work includes contacting potential employers, sending out resumes or filling out applications, and placing or answering advertisements among other methods of seeking employment.

INCOME

Total Personal Income

United States

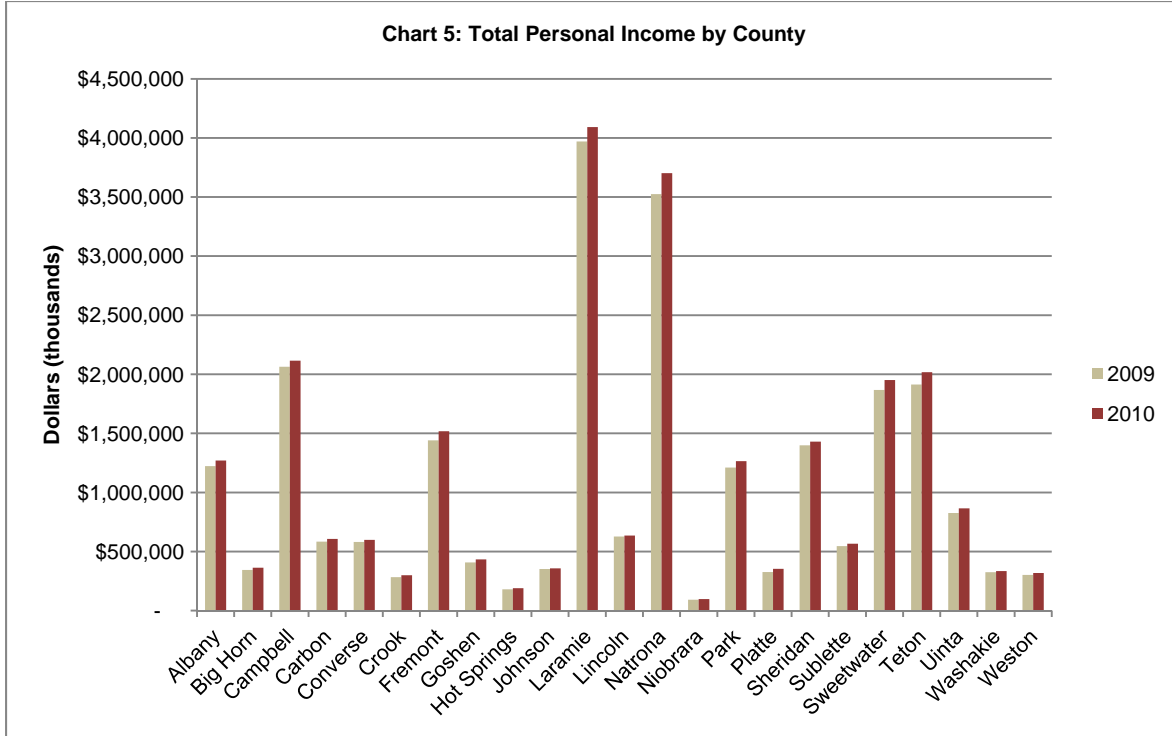

Total personal income (TPI)^{5,6} in the United States grew by 3.7%, or \$436.8 billion, between 2009 and 2010.

The three highest percentage increases in TPI from 2009-2010 were attained by North Dakota (9.4%), District of Columbia (5.7%), and Oklahoma and Texas (5.3%). The states with the largest numerical increases in TPI were California (\$60,872,490,000), Texas (\$47,998,181,000), and New York (\$38,497,221,000).

Wyoming

From 2009 to 2010, Wyoming was ahead of the United States in percent TPI growth with an increase of 4.1%, or \$991.4 million.

Platte (8.3%), Goshen (6.3%), and Niobrara (6.3%) counties displayed the greatest statewide percentage increases in TPI between 2009 and 2010.

Total personal income by county is exhibited in **Chart 5**. All twenty three counties demonstrated positive TPI growth from 2009 to 2010.

⁵ Income is broadly defined as revenue from all sources, i.e. businesses; Federal, State, local and foreign governments; households; and institutions.

⁶ Total personal income, as defined by the BEA, is the current income of residents in a particular area from all sources. It is measured as the sum of wage and salary disbursements, supplements to wages and salaries, proprietors' income with inventory valuation and capital consumption adjustments, rental income of persons with capital consumption adjustment, personal dividend income, personal interest income, and personal current transfer receipts, less contributions for government social insurance. See data notes.

Per Capita Personal Income

United States

Per capita personal income (PCI)⁷ in the United States was \$41,663 in 2010, a 4.3% increase from 2009.

Wyoming

In 2010, Wyoming PCI was \$44,961, \$3,298 above the national average. Wyoming's PCI increased 3.2% from 2009.

