FOR IMMEDIATE RELEASE
 Wednesday, December 21, 2011
 Contact: Wenlin Liu, Ph.D., Senior Economist

WYOMING'S 2011 POPULATION GREW THE SLOWEST IN 10 YEARS

CHEYENNE -- Wyoming's total resident population reached 568,158 in July 2011, according to estimates just released by the U.S. Census Bureau. The annual increase from July 2010 was 3,604 persons, or 0.6 percent. The estimated net migration, after accounting for the natural change (births and deaths), indicated that nearly 500 more persons moved into Wyoming than left the State between July 2010 and July 2011. In contrast, the annual net migration ranged between 5,000 and 10,000 from 2006 to 2009. Nationally, the population was an estimated 311.6 million in 2011, an increase of 0.7 percent from the previous year, the slowest since the 1940s. Wyoming's growth rate ranked the 29th fastest in the nation. "Overall, a recession slows peoples' move across states," said Dr. Wenlin Liu, senior economist with the Economic Analysis Division. With the rapid loss of jobs and a jump in the unemployment rate in 2009, the State has experienced the worst economic recession since the late 1980s. As a result, in-migration slowed down significantly after 2009. "People tend to move to areas where economies are viable, which is particularly true for Wyoming."

Despite the State's energy led economic recovery since early 2010, out-of-state residents were still hesitating to move in, mainly due to the gradual improvement of job opportunities and slow housing market in the rest of the nation. The 0.6 percent growth rate was the State's weakest since 2001, and was slower than any neighboring states. "During the past couple of years, Wyoming attracted only a portion of immigrants as it did before 2010 from states like California and Michigan. On the other hand, many workers with mining skills relocated to other states where the energy exploration was more active such as North Dakota, Oklahoma, and Pennsylvania," noted Dr. Liu. Partially due to the recession and weak economy, the number of births in the State declined nearly 6 percent since 2008. Attributing to population aging, the number of deaths increased more than 6 percent during the same period.

It appears that the population and migration growth is always lagging behind the employment increase in Wyoming. As long as the State's labor market performs better than the U.S., Wyoming's residents should still be discouraged from leaving, and people from other states may steadily move into the State again.

The complete population figures are available online at <http://eadiv.state.wy.us/> or U.S. Census Bureau's website at <http://www.census.gov/>

¹ Total population change includes a residual. This residual represents the change in population that cannot be attributed to any specific demographic component. See State and County Terms and Definitions at <http://www.census.gov/popest/about/terms/stco.html>.

² Net international migration for the United States, regions, and states includes the international migration of both native and foreign-born populations. Specifically, it includes: (a) the net international migration of the foreign born, (b) the net migration between the United States and Puerto Rico, (c) the net migration of natives to and from the United States, and (d) the net movement of the Armed Forces population between the United States and overseas.

(X) Not applicable.

Note: The April 1, 2010 Population Estimates base reflects changes to the Census 2010 population from geographic program revisions. It does not reflect changes from the Count Question Resolution program. See Geographic Terms and Definitions at <http://www.census.gov/popest/about/geo/terms.html> for a list of the states that are included in each region.

Note: See Geographic Terms and Definitions at <http://www.census.gov/popest/about/geo/terms.html> for a list of the states that are included in each region.
