Sept, 2003**

2002 County Population Estimates

According to the U.S. Census Bureau's recently released population estimates, the July 2002 population for Wyoming increased to 498,703 from 493,782, which was counted in Census 2000. The estimated net migration numbers, after accounting for the natural change (births minus deaths), indicated that only about 600 more persons moved in than left the state since Census 2000. Nationally, the population was estimated at 288,368,698 in 2002, an increase of 2.5 percent from April 2000.

Most counties in Wyoming showed population increases. However, only Campbell and Sublette counties lead the state with strong growth rates of 7.2 and 5.4 percent due to the natural gas activities in those regions. Hot Springs, Niobrara, and Washakie counties each suffered losses of at least 3.0 percent during the same period, mainly caused by outmigration (see page 2).

2001 Employment and Per Capita Income

According to the estimates recently released by the U.S. Bureau of Economic Analysis, the number of full-time and part-time jobs increased 2.2 percent for Wyoming, from 328,532 in 2000 to 335,784 in 2001. The growth rate for the nation was only 0.2 percent over the same period. Both Campbell and Sublette counties showed the most substantial increase of more than 6 percent each. Wyoming's per capita income (PCI) for 2001 was \$29,587, an increase of 5.9 percent from 2000. The overall national PCI was \$30,413 in 2001, up 2.2 percent from a year ago level. Per capita personal income is the annual Total Personal Income (TPI) of residents divided by population. TPI is the sum of net earnings by place of residence, rental income, personal dividend income, and transfer payments.

Teton County had the highest PCI in the state, at \$56,417; while Big Horn recorded the lowest figure of \$21,344 in 2001. Campbell, Crook, Hot Springs, Niobrara, and Uinta counties exhibited the most significant growth of over 10 percent, respectively, from 2000 to 2001 (see page 3). The detailed county level employment and income data by industry are available at our office Website (<http://eadiv.state.wy.us>).

Migration Flow for Wyoming

Recently released by the U.S. Internal Revenue Service, these migration data provide measures of population movement from state to state by using the number of individual income tax returns in 2001 and 2002, combined with number of personal exemptions claimed on these returns. Therefore, the data only represent those persons who filed tax returns, but still cover over 90 percent of the population nationwide.

The IRS numbers show that the state which had the most population exchange with Wyoming was Colorado. In-migration to Wyoming from Colorado (3,608) covered 15.2 percent of the total in-migrants, and out-migration to Colorado from Wyoming (3,417) was 16.1 percent of the total out-migrants between 2001 and 2002. Other states exhibiting significant migration exchange with Wyoming were large states such as California and Texas, and neighboring states.

The state experienced net immigration of approximately 2,500 persons between 2001 and 2002, which was the first time since 1995. largest net in-migration (in-flow minus out-flow) to the state come from California, South Dakota, Utah, Texas, and Nevada where at least 200 persons were lost to Wyoming, respectively. The main net out-migration went to Arizona and Idaho which gained over 100 residents each from Wyoming (see page 4).

Residential Building Permits for Wyoming

The new residential housing units authorized for construction in the state was 2,045 in 2002. This was an increase of 138 units or 7.2 percent from previous year. Laramie county recorded the highest number of permits in 2002 with 478 units, while Lincoln and Teton counties had around 200 new units added, respectively. Many rural and small counties, such as Goshen, Hot Springs, Niobrara, Washakie, and Weston, continued to experience few new housings (see page 5).

Population for Counties and Incorporated Places: 2000 and 2002

Non-Migrant*: 176,818 tax returns were filed in 2002 with 389,560 exemptions reported.

* Number of Returns: includes records for individual income tax forms 1040, 1040A and 1040EZ. The foreign category also includes forms 1040NR, 1040PR, 1040VI and 1040SS processed through Cycle 39. Returns processed after late September are not included in the data. The number of returns also exclude returns with filer and spouse of filer deceased (and there are no other exemptions on the return); returns that do not match Year-1 to Year-2 and matched returns that are not geographically coded in either year, and "zero exemptions" returns are all excluded.

* Number of Exemptions: includes the filer (if not deceased), the number of children exemptions (at home, away, and with EIC), the number of parent's exemptions and the number of other exemptions.

* Matching Returns: tax returns are matched for two particular tax years (2002 and 2001). These are generically referred to as Year-1 (prior year) and Year-2 (current year). There are three categories of match status: (a) matched, (b) unmatched, Year-1 only, and (c) unmatched, Year-2 only. The match is made based on the SSN of the primary filer only. That is, no match is attempted on the secondary filer.

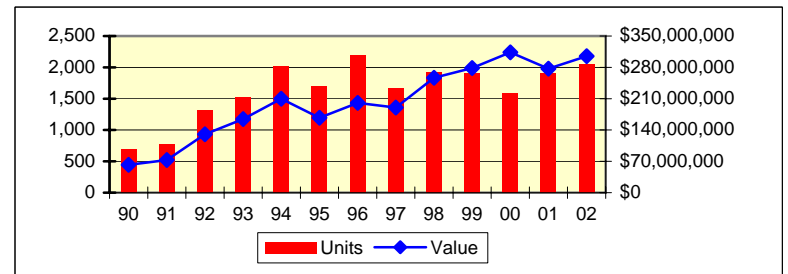

* Non-Migrant: tax returns filed in the state of Wyoming both in 2002 and in 2001.

New Residential Housing Units Authorized for Construction and Estimated Value: 1996 to 2002