Chart 6

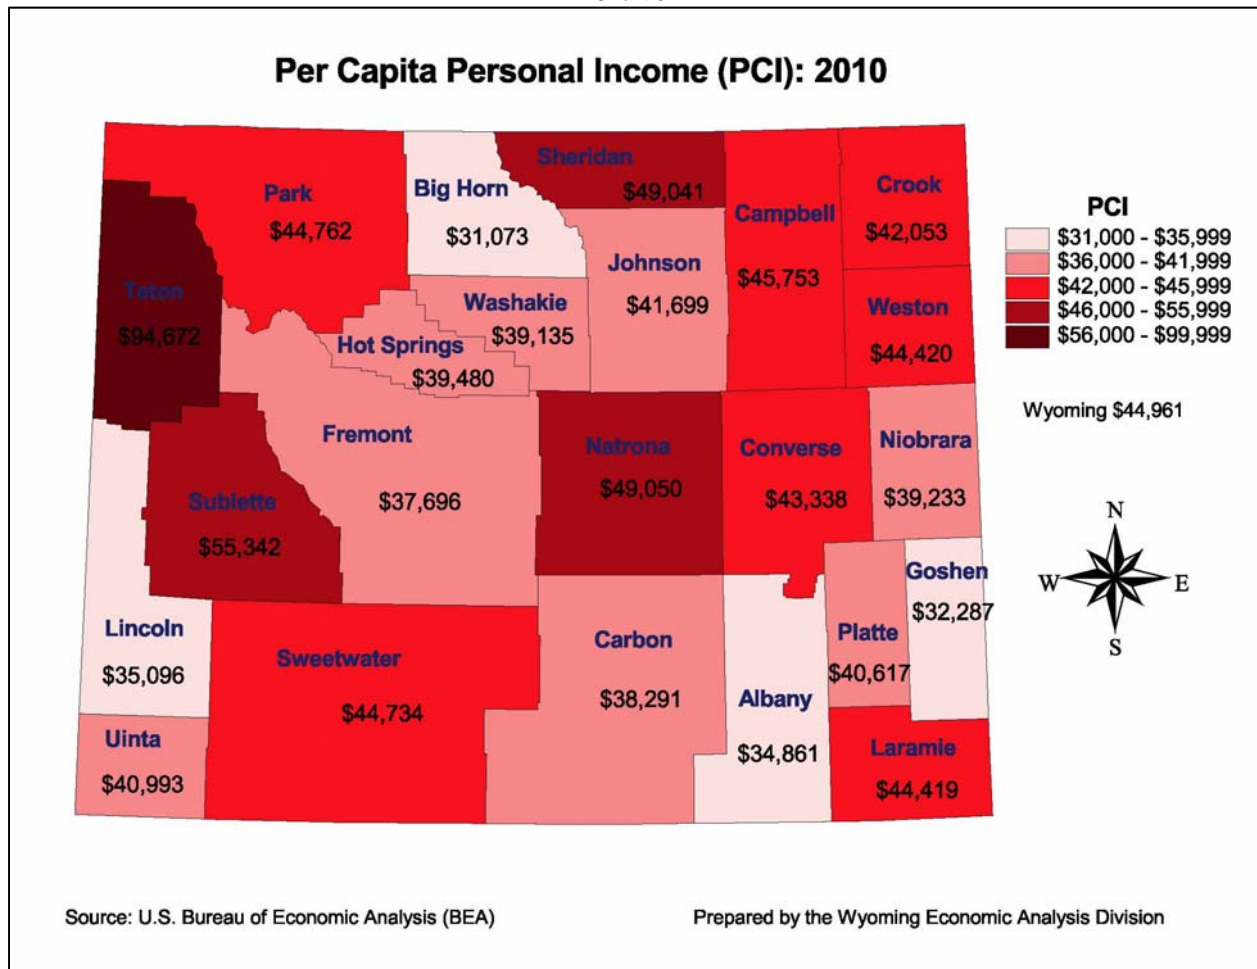

Chart 6 displays per capita personal income by county for Wyoming in 2010.

Teton County had the highest PCI in the State at \$94,672, or 210% of Wyoming's PCI (\$44,961). Teton has consistently possessed the highest PCI in the State due to the dividends and interest components of income.

Sublette County demonstrated Wyoming's second highest PCI of \$55,342. Sublette County is home to two of the nation's largest natural gas fields, the Pinedale Anticline and Jonah Field. Higher wages associated with *Mining* sector and small population-size were the reasons for Sublette's high PCI.

⁷ Per capita income (PCI) is calculated by dividing total personal income of an area by the total population of that area. PCI estimates offset population discrepancy unaccounted for in TPI estimates. However, these estimates may be misleading in areas where unusual conditions occur (bumper crop, natural disaster, etc.), those that are affected by a large institutional population (college, prison, etc.) or those where population changes rapidly. See data notes on page 99.

Average Wage per Job

United States

The United States experienced growth in average wage per job⁸ between 2009 and 2010, from \$45,780 to \$47,046, or 2.8%.

The areas with the highest average wage per job in 2010 were the District of Columbia (\$78,554), New York (\$59,545), and Connecticut (\$58,571). The states with the lowest average wage per job were South Dakota (\$34,012), Montana (\$34,764), and Mississippi (\$35,186).

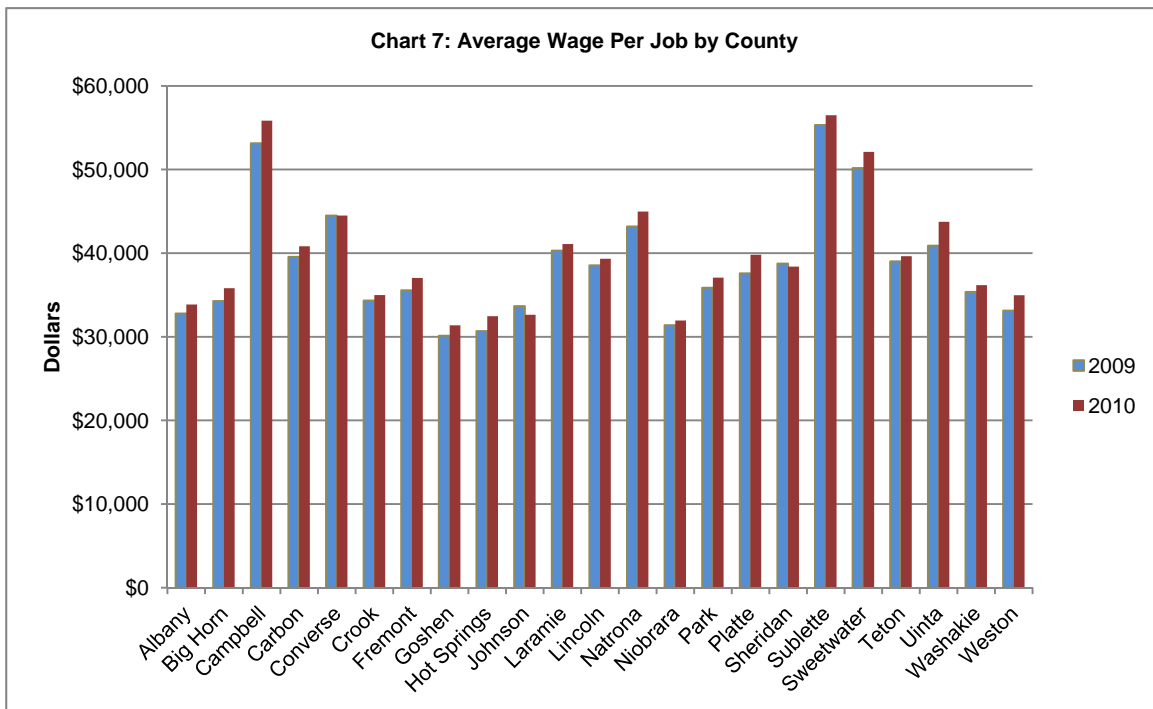

All states reported an increase in the average wage per job from 2009 to 2010. The greatest percentage increases were displayed by North Dakota (5.6%), New York (4.5%), and the District of Columbia (3.6%). Wyoming's average wage per job grew the 7th fastest in the nation at a rate of 3.1%.

Wyoming

In 2010, Wyoming ranked 25th in the nation with an average wage per job of \$42,768, an increase from \$41,467 in 2009.

Only three counties registered a decrease in the average wage per job between 2009 and 2010, Johnson (-3.1%), Sheridan (-0.9%), and Converse (-0.002). All other Wyoming counties experienced growth.

The counties with the highest average wage per job in 2010 were Sublette (\$56,489), Campbell (\$55,832), and Sweetwater (\$52,115). The counties with the lowest average wage per job were Goshen (\$31,367), Niobrara (\$31,938), and Hot Springs (\$32,584).

Average wage per job by county is depicted in **Chart 7**. All but three of Wyoming's counties registered an increase in the average wage per job between 2009 and 2010.

⁸ Average wage per job is defined as total wages and salaries in a certain area divided by the number of full and part-time jobs. Supplements to wages, including bonuses, paid vacation, and retirement incentives are not included.

