Dec, 2005**

## *2004 County Population Estimates*

According to the U.S. Census Bureau's recently released population estimates, the July 2004 population for Wyoming increased to 506,529 from 502,111 in 2003. The estimated net migration numbers, after accounting for the natural change (births minus deaths), indicated that about 1,770 more persons moved in than left the state during the year. Nationally, the population was estimated at 293.7 million in 2004, an increase of 1.0 percent from the previous year.

Nineteen counties in Wyoming showed population increases. Lincoln and Sublette counties continued to lead the state with substantial growth rates of 2.5 and 4.7 percent, respectively, due to the natural gas activities in the region. Big Horn, Converse, and Sweetwater counties also showed significant increases with at least 1.6 percent each. Albany, Carbon, Hot Springs, and Weston counties suffered losses during the same period, mainly caused by outmigration (see page 2).

## *Migration Flow for Wyoming*

Recently released by the U.S. Internal Revenue Service, these migration data provide measures of population movement from state to state by using the number of individual income tax returns in 2003 and 2004, combined with number of personal exemptions claimed on these returns. Therefore, the data only represent those persons who filed tax returns, but still cover over 90 percent of the population nationwide.

The IRS numbers show that the state which had the most population exchange with Wyoming was Colorado. In-migration to Wyoming from Colorado (3,355) covered 15.3 percent of the total in-migrants, and out-migration to Colorado from Wyoming (2,875) was 13.8 percent of the total out-migrants between 2003 and 2004. Other states exhibiting significant migration exchange with Wyoming were large states such as California and Texas, and neighboring states.

The state experienced net inmigration of over 1,000 persons between 2003 and 2004. The largest net in-migration (in-flow minus out-flow) to the state come from California, Colorado, Kansas, Nebraska, Pennsylvania,

and Illinois where at least 100 persons were lost to Wyoming, respectively. The main net out-migration went to Idaho, Montana, Arizona, and Florida which gained over 100 residents each from Wyoming (see page 3).

## *Residential Building Permits for Wyoming*

The new residential housing units authorized for construction in the state was 3,318 in 2004. This was an increase of 441 units or 15.3 percent from previous year. However, the single family units still increased over 20 percent due to the historical low interest rates. Laramie county recorded the highest number of permits in 2004 with 876 units, while Albany and Teton counties had over 300 new units added, respectively. Many rural and small counties, such as Hot Springs, Niobrara, and Washakie, continued to experience few new housings (see page 4).

## *Household Income, Poverty, and Health Insurance*

The real median household income for the 2-year moving average of 2003-2004 period was \$44,577 in Wyoming and it ranked 21st in the nation. The annual growth rate was 4.3 percent compared to the decline of 0.2 percent for U.S. Wyoming's median household income also surpassed the national average for the first time in many years. The poverty rate of 9.9 percent in the state was below the national average of 12.6 percent, and it ranked 35<sup>th</sup> in the nation. The health insurance coverage rate of 85.0 percent was slightly higher than the national level during the same period (see page 5).

Non-Migrant\*: 180,810 tax returns were filed in 2004 with 394,574 exemptions reported.

\* Number of Returns: includes records for individual income tax forms 1040, 1040A and 1040EZ. The foreign category also includes forms 1040NR, 1040PR, 1040VI and 1040SS processed through Cycle 39. Returns processed after late September are not included in the data. The number of returns also exclude returns with filer and spouse of filer deceased (and there are no other exemptions on the return); returns that do not match Year-1 to Year-2 and matched returns that are not geographically coded in either year, and "zero exemptions" returns are all excluded.

\* Number of Exemptions: includes the filer (if not deceased), the number of children exemptions (at home, away, and with EIC), the number of parent's exemptions and the number of other exemptions.

\* Matching Returns: tax returns are matched for two particular tax years (2004 and 2003). These are generically referred to as Year-1 (prior year) and Year-2 (current year). There are three categories of match status: (a) matched, (b) unmatched, Year-1 only, and (c) unmatched, Year-2 only. The match is made based on the SSN of the primary filer only. That is, no match is attempted on the secondary filer.

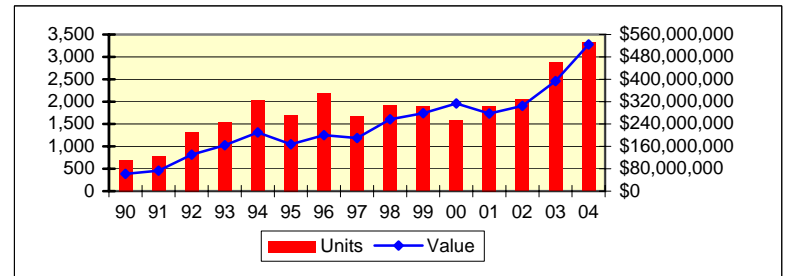

\* Non-Migrant: tax returns filed in the state of Wyoming both in 2004 and in 2003.
