Census 2000 Redistricting Data

The official Census 2000 Redistricting Summary Files (PL94-171) were released in March of this year. This redistricting file includes total population by race and Hispanic origin for state, counties, county subdivisions, places, census tracts, block groups, blocks, voting districts, school districts, and American Indian reservations.

The federal government considers race and Hispanic origin to be two separate and distinct concepts. For Census 2000, the question on race and Hispanic origin were asked of every individual living in the United States (based on self-identification).

The question on race for Census 2000 was different from the one for the 1990 census. Respondents were given the options of selecting one or more race categories to indicate their racial identities. It was the first time that respondents were able to choose multiple races in American censuses. Because of the change, the Census 2000 data on race are not directly comparable with data from the 1990 census or earlier censuses.

Respondents who reported only one race are shown in the following six categories:

- White;
- Black or African American;
- American Indian and Alaska Native;
- Asian;
- Native Hawaiian and Other Pacific Islander;
- Some other race

Individuals who chose more than one of the six categories are included in the "Two or more races" population. There are 57 specific combinations of two or more races (15 combinations of two races; 20 combinations of three races; 15 combinations of four races; 6 combinations of five races; and 1 combination of 6 races). The redistricting file includes data for each of these 6 single and 57 multiple race categories.

According to Census 2000, there were 493,782 residents in Wyoming, and 6.4 percent were Hispanic or Latino (of any race). The remaining 462,113 people were not Hispanic. For racial breakdown, over 98 percent of people reported only one race. The largest group reported White alone, accounting for 92.1 percent

of all Wyoming residents. The American Indian alone population represented 2.3 percent, while Some Other Race alone represented 2.5 percent of the total. Over 96 percent of respondents who reported Some Other Race are of Hispanic origin. Of the 8,883 people who reported two or more races, over 95 percent reported exactly two races. The most common combinations was "White and American Indian" (3,289) which was followed by "White and Some other race" (2,737) (see page 3 to 4).

Users can find the county and place level data, and customized maps at our Division's Website: <http://eadiv.state.wy.us/demog_data/pop2000/>. For detailed data, geographic products and files, please contact our office (ead@state.wy.us) or go to the U.S. Census Bureau's American FactFinder Website: <<http://factfinder.census.gov/>>.

Demographic Profiles

The U.S. Census Bureau released the Profile of General Demographic Characteristics in May. A one-page table provides data on age and sex distribution, race, Hispanic origin, household relationship and type, housing occupancy and tenure for state, counties, cities and towns, CDPs (Census Designated Places, not incorporated), and American Indian Reservations. Users can find these tables at our Division's Website. The state profile is provided in page 5 of this report.

Summary File 1 (SF 1)

The U.S. Census Bureau will begin the release of more detailed information from Census 2000 this summer. The SF 1 products will include detailed information on population, household, and housing characteristics collected from all people and housing units, such as age, sex, household, housing units, and group quarter data by race and Hispanic origin. Data will be available down to block level for many tabulations, but only to the census-tract level for others. Summaries will also be included for other geographic areas such as Urban and Rural, Zip Code Areas, and school districts.

* All Other Two Races includes Black & Asian; Black & Native Hawaiian and Other Pacific Islander; American Indian & Native Hawaiian and Other Pacific Islander; American Indian & Asian; Asian & Native Hawaiian and Other Pacific Islander; and Native Hawaiian and Other Pacific Islander & Some Other Race.

Note: The question on race for Census 2000 was different from the one for the 1990 census. Respondents were given the option of selecting one or more race categories in 2000 census. Because of the change, the Census 2000 data on race are not directly comparable with data from the 1990 census or earlier censuses.

The population of One Race is divided into following 6 categories:

- White; - Black or African American; - American Indian and Alaska Native; - Asian; - Native Hawaiian and Other Pacific Islander; - Some Other Race.

Two or More Races refers to combinations of two or more of the above race categories.

* **Household** - A household includes all of the people who occupy a housing unit. People not living in households are classified as living in group quarters.

* **Housing Unit** - A housing unit may be a house, an apartment, a mobile home, a group of rooms, or a single room that is occupied (or if vacant, is intended for occupancy) as separate living quarters.

* **Family Household (Family)** - A family includes a householder and one or more people living in the same household who are related to the householder by birth, marriage, or adoption.

* **Female Householder** - A female maintaining a household with no husband of the householder present.

* **Nonfamily Household** - A householder living alone or with nonrelatives only.

* **Seasonal, Recreational, or Occasional Use Housing Units** - They include vacant units used or intended for use only in certain seasons, for weekends, or other occasional use throughout the year.

* **Homeowner Vacancy Rate** - It is the proportion of the homeowner housing inventory which is vacant for sale. It is computed by dividing the number of vacant units for sale only by the sum of owner-occupied units and vacant units that are for sale only, and then multiplying by 100.

* **Rental Vacancy Rate** - The proportion of the rental inventory which is vacant for rent. It is computed by dividing the number of vacant units for rent by the sum of the renter-occupied units and the number of vacant units for rent, and then multiplying by 100.