GROSS DOMESTIC PRODUCT

Gross Domestic Product (GDP)⁹

United States

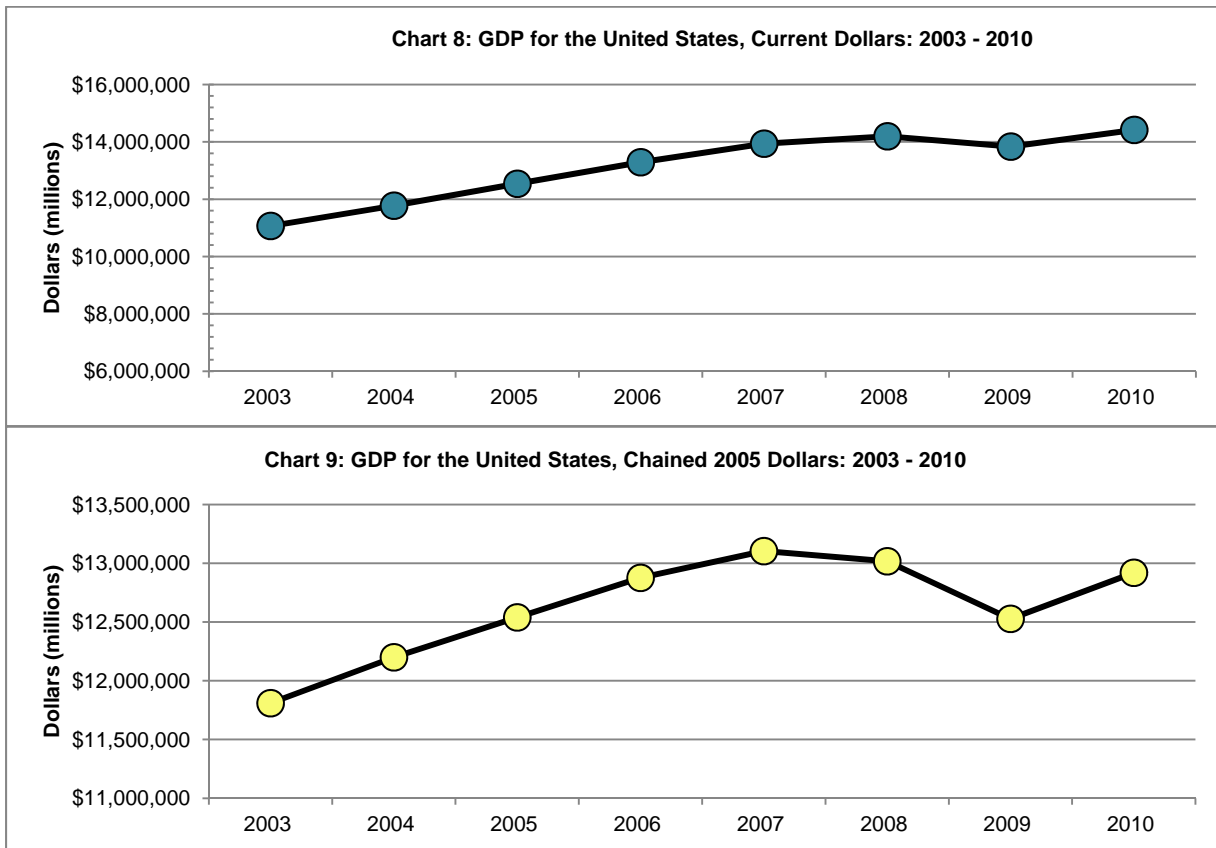

From 2009 to 2010, the United States reported a 4.2% increase in current¹⁰ GDP, \$13.8 trillion to \$14.4 trillion. Chained¹¹ (2005 dollars) GDP also registered an increase of 3.0% from \$12.9 trillion to \$12.5 trillion during this same time period.

The state with the highest real (chained) GDP was California (\$1,701,912 million), followed by Texas (\$1,113,104 million), and New York (\$1,005,324 million). The states with the highest percentage increases in real GDP were Louisiana (8.6%), North Dakota (8.2%), and Oregon (7.5%).

Wyoming

Current GDP for Wyoming in 2010 was \$35,845 million. Chained GDP exhibited a decline of -0.53% from \$32,088 million in 2009 to \$31,919 million in 2010. The only other state to experience negative growth in real GDP from 2009 to 2010 was Alaska (-1.0%).

Wyoming had the third smallest GDP (chained) in 2010. Behind Wyoming were North Dakota (\$31,833 million) and Vermont (\$22,857 million).

Current and chained U.S. GDP are shown in **Chart 8** and **Chart 9**. **Chart 9** shows the decline (-4.4%) in real GDP for the U.S. between 2007 and 2009, a drop from \$13.1 trillion to \$12.5 trillion.

⁹ Gross Domestic Product (GDP) by state is a comprehensive measure of economic activity within a state, or the total market value of goods and services produced by the labor and property within a state during a specified period of time.

¹⁰ Current dollars reflect the period in which they are reported and are not adjusted for inflation.

¹¹ Chained dollars are adjusted for inflation according to a base year to express real prices and allow for more accurate evaluation of growth across periods.

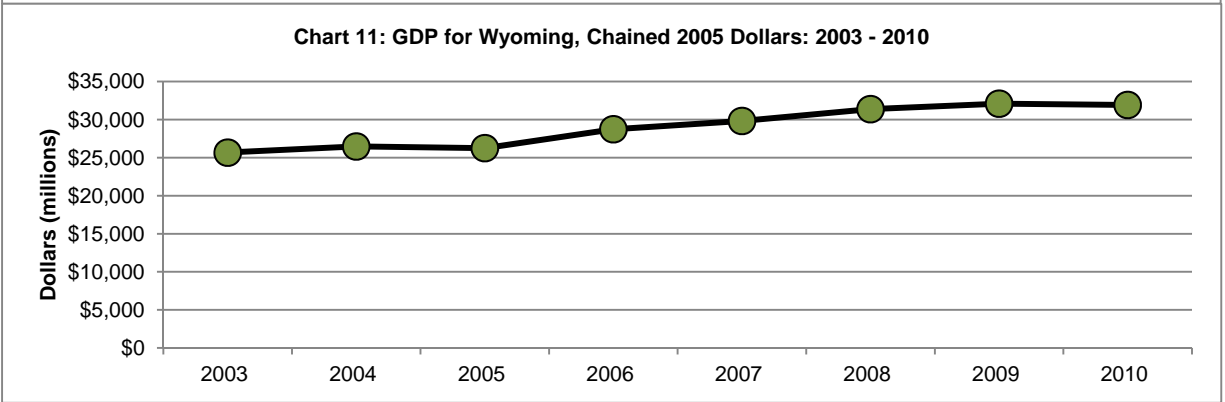

Chart 10 and **Chart 11** display Wyoming GDP in both current and chained (2005) dollars between 2003 and 2010. Over this period, real GDP growth in Wyoming (24.4%) exceeded real GDP growth in the U.S. (9.4%).

