

FOR IMMEDIATE RELEASE

Wednesday, December 19, 2018

Contact: Dr. Wenlin Liu, Chief Economist

WYOMING POPULATION DECLINED SLIGHTLY

CHEYENNE -- Wyoming's total resident population contracted to 577,737 in July 2018, according to estimates just released by the U.S. Census Bureau. The annual decrease from July 2017 was 1,197 persons, or 0.2 percent, which was the third consecutive year of decline. There are two components for population change. The natural increase (6,840 births less 4,947 deaths) was 1,893, but the estimated net migration (in-migration less outmigration) was about -3,100, which means that approximately 3,100 more residents left Wyoming than moved into the State between July 2017 and July 2018. In contrast, the net migration was about -7,900 between July 2016 and July 2017.

Nationally, the population was an estimated 327.2 million in 2018, an increase of 0.6 percent from the previous year. Nevada's 2.1 percent rate led the nation, followed by Idaho (2.1%), Utah (1.9%), and Arizona (1.7%). Besides Wyoming, seven other states also lost population, including West Virginia (-0.6%), Illinois (-0.4%), Alaska (-0.3%), and Hawaii (-0.3%) during the 12-month period.

"People tend to move to areas where the economy is vibrant, which is particularly true for Wyoming," said Dr. Wenlin Liu, Chief Economist with the Economic Analysis Division. Changes in employment always tend to drive and lead the change in migration in the State. Wyoming's economic rebound started in the beginning of 2017 and continued into 2018. The mineral extraction industry

(particularly oil) has led the recovery, and its activities also contributed to other industrial sectors' improvement such as manufacturing, wholesale trade, transportation, and professional services. However, the increased operational efficiency of drilling businesses means that less workers were hired back amid energy industry's revival. In addition, payroll jobs in state & local government, and the retail trade industry in 2018 were still lower than the previous year. As a result, the state's overall labor market featured moderate job growth and continued decline in the labor force between July 2017 and July 2018. Moreover, the labor market nationwide, particularly in neighboring states such as Colorado, Utah, and Idaho, continued to show strong expansions, which attracted a number of Wyoming workers and residents during the period.

The unemployment rate in Wyoming declined significantly since the summer of 2016, and the current level is just slightly higher than the U.S. average. Many baby boomers (age 54-72) are exiting the labor force by retiring. Additionally, business layoffs are very low, and the average wage increase in private industries was the highest in four years. "Wyoming's current labor market environment provides good opportunity and encouragement for people who are looking for jobs within the state," Liu commented.

The complete figures and methodology are available on the U.S. Census Bureau's website at <http://www.census.gov/>

(X) Not applicable.

¹ Total population change includes a residual. This residual represents the change in population that cannot be attributed to any specific demographic component. See Population Estimates Terms and Definitions at <http://www.census.gov/programs-surveys/popest/about/glossary.html>.

² Net international migration for the United States includes the international migration of both native and foreign-born populations. Specifically, it includes: (a) the net international migration of the foreign born, (b) the net migration between the United States and Puerto Rico, (c) the net migration of natives to and from the United States, and (d) the net movement of the Armed Forces population between the United States and overseas. Net international migration for Puerto Rico includes the migration of native and foreign-born populations between the United States and Puerto Rico.

Note: The estimates are based on the 2010 Census and reflect changes to the April 1, 2010 population due to the Count Question Resolution program and geographic program revisions. See Geographic Terms and Definitions at <http://www.census.gov/programs-surveys/popest/guidance-geographies/terms-and-definitions.html> for a list of the states that are included in each region. All geographic boundaries for the 2018 population estimates series except statistical area delineations are as of January 1, 2018. For population estimates methodology statements, see <http://www.census.gov/programs-surveys/popest/technical-documentation/methodology.html>.