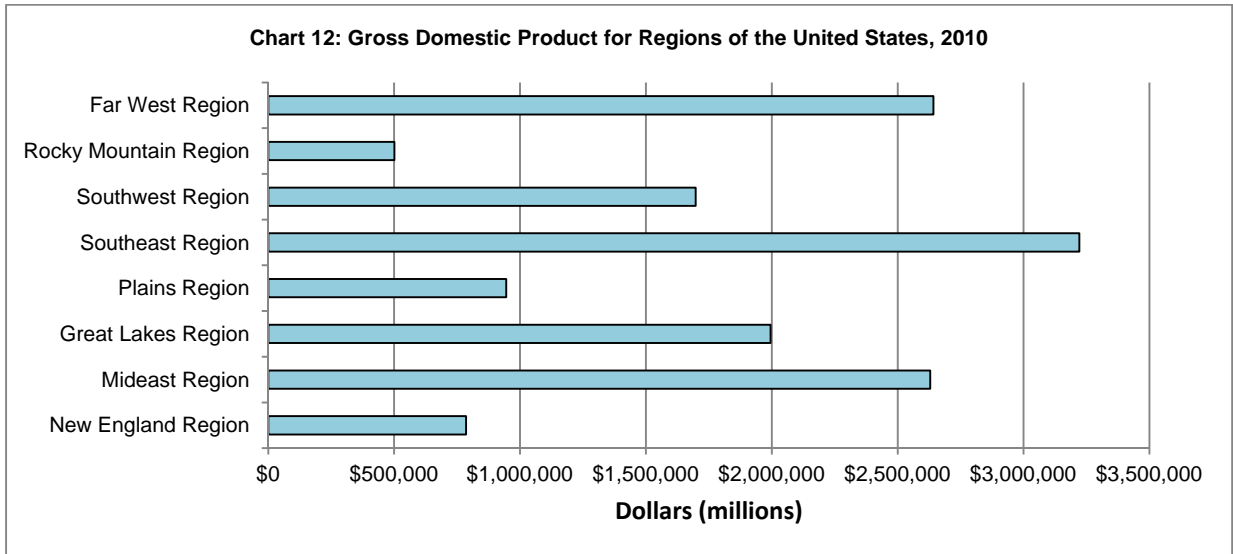

Chart 12 shows Gross Domestic Product (GDP) by U.S. region in current dollars. The Rocky Mountain Region, consisting of Colorado, Idaho, Montana, Utah and Wyoming, had the lowest GDP of the eight regions with \$500 billion in 2010. The Southeast Region, including Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Virginia and West Virginia, led the regions with a GDP of \$3.2 trillion in 2010.

Gross Domestic Product (GDP) by NAICS Industry

United States

The sectors leading the United States' GDP in 2010 were *Government* (12.9%), *Real Estate and Rental and Leasing* (12.2%), and *Manufacturing* (11.8%).

Wyoming

The *Mining* sector comprised 29.0% of Wyoming's GDP in 2010, compared to only 1.7% of U.S. GDP.

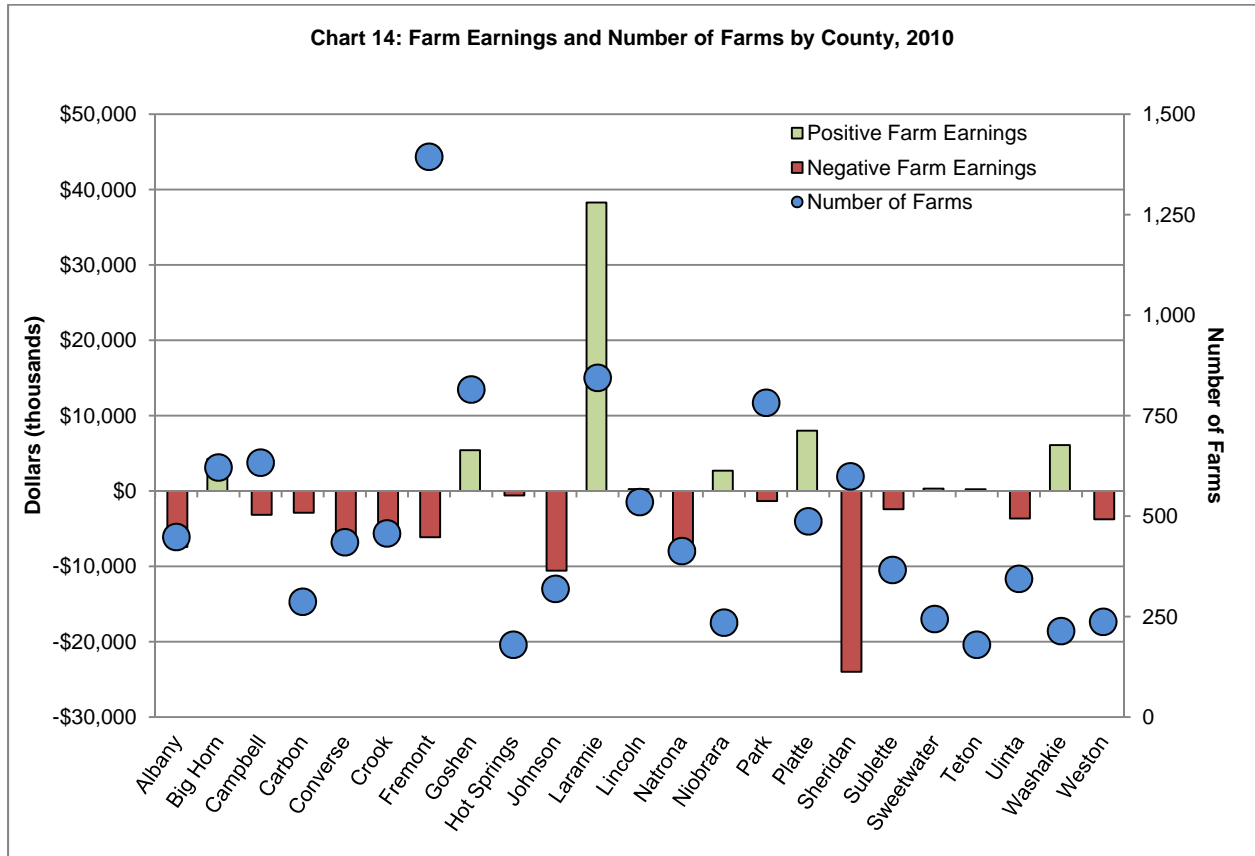

Chart 13: Distribution of GDP by NAICS Industry for the U.S. and Wyoming, 2010

Distribution of GDP by NAICS industry for the U.S. and Wyoming is shown above in **Chart 13**. Wyoming's *Mining* and *Government* contributed the most to state GDP in 2010. *Education Services* had the smallest contribution to Wyoming's GDP, 0.4%, in 2010.

Farm Earnings

Over half of Wyoming's counties reported negative farm earnings in 2010. The only counties to report positive farm earnings in 2010 were Big Horn, Goshen, Laramie, Lincoln, Niobrara, Platte, Sweetwater, Teton and Washakie. Negative farm earnings for the remaining fourteen counties can be attributed to high production expenses, including increased feed and fuel costs.

Source: Bureau of Economic Analysis (BEA)

Chart 14 illustrates farm earnings and number of farms for Wyoming counties in 2010.

Note: Some figures have been revised from previous editions.

(1) Census Bureau mid-year population estimates. Estimates for 2001-2010 reflect county population estimates available as of April 2012.

(2) Contributions for government social insurance are included in earnings by type and industry but they are excluded from personal income.

(3) The adjustment for residence is the net inflow of the earnings of inter-area commuters. For the United States, it consists of adjustments for border workers: Wage and salary disbursements to U.S. residents commuting to Canada less wage and salary disbursements to Canadian and Mexican residents commuting into the United States.

(4) Rental income of persons includes the capital consumption adjustment.

(5) Proprietors' income includes the inventory valuation adjustment and capital consumption adjustment.

(6) The estimates of earnings for 2001-2006 are based on the 2002 North American Industry Classification System (NAICS). The estimates for 2007 forward are based on the 2007 NAICS.

Note: Some figures have been revised from previous editions.

(D) Not shown to avoid disclosure of confidential information, but the estimates for this item are included in the totals.

(1) Census Bureau mid-year population estimates. Estimates for 2001-2010 reflect county population estimates available as of April 2012.

(2) Contributions for government social insurance are included in earnings by type and industry but they are excluded from personal income.

(3) The adjustment for residence is the net inflow of the earnings of inter-area commuters. For the United States, it consists of adjustments for border workers: Wage and salary disbursements to U.S. residents commuting to Canada less wage and salary disbursements to Canadian and Mexican residents commuting into the United States.

(4) Rental income of persons includes the capital consumption adjustment.

(5) Proprietors' income includes the inventory valuation adjustment and capital consumption adjustment.

(6) The estimates of earnings for 2001-2006 are based on the 2002 North American Industry Classification System (NAICS). The estimates for 2007 forward are based on the 2007 NAICS.

(3) The adjustment for residence is the net inflow of the earnings of inter-area commuters. For the United States, it consists of adjustments for border workers: Wage and salary disbursements to U.S. residents commuting to Canada less wage and salary disbursements to Canadian and Mexican residents commuting into the United States.

(4) Rental income of persons includes the capital consumption adjustment.

(5) Proprietors' income includes the inventory valuation adjustment and capital consumption adjustment.

(6) The estimates of earnings for 2001-2006 are based on the 2002 North American Industry Classification System (NAICS). The estimates for 2007 forward are based on the 2007 NAICS.

Note: Some figures have been revised from previous editions.

(D) Not shown to avoid disclosure of confidential information, but the estimates for this item are included in the totals.

(1) Census Bureau mid-year population estimates. Estimates for 2001-2010 reflect county population estimates available as of April 2012.

(2) Contributions for government social insurance are included in earnings by type and industry but they are excluded from personal income.

(3) The adjustment for residence is the net inflow of the earnings of inter-area commuters. For the United States, it consists of adjustments for border workers: Wage and salary disbursements to U.S. residents commuting to Canada less wage and salary disbursements to Canadian and Mexican residents commuting into the United States.

(4) Rental income of persons includes the capital consumption adjustment.

(5) Proprietors' income includes the inventory valuation adjustment and capital consumption adjustment.

(6) The estimates of earnings for 2001-2006 are based on the 2002 North American Industry Classification System (NAICS). The estimates for 2007 forward are based on the 2007 NAICS.

Note: Some figures have been revised from previous editions.

(D) Not shown to avoid disclosure of confidential information, but the estimates for this item are included in the totals.

(1) Census Bureau mid-year population estimates. Estimates for 2001-2010 reflect county population estimates available as of April 2012.

(2) Contributions for government social insurance are included in earnings by type and industry but they are excluded from personal income.

(3) The adjustment for residence is the net inflow of the earnings of inter-area commuters. For the United States, it consists of adjustments for border workers: Wage and salary disbursements to U.S. residents commuting to Canada less wage and salary disbursements to Canadian and Mexican residents commuting into the United States.

(4) Rental income of persons includes the capital consumption adjustment.

(5) Proprietors' income includes the inventory valuation adjustment and capital consumption adjustment.

(6) The estimates of earnings for 2001-2006 are based on the 2002 North American Industry Classification System (NAICS). The estimates for 2007 forward are based on the 2007 NAICS.

Note: Some figures have been revised from previous editions.

(D) Not shown to avoid disclosure of confidential information, but the estimates for this item are included in the totals.

(1) Census Bureau mid-year population estimates. Estimates for 2001-2010 reflect county population estimates available as of April 2012.

(2) Contributions for government social insurance are included in earnings by type and industry but they are excluded from personal income.

(3) The adjustment for residence is the net inflow of the earnings of inter-area commuters. For the United States, it consists of adjustments for border workers: Wage and salary disbursements to U.S. residents commuting to Canada less wage and salary disbursements to Canadian and Mexican residents commuting into the United States.

(4) Rental income of persons includes the capital consumption adjustment.

(5) Proprietors' income includes the inventory valuation adjustment and capital consumption adjustment.

(6) The estimates of earnings for 2001-2006 are based on the 2002 North American Industry Classification System (NAICS). The estimates for 2007 forward are based on the 2007 NAICS.

Note: Some figures have been revised from previous editions.

(1) Census Bureau mid-year population estimates. Estimates for 2001-2010 reflect county population estimates available as of April 2012.

(2) Contributions for government social insurance are included in earnings by type and industry but they are excluded from personal income.

(3) The adjustment for residence is the net inflow of the earnings of inter-area commuters. For the United States, it consists of adjustments for border workers: Wage and salary disbursements to U.S. residents commuting to Canada less wage and salary disbursements to Canadian and Mexican residents commuting into the United States.

(4) Rental income of persons includes the capital consumption adjustment.

(5) Proprietors' income includes the inventory valuation adjustment and capital consumption adjustment.

(6) The estimates of earnings for 2001-2006 are based on the 2002 North American Industry Classification System (NAICS). The estimates for 2007 forward are based on the 2007 NAICS.

(D) Not shown to avoid disclosure of confidential information, but the estimates for this item are included in the totals.

(1) Census Bureau mid-year population estimates. Estimates for 2001-2010 reflect county population estimates available as of April 2012.

(2) Contributions for government social insurance are included in earnings by type and industry but they are excluded from personal income.

(3) The adjustment for residence is the net inflow of the earnings of inter-area commuters. For the United States, it consists of adjustments for border workers: Wage and salary disbursements to U.S. residents commuting to Canada less wage and salary disbursements to Canadian and Mexican residents commuting into the United States.

(4) Rental income of persons includes the capital consumption adjustment.

(5) Proprietors' income includes the inventory valuation adjustment and capital consumption adjustment.

(6) The estimates of earnings for 2001-2006 are based on the 2002 North American Industry Classification System (NAICS). The estimates for 2007 forward are based on the 2007 NAICS.

Note: Some figures have been revised from previous editions.

(D) Not shown to avoid disclosure of confidential information, but the estimates for this item are included in the totals.

(1) Census Bureau mid-year population estimates. Estimates for 2001-2010 reflect county population estimates available as of April 2012.

(2) Contributions for government social insurance are included in earnings by type and industry but they are excluded from personal income.

(3) The adjustment for residence is the net inflow of the earnings of inter-area commuters. For the United States, it consists of adjustments for border workers: Wage and salary disbursements to U.S. residents commuting to Canada less wage and salary disbursements to Canadian and Mexican residents commuting into the United States.

(4) Rental income of persons includes the capital consumption adjustment.

(5) Proprietors' income includes the inventory valuation adjustment and capital consumption adjustment.

(6) The estimates of earnings for 2001-2006 are based on the 2002 North American Industry Classification System (NAICS). The estimates for 2007 forward are based on the 2007 NAICS.

Composition of BEA Regions:

New England: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont

Mideast: Delaware, District of Columbia, Maryland, New Jersey, New York, Pennsylvania

Great Lakes: Illinois, Indiana, Michigan, Ohio, Wisconsin

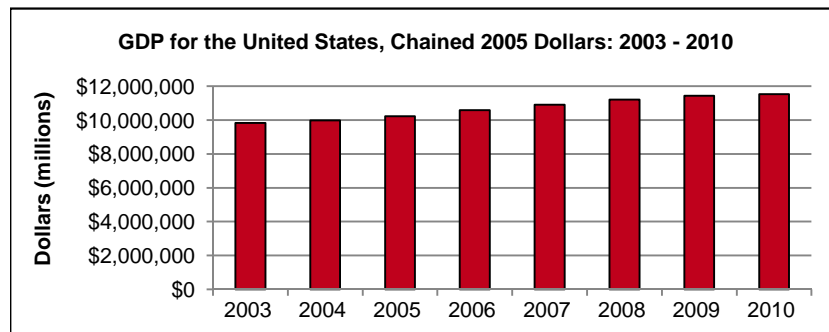

Plains: Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota

Southeast: Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, West Virginia

Southwest: Arizona, New Mexico, Oklahoma, Texas

Rocky Mountain: Colorado, Idaho, Montana, Utah, Wyoming

Far West: Alaska, California, Hawaii, Nevada, Oregon, Washington

Gross Domestic Product (GDP) by NAICS Industry for the United States in Millions of Current Dollars (part 1)

Industry (NAICS)	2004	2005	2006	2007	2008	2009	2010

DATA NOTES

EMPLOYMENT:

The U.S. Bureau of Economic Analysis (BEA) calculates employment as a count of occupied jobs, not the number of employed people. Employment under this definition includes all full-time and part-time jobs by place-of-work. If an individual holds more than one job at any given time, the individual is counted multiple times, once for each employment position occupied. BEA employment also includes proprietors or self-employed, but not unpaid family workers or volunteers. Employment figures in this document are from the BEA.

In contrast, the U.S. Bureau of Labor Statistics (BLS) counts each employed person only once even if the person holds more than one job. The BLS defines an employed person as someone who, during the reference week, performed any type of labor for pay, worked at least 15 hours unpaid in family enterprises, or was temporarily absent from work for non-economic reasons.

Unemployment data is compiled by the BLS. Unemployed persons include those persons who did not work during the reference week, were available for work, and made specific efforts to find employment. The unemployment rate is calculated by dividing the number of unemployed persons by the total civilian labor force.

TOTAL PERSONAL INCOME (TPI):

Total personal income (TPI), as defined by the BEA, is the current income of residents in a particular area from all sources. It is measured after deductions of personal contributions to Social Security, but before personal tax deductions have been made. It includes income received from businesses; federal, state, and local governments; households; institutions; foreign governments; other labor income (such as employers' contributions to private social insurance programs); farm and non-farm proprietor income; dividends, interest, and rent; and transfer receipts. It is the only key economic indicator which is adjusted for seasonality; it is not, however, adjusted for price changes.

Because TPI is a measure of income received, estimates of state and local area personal income should reflect the residence of the income recipients. Of the six major components of personal income, three are recorded on a place-of-residence basis: transfer receipts or payments; dividends, interest, and rental income; and proprietors' income. The data available at the state and county level for wages and salaries; other labor income; supplements to wages and salaries; and personal contributions for social insurance are estimated from data that are recorded by place-of-work.

Four adjustments are made to earnings by place-of-work to derive total personal income by place-of-residence. Following these adjustments, total earnings still comprise the bulk of total personal income. Beginning with total labor and proprietor earnings, the first adjustment is made by deducting contributions for social insurance. Although these are considered part of employee total earnings for the current period, social insurance contributions are not received during the current period and are, therefore, not included in personal income.

The second adjustment is made for employee by place-of-residency. The BEA defines employee residency as the location at which the employee is residing while employed. An example of this type of adjustment is a regular occurrence in Sheridan County, Wyoming. There are employees that work in the coal mines in Montana, but reside in Sheridan County, Wyoming. Earnings for these employees show up as earnings data for Montana. However, in the derivation of personal income by place-of-residence, an adjustment is made to reallocate these earnings as personal income for Wyoming. This residency adjustment for Wyoming is, therefore, the net effect of all interstate place-of-work versus place-of-residence discrepancies.

A third adjustment is made by appending dividends, interest, and rental income. Dividends are payments in cash or other assets, excluding stock, by for-profit corporations to non-corporate stockholders in state. Interest is the monetary and imputed interest income of persons from all sources. Rental income is the monetary income of persons from the rental of real property; the imputed net rental income of owner-occupants of non-farm dwellings; and the royalties received by persons from patents, copyrights, and rights to natural resources.

The fourth and final adjustment is the addition of transfer receipts or payments. Transfer receipts or payments are income payments to persons, generally in monetary form, for which they do not render current services. As a component of personal income, they are payments by governments and businesses to individuals and nonprofit institutions. Common examples of transfer receipts include Social Security payments and public assistance.

Once these four adjustments to the earnings by place-of-work are made, the result is total personal income by place-of-residence. Personal income effectively measures the size of consumer markets. When presented by industry of origin, as in this report, earnings can also be interpreted as a measure of the size of industrial markets.

Per capita personal income (PCI) is calculated by dividing total personal income of the area by the total population of that area. Per capita personal income is a useful tool to compare income across regions, states, and counties, because it removes the effects of population growth on TPI. Per capita personal income can also be used to track income growth over time.

GROSS DOMESTIC PRODUCT (GDP):

The U.S. Bureau of Economic Analysis (BEA) calculates Gross Domestic Product (GDP) for a state as the sum of Gross Domestic Product Originating (GDPO) by industry in all industries. This measure of GDP is the state counterpart of the nation's gross domestic product (GDP) by industry from the national income and product accounts (NIPA's).

The GDPO by industry is the contribution of each industry, including government, to GDP. An industry's GDPO, often referred to as its "value added," and is equal to its gross output (sales or receipts and other operating income, plus inventory change) minus its intermediate inputs (consumption of goods and services purchased or imported from other industries).

For each industry, the estimate of gross domestic product is composed of four components (estimated in current-dollars only): (1) Compensation of employees; (2) proprietors' income with inventory valuation adjustment (IVA) and capital consumption allowances; (3) indirect business tax and non-tax liability (IBT); and (4) Other, mainly capital related, charges. Most of the compensation and proprietors' income components of GDP are primarily based on BEA's estimates of earnings by place-of-work, an aggregate in the state personal income series. The IBT component of GDP reflects liabilities charged to business expense, most of which are sales and property taxes levied by state and local governments. The capital charges component of GDP comprises corporate profits with IVA, corporate capital consumption allowances, business transfer payments, net interest, rental income of persons, and subsidies less current surplus of government enterprises.

Current and constant (chained) dollar estimates of total GDP are presented for the U.S. and states for the years 2004-2010. Current and constant dollar estimates of GDP by NAICS industry classification are also presented for Wyoming by industry for 2004-2010.

GLOSSARY

Chained Dollars – A measure used to express real prices. It is a measure used to approximate the chained-type index level and is calculated by taking the current-dollar level of a series in the base period and multiplying it by the change in the chained-type quantity index number for the series since the base period. Chained-dollar estimates correctly show growth rates for a series, but are not additive in periods other than the base period.

Current Dollars – The market value of an item, which reflects price and quantities of the period being measured and has not been adjusted for inflation. For example, 2008 data in current dollars indicate values based on the worth of the dollar in the year 2008.

Industry – A group of establishments that produce similar products or provide similar services. For example, all establishments that manufacture automobiles are in the same industry. A given industry, or even a particular establishment within that industry, might have employees in dozens of occupations. The North American Industry Classification System (NAICS) groups similar establishments into industries.

Inflation – An increase in the level of consumer prices, or equivalently, a decline in the purchasing power of money. Inflation is defined as a time for generally rising prices for goods and factors of production.

North American Industry Classification System (NAICS) – A classification system developed jointly by the United States, Canada, and Mexico for improved comparability in industrial statistics across North America. It replaced the Standard Industrial Classification (SIC) in 2000. A list of NAICS classifications can be found on page 100.

Transfer Receipts – Payments made by the government to individuals and non-profit institutions that are not in exchange for goods and services, such as Social Security payments, and are a component of personal income. The term was previously identified as transfer payments.

INDUSTRY CLASSIFICATION

The industry classifications utilized in this report are classified in accordance with the 2002 and 2007 North American Industry Classification System (NAICS), published by the Federal Office of Management and Budget. NAICS is the standard used by Federal Statistical Agencies in classifying establishments for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. businesses and the economy. The estimates of earnings for 2001-2006 are based on the 2002 NAICS and estimates for 2007 forward are based on the 2007 NAICS. The twenty major industrial sectors that comprise NAICS are: 1) Agriculture, Forestry, Fishing, and Hunting; 2) Mining; 3) Utilities; 4) Construction; 5) Manufacturing; 6) Wholesale Trade; 7) Retail Trade; 8) Transportation and Warehousing; 9) Information; 10) Finance and Insurance; 11) Real Estate and Rental and Leasing; 12) Professional, Scientific, and Technical Services; 13) Management of Companies and Enterprises; 14) Administrative and Support and Waste Management and Remediation Services; 15) Educational Services; 16) Health Care and Social Assistance; 17) Arts, Entertainment, and Recreation; 18) Accommodation and Food Services; 19) Other Services (except public administration); and 20) Public Administration. These major sectors remain unchanged for the most part between the 2002 and 2007 NAICS. Under the 2007 NAICS, the Mining Sector is referred to as Mining, Quarrying, and Oil and Gas Extraction. Six of the twenty sectors had some changes within the sector from 2002 to 2007.

For purposes of this classification, an establishment is an economic unit, generally at a single physical location, where business is conducted or where services or industrial operations are performed. For example, a factory, mine, store, or office. Each establishment is assigned an industry code on the basis of its primary activity, which is determined by its principal product (or group of products) produced or distributed, or services rendered. Ideally, the principal product or service should be determined by its relative share of "value added" at the establishment. In practice, however, it is rarely possible to obtain this measure for individual products or services. Typically, it is necessary to adopt some other criterion which may be expected to give approximately the same results in determining the primary activity of an establishment.

Occasionally, in activity-diversified establishments, the appropriate measure cannot be determined or estimated for each product or service. In some instances, an industry classification based upon the recommended output measure will not adequately represent the relative economic importance of each of the varied activities carried on at such establishments. In such cases, employment or payroll information should be used to determine the primary activity of a particular establishment.

Due to this broad categorization of multi-sector establishments under one code, estimates will frequently be understated in one sector and overstated in another. While this does not influence the accuracy of either county or state totals, it will obviously have an effect upon estimates for a particular sector.

Data from business tax returns, provided by the Internal Revenue Service (IRS), are used to generate detailed industrial estimates of self-employed individuals at the national level. At the state level, Federal Insurance Contributions Act (FICA) records on individuals making self-employed contributions are used to get first round estimates by industry. This has resulted in an increase in the count of self-employed individuals, which was prompted by the following factors. First, those proprietors who were previously only counted once in the Current Population Survey (CPS), but who are in fact proprietors of two or more businesses, are now being counted once for each business. In addition, all persons formerly classified solely as wage and salary employees, but also spend some time as sole proprietors or participating partners in businesses, are now being counted in each of their multiple positions.

NAICS is reviewed every five years to determine if any changes are necessary to maintain the relevance, accuracy, and timeliness of the classifications. Identifying emerging industries is a primary focus of NAICS reviews. Regular evaluations of NAICS classifications are important steps toward greater global comparability of industry activities.

NORTH AMERICAN INDUSTRY CLASSIFICATION SYSTEM (NAICS)

11 Agriculture, Forestry, Fishing, and Hunting: The Agriculture, Forestry, Fishing, and Hunting sector comprises establishments primarily engaged in growing crops, raising animals, harvesting timber, and harvesting fish and other animals from a farm, ranch, or their natural habitats. The establishments in this sector are often described as farms, ranches, dairies, greenhouses, nurseries, orchards, or hatcheries. The sector distinguishes two basic activities: agricultural production and agricultural support activities. Production includes establishments performing the complete farm operation whereas the support includes the performance of one or more activities associated with farm operation.

21 Mining: The Mining sector comprises establishments that extract naturally occurring mineral solids, such as coal and ores; liquid minerals, such as crude petroleum; and gases, such as natural gas. The term mining is used in the broad sense to include quarrying, well operations, beneficiating (e.g., crushing, screening, washing, and flotation), and other preparation customarily performed at the mine site, or as a part of mining activity. The sector distinguishes two basic activities: mine operation and mining support activities. Operation includes establishments operating mines, quarries, or oil and gas wells on their own account or for others on a contract or fee basis. Support activities include establishments that perform exploration and/or other mining services on a contract or fee basis.

22 Utilities: The Utilities sector comprises establishments engaged in the provision of the following utility services: electric power, natural gas, steam supply, water supply, and sewage removal. Within this sector, the specific activities associated with the utility services provided vary by utility: electric power includes generation, transmission, and distribution; natural gas includes distribution; steam supply includes provision and/or distribution; water supply includes treatment and distribution; and sewage removal includes collection, treatment, and disposal of waste through sewer systems and sewage treatment facilities.

23 Construction: The Construction sector comprises establishments primarily engaged in the construction of buildings or engineering projects (e.g. highways and utility systems). Establishments primarily engaged in the preparation of sites for new construction and establishments primarily engaged in subdividing land for sale as building sites are also included in this sector. Construction work may include new work, additions, alterations, or maintenance and repairs.

31-33 Manufacturing: The Manufacturing sector comprises establishments engaged in the mechanical, physical, or chemical transformation of materials, substances, or components into new products. The assembling of component parts of manufactured products is considered manufacturing, except in the cases where the activity is appropriately classified in Sector 23, Construction. Establishments in the Manufacturing sector are often characterized as plants, factories, or mills. Establishments that transform materials or substances into new products by hand or in the worker's home and those engaged in selling to the general public are also included in this sector. Products made on the same premises from which they are sold, such as bakers, candy stores, and custom tailors are also included.

42 Wholesale Trade: The Wholesale Trade sector comprises establishments engaged in wholesaling merchandise, generally without transformation, and rendering services incidental to the sale of merchandise. The merchandise described in this sector includes the output of agriculture, mining, manufacturing, and certain information industries, such as publishing. Wholesalers sell merchandise to other businesses and normally operate from a warehouse or office. These warehouses and offices are characterized by having little display of merchandise.

44-45 Retail Trade: The Retail Trade sector comprises establishments engaged in retailing merchandise, generally without transformation, and rendering services incidental to the sale

of the merchandise. This sector comprises two main types of retailers: store and non-store. Store retailers operate fixed point-of-sale locations, located and designed to attract a high volume of walk-in customers. This type generally has extensive displays of merchandise and use mass-media advertising to attract customers. Non-store retailers are organized to serve the general public and reach their customers and market their merchandise with methods, such as the broadcasting of "infomercials," the publishing of paper and electronic catalogs, door-to-door solicitations, and distribution through vending machines.

48-49 Transportation and Warehousing: The Transportation and Warehousing sector includes industries providing transportation of passengers and cargo, warehousing and storage for goods, scenic and sightseeing transportation, and support activities related to modes of transportation. Establishments in these industries use transportation equipment or transportation related facilities as a productive asset. The type of equipment depends on the mode of transportation. The modes of transportation include air, rail, water, road, and pipeline.

51 Information: The Information sector comprises establishments engaged in the following processes: (a) producing and distributing information and cultural products, (b) providing the means to transmit or distribute these products as well as data or communications, and (c) processing data. The main components of this sector are publishing industries, motion picture and sound recording industries, broadcasting industries, telecommunications industries, Web search portals, data processing industries, and the information services industries.

52 Finance and Insurance: The Finance and Insurance sector comprises establishments primarily engaged in financial transactions (transactions involving the creation, liquidation, or change in ownership of financial assets) and/or in facilitating financial transactions. Three principal types of activities are identified: (1) Raising funds by taking deposits and/or issuing securities and, in the process, incurring liabilities; (2) pooling of risk by underwriting insurance and annuities; and (3) Providing specialized services facilitating or supporting financial intermediation, insurance, and employee benefit programs.

53 Real Estate and Rental and Leasing: The Real Estate and Rental and Leasing sector comprises establishments primarily engaged in renting, leasing, or otherwise allowing the use of tangible or intangible assets, and establishments providing related services. The major portion of this sector comprises establishments that rent, lease, or otherwise allow the use of their own assets by others. The assets may be tangible, as is the case of real estate and equipment, or intangible, as is the case with patents and trademarks.

54 Professional, Scientific, and Technical Services: The Professional, Scientific, and Technical Services sector comprises establishments that specialize in performing professional, scientific, and technical activities for others. These activities require a high degree of expertise and training. The establishments in this sector specialize according to expertise and provide these services to clients in a variety of industries, and in some cases, to households. Activities performed include: legal advice and representation; accounting, bookkeeping, and payroll services; architectural, engineering, and specialized design services; computer services; consulting services; research services; advertising services; photographic services; translation and interpretation services; veterinary services; and other professional, scientific, and technical services.

55 Management of Companies and Enterprises: The Management of Companies and Enterprises sector comprises (1) establishments that hold the securities of (or other equity interests in) companies and enterprises for the purpose of owning a controlling interest or influencing management decisions or (2) establishments (except government establishments) that administer, oversee, and manage establishments of the company or enterprise and that

normally undertake the strategic or organizational planning and decision making role of the company or enterprise. Establishments that administer, oversee, and manage may hold the securities of the company or enterprise.

56 Administrative and Support and Waste Management and Remediation Services: The Administrative and Support and Waste Management and Remediation Services sector comprises establishments performing routine support activities for the day-to-day operations of other organizations. These essential activities are often undertaken in-house by establishments in many sectors of the economy. The establishments in this sector specialize in one or more of these support activities and provide these services to clients in a variety of industries and, in some cases, to households. Activities performed include: office administration, hiring and placing of personnel, document preparation and similar clerical services, solicitation, collection, security and surveillance services, cleaning, and waste disposal services.

61 Educational Services: The Educational Services sector comprises establishments that provide instruction and training in a wide variety of subjects. This instruction and training is provided by specialized establishments, such as schools, colleges, universities, and training centers. These establishments may be privately owned and operated for profit or not for profit, or they may be publicly owned and operated. They may also offer food and/or accommodation services to their students. Educational services are usually delivered by teachers or instructors that explain, demonstrate, supervise, and direct learning. Instruction is imparted in diverse settings, such as educational institutions, the workplace, or the home.

62 Health Care and Social Assistance: The Health Care and Social Assistance sector comprises establishments providing health care and social assistance for individuals. The sector includes both health care and social assistance because it is sometimes difficult to distinguish between the boundaries of these two activities. The industries in this sector are arranged on a continuum starting with those establishments providing medical care exclusively, continuing with those providing health care and social assistance, and finally finishing with those providing only social assistance. The services provided by establishments in this sector are delivered by trained professionals. All industries in the sector share this commonality of process, namely, labor inputs of health practitioners or social workers with the requisite expertise. Many of the industries in the sector are defined based on the educational degree held by the practitioners included in the industry.

71 Arts, Entertainment, and Recreation: The Arts, Entertainment, and Recreation sector includes a wide range of establishments that operate facilities or provide services to meet varied cultural, entertainment, and recreational interests of their patrons. This sector comprises (1) establishments that are involved in producing, promoting, or participating in live performances, events, or exhibits intended for public viewing; (2) establishments that preserve and exhibit objects and sites of historical, cultural, or educational interest; and (3) establishments that operate facilities or provide services that enable patrons to participate in recreational activities or pursue amusement, hobby, and leisure-time interests.

72 Accommodation and Food Services: The Accommodation and Food Services sector comprises establishments providing customers with lodging and/or preparing meals, snacks, and beverages for immediate consumption. The sector includes both accommodation and food services establishments because the two activities are often combined at the same establishment. Excluded from this sector are civic and social organizations; amusement and recreation parks; theatres; and other recreation or entertainment facilities providing food and beverage services.

81 Other Services (except Public Administration): The Other Services (except Public Administration) sector comprises establishments engaged in providing services not specifically provided for elsewhere in the classification system. Establishments in this sector are primarily engaged in activities, such as equipment and machinery repair, promoting or

administering religious activities, grant making, advocacy, and dry-cleaning and laundry services, personal care services, death care services, pet care services, photofinishing services, temporary parking services, and dating services.

92 Public Administration: The Public Administration sector consists of establishments of federal, state, and local government agencies that administer, oversee, and manage public programs and have executive, legislative, or judicial authority over other institutions within a given area. These agencies also set policy, create laws, adjudicate civil and criminal legal cases, provide for public safety and for national defense. In general, government establishments in the Public Administration sector oversee governmental programs and activities that are not performed by private establishments. Establishments in this sector typically are engaged in the organization and financing of the production of public goods and services, most of which are provided for free or at prices that are not economically significant.

A detailed list of NAICS codes may be accessed from the U.S. Census Bureau's website:
<http://www.census.gov/eos/www/naics/index.html>
